CHAPTER 1

Introduction 1

1.1 Theories of coarticulation and the degree of articulatory constraint model 1

1.2 Segmental articulation and coarticulation: General concepts 6

1.2.1 Articulatory constraints for vowels and consonants 6

1.2.2 Coarticulatory sensitivity, aggressiveness and directionality 8

1.3 Segmental insertion and elision 10

1.4 Assimilation and dissimilation 11

1.5 Organization of the monograph 14

1.6 Background information on the Romance languages 14

1.6.1 Languages and dialects 14

1.6.2 Evolution of Latin linguistic sounds into Romance 16

CHAPTER 2

Consonant-dependent processes involving target vocalic segments 19

2.1 Articulatory and coarticulatory characteristics of consonants 19

2.1.1 Alveolars [t̪] and [r], and the bilabiovelar [w] 20

2.1.1.1 Typology and syllabic allophones 20

2.1.1.2 Production 21

2.1.1.3 Coarticulation 23

2.1.2 (Alveolo)palatals, palatalized consonants and velars 24

2.1.2.1 Production 24

2.1.2.2 Coarticulation 25

2.1.3 Dentals and clear alveolars 26

2.1.4 Labial and nasal consonants 27

2.2 Segmental insertion and elision 28

2.2.1 General considerations 28

2.2.1.1 Glide insertion and elision mechanisms 28

2.2.1.2 Glide insertion and segmental complexity 32

2.2.1.3 Vowel insertion and elision mechanisms 34

2.2.2 Glide insertion and elision processes 35
2.2.2.1 Alveolars [ɬ] and [r], and the bilabiovelar [w] 35
2.2.2.2 (Alveolo)palatals and palatalized consonants 38
2.2.2.3 Dentals and alveolars 41
2.2.2.4 Velars 43
2.2.2.5 Labials 46
2.2.2.6 Nasalized vowels 47
2.2.3 Vowel insertion and elision processes 52
2.2.3.1 Word-initial position 52
2.2.3.2 Word-final position 54
2.2.3.3 Word-medial position 55
2.2.4 Summary 63
2.2.4.1 Glide insertion and elision 64
2.2.4.2 Vowel insertion and elision 65
2.2.4.3 Towards a reinterpretation of vowel diphthongization processes in Romance 66
2.3 Assimilation and dissimilation 67
2.3.1 Database of the analysis 68
2.3.2 Assimilation 73
2.3.2.1 Alveolar lateral [ɬ] and trill [r] 73
2.3.2.2 (Alveolo)palatals 78
2.3.2.3 Dentals and alveolars 81
2.3.2.4 Velars 84
2.3.2.5 Labials 84
2.3.2.6 Nasality 87
2.3.3 Dissimilation 91
2.3.3.1 Back consonants and labials 91
2.3.3.2 (Alveolo)palatals 94
2.3.4 Summary 95
2.3.4.1 Assimilatory and dissimilatory direction 95
2.3.4.2 Word position 99
2.3.4.3 Interactive contextual effects 100

CHAPTER 3
Vowel-dependent processes 105
3.1 Articulatory and acoustic properties of vowels 105
3.2 Consonant insertion and elision 106
3.2.1 Alveolar lateral [ɬ] 109
3.2.2 (Alveolo)palatal consonants 110
3.2.2.1 Insertion 110
3.2.2.2 Elision 113

3.2.3 Velar consonants 114
3.2.3.1 Insertion 114
3.2.3.2 Elision 117
3.2.4 Labial consonants 117
3.2.4.1 Insertion 117
3.2.4.2 Elision 120
3.2.5 Nasal consonants 120
3.2.5.1 Contextual insertion 120
3.2.5.2 Spontaneous insertion 121
3.3 Assimilation and dissimilation (V-to-C) 123
3.3.1 Labialization 123
3.3.2 Velarization 126
3.3.3 Dentalization and alveolarization 127
3.3.4 Palatalization 127
3.3.4.1 Labials 127
3.3.4.2 Dentals and alveolars 128
3.3.4.3 Velars 131
3.3.5 Manner of articulation 132
3.4 Assimilation and dissimilation (V-to-V) 133
3.4.1 Assimilation 134
3.4.1.1 Mid vowel raising 134
3.4.1.2 Low vowel raising 135
3.4.1.3 Front vowel lowering 136
3.4.1.4 Vowel backing and rounding 137
3.4.1.5 Back rounded vowel fronting and unrounding 137
3.4.2 Dissimilation 138
3.4.2.1 Vowel raising 138
3.4.2.2 Vowel lowering 138
3.4.2.3 Back rounded vowel fronting and unrounding 139
3.5 Summary 139
3.5.1 Consonant insertion and elision 139
3.5.2 Consonant replacement 141
3.5.3 Vowel assimilation and dissimilation 142

CHAPTER 4
Consonant-dependent processes involving target consonants 145
4.1 Consonant insertion and elision 145
4.1.1 Insertion 145
4.1.1.1 Word-final consonants 145
4.1.1.2 CV and VC sequences 146
4.1.1.3 Consonant clusters 147

4.1.2 Elision 151
4.1.2.1 Syllable-initial consonant clusters 151
4.1.2.2 Heterosyllabic two-consonant clusters 155
4.1.2.3 Word-final clusters 157
4.1.2.4 Three-consonant clusters 158
4.2 C-to-C adaptation processes 160
4.2.1 Place of articulation 161
4.2.1.1 Independent articulators 161
4.2.1.2 Adjacent articulators 163
4.2.2 Manner of articulation 165
4.2.2.1 Voicing 165
4.2.2.2 Nasality 166
4.2.2.3 Laterality and rhoticity 167
4.2.2.4 Lenition 168
4.2.2.5 Generalized assimilation 169
4.3 Summary 170
4.3.1 Insertions and elisions 170
4.3.1.1 Gestural and acoustic similarity 170
4.3.1.2 Gestural incompatibility 171
4.3.2 Adaptation processes 171

CHAPTER 5
General discussion 173
5.1 Sound change mechanisms 173
5.2 Regressive and progressive direction of sound changes 176
5.3 Stress and word position 180
5.4 Interactive role of vowels and consonants 180
5.5 Predicting sound change patterns in other language families 181

CHAPTER 6
Conclusions and outlook 183
