

Contents

1	Introduction	1
1.1	Problem Statement	5
1.2	Research Objectives and Method	7
1.3	Thesis Structure	9
2	Foundations of Model-Driven Software Development (MDS)	11
2.1	Conceptual Description	11
2.2	Definition of Modeling Languages	15
2.3	Definition of Model Transformations	21
3	Introduction to Case Study: Transformation of Multi-Layer Systems	24
3.1	Example System: Trip Planning Software (ADR)	25
3.2	Example Platform: Communicating Sequential Processes (CSP)	33
3.3	Example Transformation: ADR-to-CSP	36
4	Systematic Development of Model Transformations	48
4.1	Development of Transformations	48
4.1.1	Transformation Types	49
4.1.2	Transformation Design	51
4.1.3	Transformation Implementation	54
4.2	Quality Assurance of Model Transformations	73
4.2.1	Four Functional Properties of Transformations	74
4.2.2	Quality-By-Construction: Transformation Development	76
4.2.3	Quality-By-Checking: Transformation Analysis	80
4.3	Re-Use of Model Transformations	83
4.3.1	Transformation Chaining	84
4.3.2	Transformation Adaptation: Superimposition	87
5	Grammar Based Approach to the Development of Model Transformations	89
5.1	Description of Source and Target Languages	89
5.1.1	String Grammars	90
5.1.2	Graph Grammars	92
5.2	Conceptual Description of the Approach	98
5.2.1	Transformation Definition	99
5.2.2	Transformation Execution	110

5.3	Formalization of the Approach	112
5.3.1	Formalization of Transformation Definition	114
5.3.2	Formalization of Transformation Execution	129
5.4	Guaranteed Quality Properties of Transformations	135
5.4.1	Termination	136
5.4.2	Soundness and Completeness	138
5.4.3	Determinism	144
5.5	Tool Support	147
5.6	Related Approaches	150
5.7	Evaluation and Discussion	155
6	Weaving Based Approach to the Re-Use of Model Transformations	162
6.1	Conceptual Description of the Approach	165
6.1.1	Weaving Based Modeling of Models Inter-Relations	166
6.1.2	Modular Execution of Transformations	172
6.2	Tool Support	188
6.3	Related Approaches	190
6.4	Evaluation and Discussion	193
7	Weaving Based Re-Use of Grammar Based Model Transformations	198
7.1	Grammar Based Transformation of Layers Models	198
7.2	Grammar Based Transformation of Configuration Models	202
7.2.1	Grammar of Configuration Modeling Language	203
7.2.2	Definition of the Configuration Model Transformation	205
7.3	Discussion	213
8	Conclusion	217
8.1	Thesis Contribution	217
8.2	Analysis of Grammar Based Development Approach	218
8.3	Analysis of Weaving Based Re-Use Approach	221
8.4	Future Research Directions	223
	Bibliography	I
	List of Figures	XXII
	List of Tables	XXV
