

Contents

<i>Preface</i>	v
Moduli of continuity, isoperimetric profiles, and multi-point estimates in geometric heat equations BEN ANDREWS	1
Rigidity and minimizing properties of quasi-local mass PO-NING CHEN AND MU-TAO WANG	49
Lojasiewicz inequalities and applications TOBIAS HOLCK COLDING AND WILLIAM P. MINICOZZI II	63
The regularity of solutions in degenerate geometric problems PANAGIOTA DASKALOPOULOS	83
Algebraic families of constant scalar curvature Kähler metrics SIMON DONALDSON	111
Hermitian-Yang-Mills connections and beyond JUN LI	139
Interior a priori estimates for the Monge-Ampère equation JIAKUN LIU AND XU-JIA WANG	151
Dispersive geometric curve flows CHUU-LIAN TERNG	179
Regularity of stable minimal hypersurfaces: recent advances in the theory and applications NESHAN WICKRAMASEKERA	231
