

Contents

Notation	xiii
Introduction	xix
1 The Kashiwara-Vergne Method for Lie Groups	1
1.1 A General Convolution Problem	1
1.2 The Kashiwara-Vergne Method	3
1.3 The Equation (KV1)	4
1.4 The Equation (KV2)	8
1.5 The Kashiwara-Vergne Conjecture	10
1.5.1 The Conjecture	10
1.5.2 Remarks on the Conjecture	11
1.5.3 Non-uniqueness	15
1.6 An Elementary Proof for $sl(2, \mathbb{R})$	16
1.6.1 Choice of F and G	17
1.6.2 A Variant of (KV2)	18
1.6.3 A Trace Formula for $sl(2, \mathbb{R})$	19
1.6.4 Proof of (KV2)	19
1.7 Two Symmetries of the Kashiwara-Vergne Problem	22
1.7.1 The Symmetry α	23
1.7.2 The Symmetry β	23
1.7.3 Symmetry Invariant Solutions	27
1.8 From (KV1) Towards (KV2)	28
1.8.1 Tangential Derivations and Automorphisms	29
1.8.2 Behavior Under Scaling Maps	31
1.8.3 Using Associativity	32
1.8.4 A “Divergence” and a “Jacobian”	33
1.8.5 A Cohomology Argument	36
1.8.6 An Expression of the Divergence	38
1.8.7 Conclusion	39

1.9	The Case of Quadratic or Solvable Lie Algebras	42
1.10	The General Case	46
1.10.1	An Abstract Formulation of the Kashiwara-Vergne Problem	46
1.10.2	Drinfeld's Associators and the Kashiwara-Vergne Conjecture	47
	Notes	48
2	Convolution on Homogeneous Spaces	51
2.1	Definition and Examples	51
2.2	Extension to Line Bundles	54
2.2.1	The Line Bundle L_χ	54
2.2.2	Convolution of Distributions on L_χ	55
	Notes	56
3	The Role of e-Functions	57
3.1	Transferring Convolutions	58
3.1.1	The Transfer Map	58
3.1.2	e -Functions	60
3.2	Special Symmetric Spaces	63
3.3	e -Functions and Invariant Differential Operators	68
3.3.1	The Fischer Product	68
3.3.2	Explicit Transfer of Invariant Differential Operators	69
3.3.3	Example: The Laplace-Beltrami Operator	73
3.3.4	Towards a Generalized Duflo Isomorphism	77
3.4	e -Functions, Mean Values and Spherical Functions	79
3.4.1	The Case of an Isotropic Riemannian Symmetric Space	79
3.4.2	Expansion of Mean Value Operators and Spherical Functions	82
3.5	e -Functions and Integral Formulas	86
3.6	e -Functions and Noncompact Symmetric Spaces	91
3.6.1	The Function e_∞	91
3.6.2	Link with the Iwasawa Projection	96
3.6.3	Extension of Duflo's Isomorphism	99
3.7	An e -Function for Symmetric Spaces of Rank One	105
3.7.1	Outline of the Proof	107
3.7.2	Properties of the Rank One e -Function	108
3.7.3	Application to Spherical Functions	112
3.8	Extension to Line Bundles	113
3.9	Open Problems	116
	Notes	116

4	<i>e</i>-Functions and the Campbell-Hausdorff Formula	119
4.1	Contractions of Symmetric Spaces	120
4.2	The Diffeomorphism Φ	122
4.2.1	Lie Series	122
4.2.2	\mathcal{O}, Z, h	123
4.2.3	A, B, C	127
4.2.4	a, b and Φ	131
4.2.5	c, h and Φ	133
4.3	Campbell-Hausdorff <i>e</i> -Functions	137
4.3.1	An Auxiliary Lemma	137
4.3.2	Construction of an <i>e</i> -Function	138
4.3.3	Application to Invariant Differential Operators	142
4.4	Properties of Campbell-Hausdorff <i>e</i> -Functions	145
4.4.1	<i>e</i> and <i>c</i>	146
4.4.2	Some Deeper Properties of <i>e</i>	147
4.5	Extension to Line Bundles	157
4.6	Taylor Expansions	160
4.6.1	Expansions of Z, h, A, B, C	161
4.6.2	Expansion of Φ	162
4.6.3	Expansions of <i>e</i> and e_χ	163
4.6.4	Expansions of Z, h, A, C Modulo Y^2	166
4.6.5	Expansion of Φ Modulo Y^2	171
4.6.6	Expansions of <i>e</i> and e_χ Modulo Y^2	172
4.7	Open Problems	174
	Notes	175
A	Proof of Lemma 3.22	177
B	Proof of Theorem 3.23	181
	Bibliography	191
	Index	195
