

Inhaltsverzeichnis

Software Engineering

Wissenschaftliches Programm

Modeling 1

Lars Hamann, Martin Gogolla

Endogene Metamodellierung der Semantik von neueren UML 2 Sprachmitteln 31

Samuel Kounev, Fabian Brosig, Nikolaus Huber

The Descartes Modeling Language for Self-Aware Performance and Resource Management 33

Harald Störrle

On the Impact of Layout Quality to Understanding UML Diagrams: Not Just Pretty Pictures 35

Grischa Liebel, Nadja Marko, Matthias Tichy, Andrea Leitner, Jörgen Hansson

Industrielle Praxis modellbasierter Entwicklung im Bereich eingebetteter Systeme 37

Programming Languages and Type Systems

Tihomir Gvero, Viktor Kuncak, Ivan Kuraj, Ruzica Piskac

InSynth: A System for Code Completion using Types and Weights 39

Heather Miller, Philipp Haller

A Type-Based Foundation for Closure-Passing in the Age of Concurrency and Distribution..... 41

Zvonimir Pavlinovic, Tim King, Thomas Wies

Finding Minimum Type Error Sources 43

Luminous Fennell, Peter Thiemann

Gradual Typing for Annotated Type Systems 45

Static Analysis

Michael Pressler, Alexander Viehl, Oliver Bringmann, Wolfgang Rosenstiel

Fast Software Performance Evaluation for Embedded Hardware in Component-based Embedded Systems..... 47

Alexander von Rhein, Sven Apel <i>Strategies for Analyzing Configurable Systems</i>	49
Antonio Filieri, Corina Păsăreanu, Willem Visser, Jaco Geldenhuys <i>Statistical Symbolic Execution with Informed Sampling</i>	51
René Just, Michael D. Ernst, Gordon Fraser <i>Mutation Analysis for the Real World: Effectiveness, Efficiency, and Proper Tool Support</i>	53
Modeling 2 - Modeling and Software Product Lines	
Mahdi Derakhshanmanesh, Jürgen Ebert, Thomas Iguchi, Gregor Engels <i>Model-Integrating Software Components</i>	55
Thomas Thüm, Sven Apel, Christian Kästner, Ina Schaefer, Gunter Saake <i>Analysis Strategies for Software Product Lines: A Classification and Survey</i>	57
Clemens Dubsclaff <i>Advances in Quantitative Software Product Line Analysis</i>	59
Matthias Kowal, Ina Schaefer, Mirco Tribastone <i>Family-Based Performance Analysis of Variant-Rich Software Systems</i>	61
Comprehension	
Janet Siegmund, Sven Apel, Christian Kästner, Chris Parnin, Anja Bethmann, Gunter Saake, Thomas Leich, André Brechmann <i>Measuring Program Comprehension with Functional Magnetic Resonance Imaging</i> ...	63
Walid Maalej, Rebecca Tiarks, Tobias Röhm, Rainer Koschke <i>On the Comprehension of Program Comprehension</i>	65
Franz Zieris, Lutz Prechelt <i>On Knowledge Transfer Skill in Pair Programming</i>	67
Sebastian Baltes, Stephan Diehl <i>Sketches and Diagrams in Practice</i>	69
Verification	
Stephan Arlt, Sergio Feo Arenis, Andreas Podelski, Martin Wehrle <i>System Testing and Program Verification</i>	71
Dirk Beyer, Stefan Löwe <i>Interpolation for Value Analysis</i>	73

Dennis Felsing, Sarah Grebing, Vladimir Klebanov, Philipp Rümmer, Mattias Ulbrich	
<i>Automating Regression Verification</i>	75
René Just, Michael D. Ernst, Suzanne Millstein	
<i>Collaborative Verification of Information Flow for a High-Assurance App Store</i>	77
Modeling 3 - Variability	
Tanja Mayerhofer, Philip Langer, Gerti Kappel	
<i>Semantic Model Differencing Based on Execution Traces</i>	78
Thorsten Berger, Sarah Nadi	
<i>Variability Models in Large-Scale Systems: A Study and a Reverse-Engineering Technique</i>	80
Sandro Schulze, Ina Schaefer	
<i>Refactoring Delta-Oriented Software Product Lines</i>	82
Evolution	
Stefan Gärtner, Thomas Ruhroth, Jens Bürger, Kurt Schneider, Jan Jürjens	
<i>Towards Maintaining Long-Living Information Systems by Incorporating Security Knowledge</i>	83
Ingo Scholtes, Marcelo Serrano Zanetti, Claudio Juan Tessone, Frank Schweitzer	
<i>Automated Software Remodularization Based on Move Refactoring - A Complex Systems Approach</i>	85
Johannes Neubauer	
<i>Higher-Order Process Engineering in the context of Active Continuous Quality Control</i>	87
Synthesis	
Boris Duedder, Moritz Martens, Jakob Rehof	
<i>Staged Composition Synthesis</i>	89
Joel Greenyer, Christian Brenner, Maxime Cordy, Patrick Heymans, Erika Gressi	
<i>Incrementally Synthesizing Controllers from Scenario-Based Product Line Specifications</i>	91
Sebastian Erdweg, Tijs van der Storm, Yi Dai	
<i>Capture-Avoiding Program Transformations with name-fix</i>	93

