# Contents

<b>I. Hyperbolic Geometry</b>	
<i>Aline Aigon-Dupuy, Peter Buser, Klaus-Dieter Semmler</i> .....	1
<b>II. Selberg's Trace Formula: An Introduction</b>	
<i>Jens Marklof</i> .....	83
<b>III. Semiclassical Approach to Spectral Correlation Functions</b>	
<i>Martin Sieber</i> .....	121
<b>IV. Transfer Operators, the Selberg Zeta Function and the Lewis-Zagier Theory of Period Functions</b>	
<i>Dieter H. Mayer</i> .....	143
<b>V. On the Calculation of Maass Cusp Forms</b>	
<i>Dennis A. Hejhal</i> .....	175
<b>VI. Maass Waveforms on <math>(\Gamma_0(N), \chi)</math> (Computational Aspects)</b>	
<i>Fredrik Strömberg</i> .....	187
<b>VII. Numerical Computation of Maass Waveforms and an Application to Cosmology</b>	
<i>Ralf Aurich, Frank Steiner, Holger Then</i> .....	229
<b>Index</b> .....	271
