To the Reader	xvi
1 Introduction to phonology in language teaching	1
Phonology in the context of language teaching	1
What is phonology?	1
Types of meaning conveyed by phonology	2
Native and non-native accent	6
Language varieties and English	8
Speech norms	8
Standards and varieties, old and new	10
A variationist approach to teaching phonology	17
Perception and production of speech	18
Levels of analysis	18
The speech mechanism	20
The larynx and voicing	22
Phonetics and phonology	23
The effect of linguistic context on pronunciation	26
Coarticulation and assimilation	26
The need for a special symbol system for representing speech sounds	27
Introductory activities	28
Introductory teaching ideas	33
2 Consonants	37
Characteristics of consonants	37
The nature of consonants	37
Place of articulation	37
Manner of articulation	42
The system of English consonants	48
Nasals	48
Stops	49
Fricatives	50

Affricates	51
Approximants	51
Positional variation	52
Durational effects	52
Place effects	54
Manner effects	55
Strengthening and weakening	60
Regional and social variation	61
Systemic variation	61
Variation in individual consonants	63
Consonants activities	70
Teaching ideas for consonants	76
3 Vowels	89
Characteristics of vowels	89
The nature of vowels	89
Phonetic properties of vowels	90
Monophthongs and diphthongs	92
The system of English vowels	93
Full and reduced vowels	93
Tense and lax vowels	98
Positional variation	99
Durational effects	99
Place effects	100
Manner effects	103
Strengthening and weakening	104
Regional and social variation	105
Systemic variation	105
Variation in individual vowels	111
Vowels activities	118
Teaching ideas for vowels	122
4 Prosody	128
The components of prosody	128
The marking of prosodic units	128
Stress at the level of syllables and words	128
Regional and social variation in word stress	132
Stress in larger contexts	135
Stress and information	137
Pause groups	139
Contextual effects related to prosodic grouping	142
Regional and social variation in the form and effects of utterance-level stress and prosodic grouping	144

Intonation	148
Pitch and intonation	148
Regional and social variation in intonation	153
Voice quality	156
The nature and communicational functions of voice quality	156
Situational and psychological correlates of voice quality	159
Regional and social variation in voice quality	161
A prosodic continuum	162
Prosody activities	165
Teaching ideas for prosody	174
5 Phonology and orthography	183
Connecting written and spoken language in language learning	183
Historical and present-day patterns in English orthography	185
Sources of variability in English phonology and orthography	185
Historical influences on English spelling	189
The legacy of historical changes in English orthography	199
The nature of the present-day English orthographic system	203
Spelling rules in English	205
Relating orthography to pronunciation in the language lesson	206
Orthography activities	207
Teaching ideas for orthography	212
6 Pronunciation in the language curriculum	218
A place for phonology in the language classroom	218
Questions of curriculum in second language phonology	218
Goals for pronunciation in a second language	220
Benefits of attention to phonology for other curricular goals	222
Targetting areas for instruction, remediation or feedback	223
Lesson design for phonology	224
From mechanical to real pronunciation practice	224
Designing the autonomous pronunciation lesson or unit	228
Integrating listening and self-monitoring activities in the pronunciation curriculum	237
An international approach to pronunciation in the language curriculum	239
Curriculum activities	243
Appendix A. Hierarchical analysis of student pronunciation	253
Appendix B. Pedagogical classification of pronunciation errors and problems	256
Appendix C. Sample unit plan for teaching the /r/-/l/	258
