

Table of Contents	Page
1 Introduction.....	5
1.1 Problem Definition.....	5
1.2 Objectives	6
1.3 Approach.....	7
2 Problem Analysis.....	9
2.1 Definition of Terms and Classification of the Work.....	9
2.2 Driving Simulators	10
2.2.1 Early History of Driving Simulators.....	10
2.2.2 Driving Simulators Application Fields	12
2.2.3 Driving Simulators' Classification and Guidelines	13
2.2.4 Driving Simulators' Structures and components.....	15
2.3 Mechatronic Systems.....	17
2.3.1 Development of Mechatronic Systems.....	18
2.3.2 Specification Techniques of Mechatronic Systems	20
2.3.3 Reconfigurable Mechatronic Systems.....	22
2.4 Advanced Driver Assistance Systems.....	23
2.4.1 ADAS Development Process	26
2.4.2 Using Driving Simulators in ADAS Development	28
2.5 Problem Description.....	29
2.6 Reconfigurable driving simulator definition.....	30
2.7 Requirements of the Design Framework.....	31
2.7.1 Requirements of the procedure model	31
2.7.2 Requirements of the reconfigurable driving simulator	32
2.7.3 Requirements of the configuration software tool	32
3 State of the Art.....	35
3.1 The Driving Simulators Selection Method according to NEGELE.....	35
3.2 Existing Low-Level Driving Simulators	38
3.2.1 A Modular Architecture based on the FDMU Approach	38
3.2.2 QuadDS and HexDS Driving Simulators	40
3.3 Existing Mid-Level Driving Simulators.....	41
3.3.1 The Heinz Nixdorf Institute – ATMOS Driving Simulator	42
3.3.2 The University of Central Florida Driving Simulator.....	43
3.4 Existing High-Level Driving Simulators	44

2.7 Requirements of the Design Framework.....	31
2.7.1 Requirements of the procedure model	31
2.7.2 Requirements of the reconfigurable driving simulator	32
2.7.3 Requirements of the configuration software tool	32
3 State of the Art.....	35
3.1 The Driving Simulators Selection Method according to NEGELE	35
3.2 Existing Low-Level Driving Simulators	38
3.2.1 A Modular Architecture based on the FDMU Approach	38
3.2.2 QuadDS and HexDS Driving Simulators	40
3.3 Existing Mid-Level Driving Simulators	41
3.3.1 The Heinz Nixdorf Institute – ATMOS Driving Simulator	42
3.3.2 The University of Central Florida Driving Simulator.....	43
3.4 Existing High-Level Driving Simulators	44

3.4.1	VTI Sim IV Driving Simulator.....	45
3.4.2	Daimler Full-Scale Driving Simulator.....	46
3.5	The National Advanced Multi-Level Driving Simulators.....	47
3.6	Call for Action.....	50
3.7	The Solution Approach.....	53
4	A Design Framework for Developing a Reconfigurable Driving Simulator ..	55
4.1	Case Study – HNI Existing Driving Simulators	57
4.1.1	Case Study Variants	57
4.1.2	Case Study Objectives.....	60
4.2	Procedure Model Overview	60
4.3	Phase 1 – Driving Simulator System Specification.....	63
4.3.1	CONSENS Work Flow for a Reconfigurable Driving Simulator ..	63
4.3.2	Environment.....	65
4.3.3	Application Scenarios.....	66
4.3.4	Requirements.....	68
4.3.5	Functions	68
4.3.6	Active Structure.....	69
4.3.7	CONSENS Enhancement for the Design Framework	72
4.4	Phase 2 – System Components Identification.....	76
4.4.1	Identification of Driving Simulator Components.....	76
4.4.2	Classification of the Identified Components	78
4.4.3	Description of the Identified Components	79
4.5	Phase 3 – Configuration Mechanism Development	80
4.5.1	Consistency Check Algorithm	81
4.5.2	Compatibility Check Algorithm	84
4.5.3	Configuration mechanism sequence	87
4.6	Phase 4 – Solution Elements Deployment.....	88
4.6.1	Identify and Classify Solution Elements	88
4.6.2	Filling the Solution Elements Database.....	89
4.7	Phase 5 – Driving Simulator Variant Generation.....	92
4.7.1	Configuration Selection Sequence	92
4.7.2	Configuration Files and Error Reports Structure	95
4.7.3	Physical Connections Plan.....	95
4.8	Phase 6 – System Preparation for Operation.....	96
4.8.1	Hardware Setup Preparation.....	96
4.8.2	Simulation Software Preparation.....	97
4.8.3	Communication during the Simulation Run-time	97
5	Implementation Prototype and Validation	99

5.1	The Configuration Tool.....	99
5.1.1	The Configuration Tool's Main Operations.....	100
5.1.2	The Configuration Tool's Architecture	101
5.1.3	The Configuration Tool's Implementation Prototype	102
5.2	Design Framework Validation	104
5.2.1	Validation Example: ADAS Reconfigurable Driving Simulator..	104
5.2.2	Phase 1 – System Specification of Driving Simulator.....	105
5.2.3	Phase 2 – Main Components Identification.....	111
5.2.4	Phase 3 – Configuration Mechanism Development	114
5.2.5	Phase 4 – Solution Elements Deployment.....	115
5.2.6	Phase 5 – Driving Simulator Variant Generation.....	115
5.2.7	Phase 6 – System Preparation for Operation.....	119
5.3	The Created Variants with the Help of the Design Framework.....	120
5.3.1	Configuration 1 – TRAFFIS-Full	121
5.3.2	Configuration 2 – TRAFFIS-Portable	122
5.3.3	Configuration 3 – TRAFFIS-Light.....	124
5.4	The Design Framework Validation based on the Requirements	125
6	Summary and Outlook.....	129

Appendix

Contents	Page
A1 Amendments to the Design Framework (Chapter 4)	A-3
A1.1 Specification Results of the Case Study – Variant 2	A-3
A1.1.1 The Environment Model of the Variant 2.....	A-3
A1.1.2 The Application Scenarios of Variant 2	A-4
A1.1.3 The Functions Hierarchy of Variant 2.....	A-4
A1.1.4 The Active Structure of Variant 2	A-5
A1.2 The Consistency Matrix of the Case Study	A-7
A2 Amendments to the Implementation and Validation (Chapter 5)	A-9
A2.1 Configuration Tool – Main Operations.....	A-9
A2.2 Configure New System	A-10
A2.3 Add New Component.....	A-19
A2.4 Add New Solution Element.....	A-20

A2.5 Load Configuration File A-21

A2.6 View Components and Solution Elements A-21
