Preface

I

Prolegomena

1. Obstacles to a Science of Interpersonal Relationships	3
Summary	12
2. What Do We Mean by a Relationship?	14
Relationships as sequences of interactions	15
Affective/cognitive aspects	22
Dynamic aspects of relationships	35
Relationships and the concept of attachment	35
Formal versus personal relationships	37
Summary	38
3. The Nature and Aims of Description	40
Summary	45

II

Categories of Dimensions

4. Content and Diversity of Interactions	49
Content of interactions	49
Diversity of interactions	53
Summary	54
5. Qualities of Interactions	55
The problem of measurement	56
Extent of generality of qualities	64
Content and quality	65
Summary	69

6. Relative Frequency and Patterning of Interactions	70
Summary and conclusion	77
7. Similarity versus Difference; Reciprocity versus Complementarity	79
Reciprocity versus complementarity	79
Similarities versus differences in personal characteristics	81
Similarity	82
Complementarity	101
Conclusion and summary	110
8. Intimacy	113
Intimacy	114
Summary	118
9. Interpersonal Perception	119
Misperceiving others	120
Assessing interpersonal perception	121
Personal construct analysis	126
Conclusion and summary	130
10. Commitment	131
Summary	138
11. The Nature of the Descriptive Categories	139
Is the level of analysis appropriate?	139
Are the categories sufficiently inclusive?	142
Some omitted issues	144
McCall's list of dimensions	148
Independence of the categories	148
Summary	149

III

The Dynamics of Interpersonal Relationships

12. The Study of Dynamics	153
Summary	158

13. Social and other Extra-Dyadic Influences	159
Influences from the physical environment	159
Relationships affect relationships	161
The dyad as a unit within a group	167
Socio-Cultural influences	168
Summary	181
14. Dissonance, Balance and Related Issues	182
Dissonance and balance	182
Secord and Backman's interpersonal congruency	188
Symbolic interactionism	189
Summary	192
15. Learning Paradigms and Processes	193
Exposure learning	193
Classical conditioning	197
Operant conditioning	200
The perceptual-motivational view of learning	201
Information-processing and other cognitive models	203
Theories of learning—overview	205
Summary	210
16. Exchange and Interdependence Theories	211
Definitions	211
Homans	212
Thibaut and Kelley	214
Equity theory	218
General issues	219
Summary	231
17. The Categorization of Rewards	233
Reinforcement in learning theory and real-life rewards	233
The classification of rewards	236
Summary	250
18. Conflict and Power	251
Conflict	251
Power	255
Summary	262

19. Who Determines What?	264
Summary	273
20. Negative and Positive Feedback	274
Negative feedback	275
Positive feedback	279
Summary	285

IV

Developmental Considerations

21. Developmental Aspects of Relationships between Adults	289
Stages in a relationship	289
Distinguishing degrees of relatedness	292
Changes in the relative importance of context and attributes	294
Summary	305
22. Aspects of Relationships in Infancy and Childhood	307
The special properties of the parent-child relationship	307
Stability and change	314
Summary	322

Conclusion

23. Limitations	325
References	333
Subject Index	361
