# Contents

<b>PART 1</b>	<b>INTRODUCTION</b>	<b>3</b>
<b>Chapter 1</b>	<b>The Psychometric Process</b>	<b>5</b>
	Psychometric Inference	5
	Psychometric Theories	8
	Some Common Psychometric Issues	9
	Overview of the Chapters	13
<b>Chapter 2</b>	<b>Some Mathematical and Statistical Concepts</b>	<b>15</b>
	Quadratic Functions	15
	Derivatives	17
	Optimization Algorithms	19
	Bayesian Statistics	20
	Matrix Algebra	22
<b>PART 2</b>	<b>RANDOM SAMPLING THEORY</b>	<b>25</b>
<b>Chapter 3</b>	<b>Classical Theory</b>	<b>27</b>
	The True Score Model	27
	Reliability Estimation	28

Assumption of Independence 28  
Parallel Test Assumptions 30  
Error Variance and Standard Error of  
Measurement 31  
Estimation of True Score 32  
Strategies to Attain Parallel Tests 32  
Conceptual and Practical Implications 36  
Extensions of Classical Theory 38

**Chapter 4      Generalizability Theory: Conceptual  
                         Framework 41**

The Nature of Score Variances 42  
Types of Variances 43  
Design Considerations 44

**Chapter 5      Generalizability Theory: Statistical Methods 51**

Single-Facet Crossed Design 53  
Single-Facet Nested Design 58  
Two-Facet Crossed Design 62  
Sample Size Considerations 65  
Venn Diagrams 66

**Chapter 6      Conventional Item Analysis 71**

Probability of Guessing 72  
Item Difficulty 73  
Item Discrimination 75  
Analysis of Distractors 78  
Item Reliability 79

**PART 3      ITEM RESPONSE THEORY 81**

**Chapter 7      Basic Concepts of Item Response Theory 83**

Limitations of Random Sampling Theory 83  
Item Characteristic Curve 85  
Item Parameters and Ability Scale 88  
Normal Ogive Functions 90  
Logistic Models 91  
Choice of Model 93  
Information Functions 94

<b>Chapter 8</b>	<b>Conditional Estimation of Ability</b>	<b>99</b>
	Assumptions	100
	The Likelihood Function	101
	Conditional Maximum Likelihood Estimate of Discrete Ability	103
	Conditional Maximum Likelihood Estimate of Continuous Ability	105
	Newton-Raphson Numerical Procedure	107
	Log Likelihood Function	109
	Problems with Maximum Likelihood Estimates	111
	Bayesian Model Estimates	112
	Uninformed Prior Distributions	115
<b>Chapter 9</b>	<b>Joint Estimation of Parameters</b>	<b>119</b>
	Problems of Joint Estimation	119
	Joint Maximum Likelihood Estimation	123
	Bayesian Parameter Estimation	124
	Marginal Maximum Likelihood Estimation	125
	Approximation Methods	127
	Sample Size Considerations	129
<b>PART 4</b>	<b>VALIDITY</b>	<b>131</b>
<b>Chapter 10</b>	<b>Content and Criterion-Related Validity</b>	<b>133</b>
	The Concept of Validity	134
	Content Validity	135
	Criterion-Related Validity	140
<b>Chapter 11</b>	<b>Construct Validity and Other Issues</b>	<b>145</b>
	Construct Validity	145
	Factor Analysis	147
	The Reliability/Validity Continuum	150
	Multitrait-Multimethod Matrix	151
	A Generalizability Perspective of Validity	152
<b>PART 5</b>	<b>APPLIED ISSUES</b>	<b>155</b>
<b>Chapter 12</b>	<b>Criterion-Referenced Testing</b>	<b>157</b>
	Reliability of Test Scores	158
	Standard Setting	160

**viii CONTENTS**

Classification Reliability 163  
Validity of Mastery Decision 171

**Chapter 13 Direct Observation of Behavior 173**

Ideographic-Sample and Nomothetic-Sign  
Measure 174  
Dimensions of Behavior 175  
Time Sampling and Scoring Error 175  
Reliability 179  
Validity 181

**Chapter 14 Detection of Item Bias 185**

Test Bias 185  
Item Bias 186  
The Delta-Plot Approach 187  
The Chi-Square Approach 189  
The Mantel-Haenzel Approach 191  
The Item-Response Theoretic Approach 192  
Choice of Method 196

**Chapter 15 Other Conceptual and Technical Issues 199**

Equating 199  
Group Versus Individual Score Interpretations 205  
Simpsons Paradox 206  
Answer Changing 208  
Adaptive Testing 209  
The Role of Technology 211  
The Role of Cognitive Theory 211  
The Role of Mathematical Programming 212
