|   |     |
|---|-----|
| <b>Preface .....</b>  | vii |
| <b>1 The Basics .....</b>   | 1   |
| 1.1 Background .....  | 1   |
| 1.2 Homotopy .....  | 2   |
| 1.3 Exercises .....   | 4   |
| <b>2 The Fundamental Group .....</b>                                  | 5   |
| 2.1 Definition and Basic Properties .....                             | 5   |
| 2.2 Covering Spaces .....   | 8   |
| 2.3 van Kampen's Theorem and Applications .....                       | 13  |
| 2.4 Applications to Free Groups .....                                 | 15  |
| 2.5 Free Homotopy Classes .....                                       | 19  |
| 2.6 Some "Bad" Spaces .....   | 20  |
| 2.7 Exercises .....   | 21  |
| <b>3 Generalized Homology Theory .....</b>                            | 23  |
| 3.1 The Eilenberg-Steenrod Axioms .....                               | 23  |
| 3.2 Consequences of the Axioms .....                                  | 25  |
| 3.3 Axioms for Cohomology and Their Consequences .....                | 30  |
| 3.4 Exercises .....   | 32  |
| <b>4 Ordinary Homology Theory .....</b>                               | 35  |
| 4.1 Homology Groups of Spheres, and Some Classical Applications ..... | 35  |
| 4.2 CW-Complexes and Cellular Homology .....                          | 38  |
| 4.3 Real and Complex Projective Spaces .....                          | 49  |
| 4.4 Exercises .....   | 52  |
| <b>5 Singular Homology Theory .....</b>                               | 55  |
| 5.1 Development of the Theory .....                                   | 55  |
| 5.2 The Geometric Meaning of $H_0$ and $H_1$ .....                    | 61  |
| 5.3 Homology with Coefficients .....                                  | 66  |
| 5.4 The Künneth Formula .....   | 69  |

|          |   |            |
|----------|---|------------|
| 5.5      | Cohomology .....                                      | 72         |
| 5.6      | Cup and Cap Products.....                             | 80         |
| 5.7      | Some Applications of the Cup Product.....             | 89         |
| 5.8      | Exercises .....                                       | 92         |
| <b>6</b> | <b>Manifolds .....</b>                                | <b>95</b>  |
| 6.1      | Definition and Examples .....                         | 95         |
| 6.2      | Orientations.....                                     | 97         |
| 6.3      | Examples of Orientability and Nonorientability .....  | 107        |
| 6.4      | Poincaré and Lefschetz Duality and Applications ..... | 112        |
| 6.5      | Exercises .....                                       | 125        |
| <b>7</b> | <b>Homotopy Theory.....</b>                           | <b>127</b> |
| 7.1      | Definitions and Basic Properties.....                 | 127        |
| 7.2      | Further Results.....                                  | 131        |
| 7.3      | Exercises .....                                       | 137        |
| <b>A</b> | <b>Elementary Homological Algebra.....</b>            | <b>139</b> |
| A.1      | Modules and Exact Sequences .....                     | 139        |
| A.2      | Chain Complexes .....                                 | 142        |
| A.3      | Tensor Product, Hom, Tor, and Ext .....               | 147        |
| <b>B</b> | <b>Bilinear Forms .....</b>                           | <b>151</b> |
| B.1      | Definitions .....                                     | 151        |
| B.2      | Classification Theorems.....                          | 153        |
| <b>C</b> | <b>Categories and Functors .....</b>                  | <b>155</b> |
| C.1      | Categories.....                                       | 155        |
| C.2      | Functors .....  | 156        |
|          | <b>Bibliography .....</b>                             | <b>159</b> |
|          | <b>Index.....</b>                                     | <b>161</b> |
