Contents

Preface to Second Edition xi

1 Introduction 1
- 1.1 How Visualization Works . . . 3
- 1.2 Positioning in the Field . . . 12
- 1.3 Book Structure . . . 15
- 1.4 Notation . . . 18
- 1.5 Online Material . . . 18

2 From Graphics to Visualization 21
- 2.1 A Simple Example . . . 22
- 2.2 Graphics-Rendering Basics . . . 28
- 2.3 Rendering the Height Plot . . . 30
- 2.4 Texture Mapping . . . 36
- 2.5 Transparency and Blending . . . 39
- 2.6 Viewing . . . 43
- 2.7 Putting It All Together . . . 47
- 2.8 Conclusion . . . 50

3 Data Representation 53
- 3.1 Continuous Data . . . 53
- 3.2 Sampled Data . . . 57
- 3.3 Discrete Datasets . . . 66
- 3.4 Cell Types . . . 67
- 3.5 Grid Types . . . 74

3.6 Attributes 81
3.7 Computing Derivatives of Sampled Data 96
3.8 Implementation 100
3.9 Advanced Data Representation 111
3.10 Conclusion 120

4 The Visualization Pipeline 123
4.1 Conceptual Perspective 123
4.2 Implementation Perspective 136
4.3 Algorithm Classification 144
4.4 Conclusion 145

5 Scalar Visualization 147
5.1 Color Mapping 147
5.2 Designing Effective Colormaps 149
5.3 Contouring 163
5.4 Height Plots 176
5.5 Conclusion 181

6 Vector Visualization 183
6.1 Divergence and Vorticity 184
6.2 Vector Glyphs 188
6.3 Vector Color Coding 196
6.4 Displacement Plots 200
6.5 Stream Objects 203
6.6 Texture-Based Vector Visualization 223
6.7 Simplified Representation of Vector Fields 234
6.8 Illustrative Vector Field Rendering 250
6.9 Conclusion 252

7 Tensor Visualization 253
7.1 Principal Component Analysis 254
7.2 Visualizing Components 259
7.3 Visualizing Scalar PCA Information 259
7.4 Visualizing Vector PCA Information 263
7.5 Tensor Glyphs 266
7.6 Fiber Tracking 269
7.7 Illustrative Fiber Rendering 274

7.8 Hyperstreamlines 280
7.9 Conclusion 283

8 Domain-Modeling Techniques 285
8.1 Cutting 285
8.2 Selection 290
8.3 Grid Construction from Scattered Points 292
8.4 Grid-Processing Techniques 312
8.5 Conclusion 324

9 Image Visualization 327
9.1 Image Data Representation 327
9.2 Image Processing and Visualization 329
9.3 Basic Imaging Algorithms 330
9.4 Shape Representation and Analysis 345
9.5 Conclusion 402

10 Volume Visualization 405
10.1 Motivation 406
10.2 Volume Visualization Basics 409
10.3 Image Order Techniques 422
10.4 Object Order Techniques 428
10.5 Volume Rendering vs. Geometric Rendering 430
10.6 Conclusion 432

11 Information Visualization 435
11.1 What Is Infovis? 436
11.2 Infovis vs. Scivis: A Technical Comparison 438
11.3 Table Visualization 446
11.4 Visualization of Relations 452
11.5 Multivariate Data Visualization 505
11.6 Text Visualization 532
11.7 Conclusion 547

12 Conclusion 549

Visualization Software 555
A.1 Taxonomies of Visualization Systems 555
A.2 Scientific Visualization Software 557
A.3 Imaging Software 561

A.4 Grid Processing Software 566
A.5 Information Visualization Software 569

Bibliography 575

Index 599
