Also by Pete Goodliffe	xi
Introduction	xiii
1. Care About the Code	1
<i>Adopting the correct approach and attitude to code</i>	
<hr/>	
Part I. you.write(code);	
2. Keeping Up Appearances	7
<i>Code presentation: layout and naming</i>	
3. Write Less Code!	17
<i>Avoiding unnecessary lines of code</i>	
4. Improve Code by Removing It	29
<i>Identifying and removing dead code</i>	
5. The Ghost of a Codebase Past	37
<i>Learning from the code you wrote in the past</i>	
6. Navigating a Route	45
<i>How to start working with unfamiliar code</i>	
7. Wallowing in Filth	55
<i>Dealing with unpleasant, messy code</i>	
8. Don't Ignore That Error!	63
<i>Healthy attitudes for error handling</i>	

9. Expect the Unexpected.	69
<i>Writing robust code that considers all possibilities</i>	
10. Bug Hunting.	75
<i>How to find and fix bugs</i>	
11. Testing Times.	87
<i>Developer testing: unit, integration, and system tests</i>	
12. Coping with Complexity.	103
<i>Designing code well, to avoid unnecessary complexity</i>	
13. A Tale of Two Systems.	113
<i>The consequences of good and bad design</i>	

Part II. Practice Makes Perfect

14. Software Development Is.	131
<i>What is this software stuff?</i>	
15. Playing by the Rules.	141
<i>Inventing rules that define your development team</i>	
16. Keep It Simple.	145
<i>Striving for simplicity in our software</i>	
17. Use Your Brain.	153
<i>Programmers are allowed and encouraged to use their brain; don't be stupid!</i>	
18. Nothing Is Set in Stone.	157
<i>No code is sacred, everything changes</i>	
19. A Case for Code Reuse.	165
<i>The healthy way to reuse code</i>	
20. Effective Version Control.	171
<i>Using version control well</i>	

21. Getting One Past the Goalpost.	183
<i>Working effectively with the QA team</i>	
22. The Curious Case of the Frozen Code.	195
<i>Code freeze: what it is, and whether it is necessary</i>	
23. Please Release Me.	203
<i>Making software releases</i>	

Part III. Getting Personal

24. Live to Love to Learn.	215
<i>How to learn effectively</i>	
25. Test-Driven Developers.	225
<i>Driving as an analogy to programming: how do we learn and pass the test?</i>	
26. Relish the Challenge.	231
<i>How to find the right challenges to stay motivated and keep your skills sharp</i>	
27. Avoid Stagnation.	237
<i>Preventing your programming skills from going stale</i>	
28. The Ethical Programmer.	243
<i>Ethical issues in the developer's life</i>	
29. A Love for Languages.	253
<i>Learning many programming languages and loving the ones you use</i>	
30. Posturing Programmers.	261
<i>Improving the programmer's health: posture, eye strain, and keeping your spirits up</i>	

Part IV. Getting Things Done

31. Smarter, Not Harder.	273
<i>Working effectively: avoiding unnecessary work and solving the right problems</i>	
32. It's Done When It's Done.	283
<i>Defining your programming tasks and knowing exactly when you're done</i>	

33. This Time I've Got It.....	291
<i>Avoiding a narrow focus: find the best way to solve a problem</i>	
<hr/>	
Part V. The People Pursuit	
34. People Power.....	299
<i>How to position yourself alongside excellent programmers, and how to work well in a team</i>	
35. It's the Thought That Accounts.....	305
<i>Accountability: how it improves you and your work</i>	
36. Speak Up!.....	313
<i>Communication skills for the software developer</i>	
37. Many-festos.....	323
<i>Software manifestos: what and why?</i>	
38. An Ode to Code.....	329
<i>A cautionary tale of software mismanagement</i>	
Epilogue.....	333
Index.....	337