Modeling 4 - Model Transformations

- Anthony Anjorin, Karsten Saller, Malte Lochau, Andy Schürr**
On Modularizing Triple Graph Grammars with Rule Refinement..... 95
- Daniel Strüber, Gabriele Taentzer**
Starting Model Development in Distributed Teams with Incremental Model Splitting . 97
- Christian Krause, Matthias Tichy, Holger Giese**
Implementing Graph Transformations in the Bulk Synchronous Parallel Model 99
- Alexander Bergmayr, Michael Grossniklaus, Manuel Wimmer, Gerti Kappel**
UML Profile Generation for Annotation-based Modeling..... 101

Testing 1

- Kim Herzig, Sascha Just, Andreas Zeller**
It's Not a Bug, It's a Feature: How Misclassification Impacts Bug Prediction 103
- Kim Herzig, Nachiappan Nagappan**
The Impact of Test Ownership and Team Structure on the Reliability, Effectiveness of Quality Test Runs 105
- Michael Pradel, Markus Huggler, Thomas Gross**
Performance Regression Testing of Concurrent Classes 107
- Michael Felderer, Armin Beer**
Requirements-based testing with defect taxonomies..... 108

Software Architecture and Specification

- Shahar Maoz, Jan Oliver Ringert, Bernhard Rumpe**
Verifying Component and Connector Models against Crosscutting Structural Views.... 110
- Antonio Filieri, Henr Hoffmann, Martina Maggio**
Automated Design of Self-Adaptive Software with Control-Theoretical Formal Guarantees 112
- Klaus-Benedikt Schultis, Christoph Elsner, Daniel Lohmann**
Architecture Challenges for Internal Software Ecosystems: A Large-Scale Industry Case Study..... 114
- Reinhard von Hanxleden, Björn Duderstadt, Insa Fuhrmann, Christian Motika, Steven Smyth, Michael Mendler, Joaquín Aguado, Stephen Loftus-Mercer, Owen O'Brien**
Sequential Constructiveness, SCCharts for Safety-Critical Applications 116

Software Analytics

- Anna Lanzaro, Roberto Natella, Stefan Winter, Domenico Cotroneo, Neeraj Suri**
Error models for the representative injection of software defects 118
- Patrick Rempel, Patrick Mäder, Tobias Kuschke, Jane Cleland-Huang**
Traceability Gap Analysis for Assessing the Conformance of Software Traceability to Relevant Guidelines 120
- Dominik Renzel, Ralf Klamma, Matthias Jarke**
Requirements Bazaar: Experiences, Added-Value and Acceptance of Requirements Negotiation between End-Users and Open Source Software Developers 122
- Walid Maalej, Swapneel Sheth**
Us and Them: A Study of Privacy Requirements Across North America, Asia, and Europe 124
- Andreas Vogelsang, Steffen Fuhrmann**
Why Feature Dependencies Challenge the Requirements Engineering of Automotive Systems: An Empirical Study 125
- Walter Binder, Yudi Zheng, Lubomir Bulej, Haiyang Sun, Petr Tuma**
Comprehensive Multi-Platform Dynamic Program Analysis for the Java and Dalvik Virtual Machines 127
- ## Testing 2
- Antonio Carzaniga, Alberto Goffi, Alessandra Gorla, Andrea Mattavelli, Nicolò Perino, Mauro Pezzè, Paolo Tonella**
Intrinsic software redundancy for self-healing software systems, automated oracle generation 129
- Michael Pradel, Parker Schuh, George Necula, Koushik Sen**
EventBreak: Analyzing the Responsiveness of User Interfaces through Performance-Guided Test Generation 131
- Andrea Arcuri, Gordon Fraser, Juan Pablo Galeotti**
Automatische Erzeugung von Unit Tests für Klassen mit Umgebungs-Abhängigkeiten . 132
- Kaituo Li, Christoph Reichenbach, Christoph Csallner, Yannis Smaragdakis**
Residual Investigation: Predictive and Precise Bug Detection 133
- Georg Püschel, Christian Piechnick, Uwe Aßmann**
Generative und simulative Softwaretests für selbst-adaptive, cyber-physikalische Systeme..... 135

