

Table of Contents

Preface	<i>vii</i>
Acknowledgments	<i>xi</i>
How to use this book	<i>xiii</i>
Part I. Concerning Usability	1
1 Introducing usability	3
2 Introducing usability testing	21
3 Uncovering usability needs before you design	39
4 Basing designs on expertise in human–computer interaction ...	51
5 Evaluating usability throughout design and development	63
6 Establishing a usability program in your organization	83
Part II. Planning and Preparing for a Usability Test	97
7 Planning a usability test	99
8 Defining goals and concerns	109
9 Deciding who should be participants	119
10 Recruiting participants	135
11 Selecting and organizing tasks to test	159
12 Creating task scenarios	171
13 Deciding how to measure usability	183
14 Preparing test materials	203
15 Preparing the test environment	221
16 Preparing the test team	233
17 Conducting a pilot test	263
Part III. Conducting and Using the Results of a	
Usability Test	271
18 Caring for the test participants	273
19 Conducting the test	287
20 Tabulating and analyzing data	309
21 Recommending changes	331
22 Communicating the results	339
23 Preparing a highlight tape	355
24 Changing the Product and the process	367
