

CONTENTS

LIST OF FIGURES	<i>page</i> xix
1. SOURCES OF INFORMATION	1
The structural aspects of medieval building, and the contemporary sources of possible information about its execution.	
2. CONSTRUCTIONAL MEANS	9
The multiple nature and scope of the falsework requirements—scaffolding, shoring, formwork, and centering—with some provisionally assumed solutions.	
3. MEDIEVAL TYPES OF VAULTING	42
An analysis of the chief structural developments in medieval times: problems, innovations, and solutions.	
4. GOTHIC FORMWORK	86
The significance of the rib. An assessment of what others have written on the nature and extent of the formwork used in Gothic vaulting, together with a possible solution of the formwork problem.	
5. GOTHIC CENTERING	123
An analysis of the centering problem in Gothic vaulting, along with the types of falsework employed as support for the centering.	
6. ERECTION OF RIB VAULTING WITHOUT FORMWORK	175
Systems of construction that dispense with falsework. The Gothic system of vault erection without formwork. Summary review of the erectional sequence and procedures in French Gothic rib-vaulted churches.	
NOTES AND COMMENTS	197
APPENDIXES	
A. <i>An Annotated Bibliography of Falsework Literature</i>	241
B. <i>The Occurrence of Putlog Holes and the Location and Extent of the Scaffolding They Reveal</i>	248
C. <i>Passageways in Lincoln Cathedral</i>	253