Marcel Böhme, Soumya Paul <i>Über die Effizienz des Automatischen Testens</i>	136
Quality of Service	
Sören Frey, Florian Fittkau, Wilhelm Hasselbring <i>Optimizing the Deployment of Software in the Cloud</i>	138
Emitza Guzman, Walid Maalej <i>Do Users Like This Feature? A Fine Grained Sentiment Analysis of App Reviews</i>	140
Jons-Tobias Wamhoff, Stephan Diestelhort, Christoph Fetzer, Patrick Marlier, Pascal Felber, Dave Dice <i>The TURBO Diaries: Application-controlled Frequency Scaling Explained</i>	141
Martin Franz, Andreas Holzer, Stefan Katzenbeisser, Christian Schallhart, Helmut Veith <i>Compilation for Secure Two-Party Computations</i>	143
Eric Schmieders, Andreas Metzger, Klaus Pohl <i>Ein Laufzeitmodel-basierter Ansatz zur Datenschutz-Prüfung von Cloud-Systemen</i>	145
Irina Todoran, Norbert Seyff, Martin Glinz <i>How Do Cloud Providers Elicit Consumer Requirements?</i>	147
Software Engineering Ideas	
Vorwort.....	151
David Georg Reichelt, Johannes Schmidt <i>Performanzanalyse von Softwaresystemversionen: Methode und erste Ergebnisse</i>	153
Walter F. Tichy, Mathias Landhäußer, Sven J. Körner <i>nlpBENCH: A Benchmark for Natural Language Requirements Processing</i>	159
Andreas Kaufmann, Dirk Riehle <i>Improving Traceability of Requirements Through Qualitative Data Analysis</i>	165
Johannes Meißner, Frederik Schulz, Wilhelm Rossak <i>Analyse der sozialen Teamstruktur in Softwareprojekten</i>	171
Florian Lautenschlager, Andreas Kumlehn, Josef Adersberger, Michael Philippsen <i>Rahmenwerk zur Ausreißerererkennung in Zeitreihen von Software-Laufzeitdaten</i>	177
Wolfgang Golubski, Gerrit Beine <i>Der Software-Architekt und sein Unwissen</i>	183
Alexander Wachtel, Sebastian Weigelt, Philipp Voigt, Walter F. Tichy <i>Prototyp einer natürlichsprachlichen Schnittstelle für Tabellenkalkulation</i>	189

Christian Klauf <i>Towards API Usability Engineering as a Software Engineering Paradigm</i>	195
Patrik Feth, Thomas Bauer, Thomas Kuhn <i>Virtual Validation of Cyber Physical Systems</i>	201
Software & Systems Engineering Essentials	
Vorwort.....	209
Margit Fries, Herbert Dietrich <i>Integration der Normen zur Funktionalen Sicherheit in ein organisationsspezifisch angepasstes V-Modell XT und die Projektpraxis</i>	211
Schlomo Schapiro <i>Test Driven Infrastructure</i>	215
Tobias Baum <i>Leveraging pre-commit hooks for context-sensitive checklists: a case study</i>	219
Edward Fischer <i>Kompakte Anforderungsverfolgung in Modellen - ein Praxisbericht</i>	223
Technologietransferprogramm	
Vorwort zum Track Technologietransfer	229
Wolfgang Böhm, Maximilian Junker <i>Siemens Rail - Industrial Case Study: Model-based Development of a Train Guard MT Function</i>	231
Vincent Aravantinos, Kenji Miyamoto, Zaur Molotnikov, Nikolaus Regnat, Bernhard Schätz <i>Textual model-based software/system architecture documentation using MPS</i>	232
Michael Felderer, Armin Beer <i>Mutual knowledge transfer between industry and academia to improve testing with defect taxonomies</i>	238
Timm Bußhaus, Stefan Fischer, Franziska Kühn, Martin Leucker, Alexander Mildner, Malte Schmitz <i>Vom Forschungsprototypen zur industriellen Nutzung einer qualitätsgesicherten me- dizinischen Softwarekomponente - Technologietransfer im CMSSE</i>	243
Eugen Reischwich, Heinz Züllighoven <i>GeneAL - von einer Leitstandarchitektur zu innovativen Interaktionsformen</i>	249

Benjamin Nagel, Klaus Schröder, Steffen Becker, Stefan Sauer, Gregor Engels <i>Kooperative Methoden- und Werkzeugentwicklung zur Cloudmigration von proprietären Anwendungskomponenten</i>	255
--	-----

Startup-Programm

August-Wilhelm Scheer <i>Keynote: Tipps für Start-ups in der Industrie 4.0</i>	263
--	-----

