1 The Origin of the Idea of “Law of Nature”	1
Naturality and Normativity: The Role of Technology in the Transformation of our Metaphors about Nature	2
The Laws of Nature and the Divine Order of the World in Ancient Thought	6
The Controversial Medieval Origins of the Idea of Law of Nature: Jane Ruby’s Thesis	11
The Notion of the Law of Nature in the Seventeenth Century: The Role of the “Other” Bacon	15
The Theological-Realistic Conception of Laws in the 1600s	18
The Conventionalistic and Analogical Interpretation of the Laws of Nature	25
The Completion of the Revolution: Newton and Beyond	27
2 Why are Laws of Nature Mathematical?	31
The “Unreasonable Effectiveness of Mathematics” in Describing, Explaining and Predicting the Physical World	31
The Three Ingredients for “Producing” the Laws of Physics	35
The Algorithmic View of Laws as a First Attempt to Explain Why the Laws of Physics are Mathematical	36
The Reducibility of the Laws of Coexistence to the Laws of Succession	44
Measurement as a Necessary Premise for the Mathematization of Laws	50
An Explicative Hypothesis on the Applicability of Mathematics	59
3 The Reducibility of the Laws of Nature	66
The Conceptual Geography of the Notion of “Law of Nature”	66
Laws, Predictions, and Regularities	68
Laws and Universality	72
The Spatio-Temporal Universality of Laws	72
Universality as Determinism	76
Universality as Absence of “ <i>Ceteris Paribus</i> ” Clauses	77
Laws and Truth: the Violation of a Fourth Meaning of Universality	79
Laws and Necessity	81
Laws and Causality	82
Laws and Counterfactual Conditionals	83
Laws and Scientific Explanations	85
Laws and Symmetry	86

Is the Concept of Law Irreducible?	88
4 What is a Law of Nature?	90
Mill-Ramsey-Lewis' Neoregularism	90
Further Difficulties of MRL's Neoregularism	93
Armstrong, Dretske and Tooley's Necessitarianism	97
Necessitarianism Founded on the Essential Properties of Bodies	104
Essences, Natural Kinds, and Species-Specific Biological Laws	106
More on the Problem of the Supervenience of Laws	109
Laws of Nature, Dispositions, and Natural Kinds	110
Could Dispositionalism be a Solution to the Problem of the Nature of Laws?	112
5 Laws and the Special Sciences	118
Natural Selection, Models and Invariant Scale-Phenomena in Living Beings	119
Psychological Laws, Psychophysical Laws, and Human Freedom	125
Mental Causation and the Mind as a Set of Dispositions	130
Laws in Economics and the Social Sciences	133
Conclusion	137
