Preface xi

1. The Nature of Communication Research	1
Why Understand the Research Process	2
<i>Research Enhances the Accuracy of Our Inferences</i>	2
<i>Research Enables Us to Make Predictions</i>	3
<i>Research Enables Us to Intervene to Alter Outcomes</i>	3
Basic Concepts in Empirical Research	4
Types of Research	5
<i>Experimental Research</i>	5
<i>Descriptive Research</i>	10
<i>Comparison of Experimental and Descriptive Research</i>	11
Decisions in Research	13
<i>Evaluating the Significance of the Research Question</i>	14
<i>Refining Conceptual Definitions</i>	14
<i>Choosing Between an Experimental and Descriptive Study</i>	15
<i>Selecting Operational Definitions of the Variable</i>	15
<i>Selecting the Specific Context for the Study</i>	15
Selecting and Allocating Subjects	16
<i>Coding Data</i>	16
<i>Analyzing Data</i>	17

<i>Reporting the Study</i>	17
Preview	17
Study Questions	18
<b>2. Evaluation of the Research Question</b>	<b>19</b>
Clarity and Precision of the Question	20
<i>Conceptual Clarity of the Variables</i>	20
<i>Precision in Stating the Relationship Among Variables</i>	21
<i>Specification of the Scope of the Relationship</i>	22
Feasibility of Pursuing the Question	23
<i>Availability of a Dependent Measure</i>	24
<i>Ethical Constraints on Using Measures</i>	24
<i>Difficulties Manipulating the Independent Variable</i>	25
<i>Difficulty Gaining Access to Appropriate Subjects</i>	25
<i>Logistic Difficulties</i>	26
<i>Constraints Imposed by Limited Resources</i>	26
Significance of the Question	27
<i>Importance of the Phenomenon Under Investigation</i>	27
<i>Explanatory Power</i>	28
Study Questions	30
<b>3. Internal Validity of a Design</b>	<b>31</b>
Operational and Conceptual Definitions	33
Dealing With Potentially Contaminating Variables	34
Assignment of Subjects to Experimental Conditions	35
The Relationship of the Measuring Procedure to the Dependent Variable	36
Context in Which Variables Are Embedded	38
Study Questions	39
<b>4. External Validity of a Study</b>	<b>40</b>
Operational Definition of the Independent Variable	42
Dependent Measure	44
Subject Selection	44
Conditions in Which the Variables Are Embedded	47
Study Questions	49
<b>5. Operationalizing the Independent Variable</b>	<b>50</b>
Manipulation Versus Identification of Existing Conditions	51
Manipulation Checks or Assessing Existing Conditions of the Variable	53
Taking Account of Initial Differences in Subjects' Reactions	55
Determining the Number of Levels of the Independent Variable	56

Extremity of Conditions	58
Selection of Additional Variables	59
Dealing With Potentially Contaminating Variables	62
<i>Hold the Potentially Contaminating Variable Constant</i>	63
<i>Randomizing the Effect of the Potentially Contaminating Variable</i>	64
<i>Include the Potentially Contaminating Variable as an Additional Independent Variable</i>	65
<i>Hold the Impact of the Potentially Contaminating Variable Constant Statistically</i>	65
Study Questions	68
<b>6. Treatment of Subjects</b>	<b>69</b>
Subject Selection	69
<i>Random Sampling</i>	71
<i>Proportional Stratified Sampling</i>	71
<i>Impact of Bias in the Sample</i>	72
Assignment of Subjects to Conditions	73
<i>Repeated Measures Versus Independent Groups</i>	73
<i>Determining Specific Conditions</i>	75
Humane Treatment of Subjects	75
Subject Orientation	77
Study Questions	79
<b>7. Evaluating a Dependent Measure</b>	<b>80</b>
Reliability	81
<i>The Nature of Reliability</i>	81
<i>Enhancing Reliability</i>	82
<i>Assessing Reliability</i>	83
Validity	84
<i>The Nature of Validity</i>	84
<i>Steps in Developing and Validating an Instrument</i>	85
<i>Methods of Validating an Instrument</i>	87
Utility	90
<i>The Nature of Utility</i>	90
<i>Displays Full Range of Responses</i>	91
<i>Provides Insight into Rationale for Behavior</i>	93
<i>Potential for Serendipity</i>	95
Study Questions	96
<b>8. Types of Dependent Measures</b>	<b>98</b>
Measures of Behavior	99
<i>Conditions Under Which Data Are Gathered</i>	99
<i>The Nature of the Observation of the Behavior</i>	104
<i>How the Data Are Coded</i>	105
Assessment of Internal States	107
<i>Physiological Measures</i>	107

	<i>Reports of Observers</i>	108
	<i>Self-Reports</i>	110
	Combining Types of Measures	113
	Study Questions	114
9.	<b>Describing a Data Set: Central Tendency and Dispersion</b>	<b>115</b>
	Scaling Properties	116
	<i>Nominal Scales</i>	117
	<i>Ordinal Scales</i>	118
	<i>Interval Scales</i>	119
	<i>Ratio Scales</i>	119
	Descriptive Statistics	120
	<i>Central Tendency</i>	120
	<i>Dispersion</i>	122
	Study Questions	125
10.	<b>Generalizing From Sample Means to a Population</b>	<b>126</b>
	Type I and Type II Errors	128
	Conducting Tests of Significance	130
	Differences in Mean Scores	131
	<i>t-Test</i>	131
	<i>One-Way Analysis of Variance</i>	132
	<i>Two-Way Analysis of Variance</i>	133
	<i>Higher Order Analysis of Variance</i>	134
	Strength of Relationship	135
	Interpreting Tests of Significance	136
	The Role of Replication	138
	Study Questions	139
11.	<b>Describing the Association Among Variables</b>	<b>141</b>
	Pearson Product Moment Correlation	142
	Multiple Correlation	145
	Partial Correlation	147
	Spearman Rank Order Correlation	148
	Chi Square	148
	Factor Analysis	150
	Study Questions	152
12.	<b>Reporting the Study</b>	<b>153</b>
	Introduction	154
	Methods	155
	<i>Subjects</i>	155
	<i>Materials</i>	155
	<i>Procedures</i>	155

<i>Coding the Data</i>	156
<i>Analysis of Data</i>	156
Results	156
Discussion	157
Study Questions	157
References	159
Index	162
About the Author	166