Michael Würtenberger <i>Keynote: Changing Automotive Industrie</i>	264
--	-----

Workshops

Robert Heinrich, Reiner Jung, Marco Konersmann, Eric Schmieders <i>2nd Collaborative Workshop on Evolution and Maintenance of Long-Living Systems (EML)</i>	267
---	-----

Alexander Schlaefer, Sibylle Schupp <i>Fail Safety in Medical Cyber-Physical Systems (FS-MCPS)</i>	268
--	-----

Clemens Grellck, Baltasar Trancón Widemann <i>8. Arbeitstagung Programmiersprachen (ATPS 2015)</i>	269
--	-----

Ottmar Bender, Wolfgang Böhm, Frank Houdek, Stefan Henkler, Andreas Vogelsang, Thorsten Weyer <i>Fünfter Workshop zur Zukunft der Entwicklung softwareintensiver eingebetteter Sys- teme (ENVISION2020)</i>	271
---	-----

Ronald Scholz, Lars Martin <i>Eclipse Internet of Things (Eclipse IoT)</i>	273
--	-----

Tutorien

Antonio Barresi, Mathias Payer, Thomas Gross <i>Control-Flow Integrity</i>	277
--	-----

Markku Lammerz, Dennis Michielse <i>C# durch die Brille des Software-Entwicklers</i>	278
--	-----

Harry Sneed <i>Migrating to a Service-Oriented Architecture</i>	279
---	-----

Stefan Oehm, Moritz Eysholdt <i>Xtext - Werkzeugunterstützung für bestehende sowie eigene Sprachen einfach entwickeln</i>	280
---	-----

Doktorandensymposium

Vorwort.....	285
Felix Willnecker <i>Optimization of Component Allocations in Middleware Platforms using Performance Models</i>	287
Axel Busch <i>Automated Decision Support for Recurring Design Decisions Considering Non-Functional Requirements</i>	291
Mustafa Al-Hajjaji <i>Scalable Sampling and Prioritization for Product-Line Testing</i>	295
Oliver Norkus <i>Ein Ansatz zur Standardisierung von Business Intelligence in der Cloud</i>	299

Software Management

Andreas Spillner <i>Keynote: Pair - Requirements Engineering</i>	305
--	-----

Wissenschaftliches Programm

Requirements

Ursula Schmitt-Wagner, Alexander van der Vekens <i>Evolutionäre Entwicklung einer Web-Anwendung im kirchlichen Umfeld</i>	307
Jens Nerche <i>Ausführbare Spezifikationen im Projektalltag — Ein Erfahrungsbericht</i>	319
Roman Roelofsen, Stephan Wilczek <i>Markup-basiertes Spezifikations- und Anforderungsmanagement in agilen Softwareprojekten</i>	334

Test

Jan Düttmann, Stephan Kleuker <i>Gegenseitige Beeinflussungen von Testautomatisierung, Testmanagement und Entwicklung</i>	346
Anne Göthlich, Karin Eisenblätter, Michael Kroll, Johannes Schad, Heike Vocke <i>Ein generativer Ansatz für den automatisierten Software-Test</i>	362

Maximilian Azimi, Jens-Rainer Felske, Sebastian Lauber, Jan-Henrich Mattfeld, Pascal Schneider, Krischan Stapelfeldt, Timm Suhl, Nils Techau, Karin Vosseberg
Testautomatisierung Gute Qualität fällt nicht vom Himmel 378

Qualitätssicherung

Harry M. Sneed

Aufwandsschätzung der Softwarewartung und -evolution 386

Thomas Wolfenstetter, Jonas Zitzelsberger, Markus Böhm, Helmut Kremer

Traceability von Anforderungen und Tests in agilen Softwareentwicklungsprojekten.... 403

Jens Nerche

Erfahrungsbericht Datenbankbasierte Metrikverarbeitung für Clean Code Development in Brownfieldprojekten 419

IT-Management in Hochschulen

Meik Teßmer

Literate Programming zur Dokumentation in der Systemadministration 433

Gunnar Auth

Prozessorientierte Anforderungsanalyse für die Einführung integrierter Campus-Management-Systeme 446

Ivonne Erfurth, Christian Erfurth

Requirements Engineering aus Sicht von Hochschulrechenzentren – Analyse und Entwurf von IT-Diensten an Hochschulen 462

Ronny Kaiser, Georg Püschel, Sebastian Götz, Katrin Kahle, Uwe Aßmann

Von der Software-Dissertation zum Lean Startup..... 470

Tutorials

Harry M. Sneed

Test-Driven Requirements Management 484

Jens Nerche

Ausführbare Spezifikationen mit der Language Workbench MPS..... 485
