<i>Foreword</i>	v
<i>Preface</i>	ix
PART ONE. WHAT DO WE MEASURE?	1
<i>Introduction</i>	3
1. The Roots of Personality Measurement	4
Development of Procedures	5
The clinical approach	5
The inventory approach	6
Systematic observations	7
Other approaches	9
Progress or productivity?	9
Theory and Measurement	10
Target concepts	11
Theory and data must interact	13
Summary	14
2. Orientations and Themes	16
Setting the Stage	16
Personality	16
Basic research and other settings for measurement	17
The Orientation of This Book	19
“The Two Disciplines of Scientific Psychology”	19
Some axiomatic propositions	24
Some pervasive themes and theses	28
Summary	35
3. Personality, Process, and Systematic Observations	37
The Content to Be Observed and Measured	37
Defining personality	37
The general process	38
Implications of the process concept	41

Extracting Order from Chaos	43
The subject and his state	48
The setting, the conditions for measurement	50
The task set for the subjects	51
The stimuli	52
The responses	55
Measurement as experimentation	56
Caveat	58
Summary	59
4. The Observational Data of Personology	61
The Natural History of Personality	61
Perspectives	62
One or several perspectives?	63
Perspectives and theories	65
Summary	66
5. The Modes of Measuring Personality	68
The Prior Behavior Mode (Mode 4)	73
The Capabilities Mode (Mode 3)	76
The Current Experiencing Mode (Mode 2)	76
The Self Description Mode (Mode 1)	77
The Observation of Behavior Mode (Mode 5)	77
The Psychophysiology Mode (Mode 6)	79
Perceptions of the Measuring Process	79
The Modes and Their Differentiation	81
Contexts	84
Subject and Observer Variables	85
Modes, Perspectives, and Other Classifications	86
Method Variance	88
Summary	89
6. The Specification of Constructs	90
Guidelines for Conceptualizing a Variable	92
What is a variable?	94
The setting for a working definition	96
The core of the construct	98
Modes to be used	101
Facets and elements	103
Conditions	106

<i>Contents</i>	xv
Necessary and desirable characteristics of conceptualizations	106
Other orientations	107
The empirical alternative	109
From Construing to Measuring	110
A glance ahead: processes in measuring	110
Three test designs	113
Summary	117
PART TWO. MEASURING	119
<i>Introduction</i>	121
7. Some Fundamentals of Measurement	122
Ideal Measurement	122
A fantasy	122
Reality	124
Measuring in a testing situation	127
Ideal testing	129
The isolated construct and interactions among constructs	130
The Single Datum	131
The measurement decision	131
The response attribute recorded	132
Potential indices	133
Summary	135
8. Indices: Their Models and Their Evaluation	137
Measurement Scales	138
Psychometric Models	140
Models with undifferentiated stimuli	140
The cumulative homogeneity model	142
Other models	146
Scaled scoring of observations	147
The measurement scales and the psychometric models	148
A critique of the psychometric models	149
Psychometric models and qualities of responses	150
Generalizability for a Single Test	150
Internal consistency	151
Stability	152
Generalization over producers	152
Indices of homogeneity	153
Computing the Homogeneity Indices	157
Variances	157

Homogeneity coefficients	160
Other comments on the homogeneity indices	162
Generalizability Beyond the Single Test: Approaches to Validation	163
Convergent and discriminant validation	164
Criterion-related validity	166
Construct validity	167
The unity of generalizability	171
The Role of Expert Judgment in Personality Measurement	172
Summary	175
9. Behaving and Changing	177
The Stability of Behavior from a Short-Term View	177
The stream of experiencing	177
State vs. trait	180
Consistency of behavior over repeated observations	180
The stability of measurements	183
Factors affecting the stability of test responses	186
The Long-Term Stability of Personality Measurements	189
The Study of Change	191
Measuring experimental effects	191
The measurement of therapeutic treatments	194
Measuring Change	197
Initial level	197
Indices of change	198
Effects of unreliability	199
Substantive considerations	200
Summary	201
10. A Human Being Takes a Test	203
The Layman's View of Testing	204
The Psychology of the Subject Taking a Test	206
Three kinds of stimuli	206
The motives of subjects	209
The examiner's relationship to the subject	212
Dimensions of Test-Taking Behavior	213
Response sets	213
An overview of response sets	217
Other subject variables	220
Ambiguity in Questionnaire Items	221
The Process of Responding to an Item	222

<i>Contents</i>	xvii
The Rights of the Subject	224
The Need for a Positive Approach	225
Summary	226
11. The Specificity of Behaviors and of Measurements	228
Specificity in Behaviors	229
Complexity of stimuli	229
Multiplicity of determinants	230
The Specificity of Instruments and Their Scores	232
Specificity in Guilford's measures of intelligence	233
Specificity in other tests of intelligence	236
Specificity in measures of personality	237
Specificity in personality tests within a single mode	238
Specificity in personality tests from different modes	240
Other Views on Test Specificity	246
Implications of Test Specificity for Construct Validation	247
Summary	248
12. Measuring a Personality Construct Today	250
Criteria for Measurements of Individual Differences	250
Meeting the criteria	252
Fully adequate measurements	253
Feasible Programs of Personological Research	255
Methodologies	257
Empirical approaches	257
Psychometric techniques	260
The Measurement of a Construct	261
Constructs, perspectives, and modes	261
Steps in Developing and Evaluating a Measuring Procedure	264
1. Content validity	265
2. Process validity	265
3. Interjudge agreement	266
4. Homogeneity	266
5. Stability	267
6. Convergence over measuring conditions	267
7. Convergence over format	268
8. Convergence within mode	268
9. Convergence between modes	268
10. Discriminant validation with constructs from the same substantive area	269

11. Discriminant validation with constructs of other kinds	269
12. Construct validation	270
Summary	272
13. Prospects and Issues	274
“What’s Past Is Prologue”	274
Prospects	275
Indirect measures	278
Collaborative measurement	278
The experiencing and behaving subject	279
Issues	281
The target constructs for personality measurement	281
Personality constructs in cultural settings	284
Multiple determination and resultant specificity of scores	284
Is trait a false concept?	286
A more modest strategy	287
Is the single-variable approach viable?	288
Some Possible Strategies	290
Summary	292
<i>Glossary</i>	294
<i>References</i>	300
<i>Index</i>	314
