Preface	xi
List of Illustrations	xiii
List of Tables	xv
Part 1. Goals and Tools	1
Chapter 1. Introduction	1
1.1 The Goals of Natural Language Processing	1
1.2 Properties of Language	4
1.2.1 Grammatical Subclasses and Selection	4
1.2.2 Syntactic Ambiguity	5
1.2.3 Implicit Elements	6
1.2.4 Meaning	6
1.3 Computer Parsing	7
1.4 Linguistic String Analysis	11
1.5 A System for Natural Language Information Processing	14
Notes	15
Chapter 2. Computer Representation of Linguistic Data	17
2.1 Requirements of a Natural Language Parser	17
2.1.1 The Lexicon	19
2.1.2 The Grammar	20
2.2 A Small Computable String Grammar	22
2.2.1 BNF Component	22

2.2.2	Restriction Component	27
2.3	A Small Grammar vs. a Large Grammar	30
2.4	Types of Definitions	32
2.5	Locating Relations	34
2.6	Locating Routines	39
2.7	A Formal Metalanguage	40
	Notes	42
Chapter 3. The Restriction Language		43
3.1	Types of Restrictions	44
3.2	Principal Constructions of the Restriction Language	45
3.2.1	The Subject of an RL Statement	45
3.2.2	The Predicate of an RL Statement	46
3.2.3	Connectives	48
3.2.4	Relocating Devices and Registers	49
3.2.5	Commands	50
3.2.6	Monitoring the Parsing Process	51
3.2.7	Node Attributes	52
3.3	Routines	52
3.3.1	Basic Locating Routines	53
3.3.2	Extended Scope Routines	54
	Notes	58
Part 2. A Computer String Grammar of English		59
Chapter 4. The BNF Component of the Grammar		59
4.1	Sentence	60
4.1.1	RARE Options	61
4.2	Center Strings	62
4.2.1	There <i>and</i> it forms	64
4.3	Question Centers	66
4.4	Permutation Centers	69
4.5	Subject Strings	70
4.5.1	Noun String and Names	71
4.5.2	Noun-replacing <i>wh</i> -strings	74
4.5.3	Nounlike Sentence Nominalizations	74
4.5.4	<i>Ving</i> Strings	75
4.6	Sentence Nominalization Strings	78
4.7	Verb and Verbal Object Strings	79
4.8	Object Strings	82
4.8.1	Objects of <i>be</i>	82

4.8.2	Basic Object Strings	84
4.8.3	Sentence Nominalization Strings in OBJECT	85
4.9	Sentence Adjunct Strings	86
4.9.1	Short Sentence Adjuncts	86
4.9.2	Longer Sentence Adjuncts	88
4.10	Subordinate Conjunction Strings	90
4.11	RN, Right Adjuncts of N	94
4.12	LN, Left Adjuncts of N	97
4.12.1	Article Position	98
4.12.2	Quantifier Position	103
4.12.3	Adjective Position	104
4.12.4	Noun and N's-of-Type Position	107
4.13	Right Adjuncts Other Than RN	108
4.14	Left Adjuncts Other Than LN	112
4.15	<i>Wh</i> -Strings	112
4.16	Conjunction and Comparative Strings	115
	Notes	115
Chapter 5.	The Restriction Component of the Grammar	119
5.1	The Organization of Restrictions	122
5.2	Agreement Restrictions	123
5.3	Comma Restrictions	150
5.4	Minword and Optimization Restrictions	154
5.4.1	Minword Restrictions	154
5.4.2	Optimization Restrictions	157
5.5	Noun Phrase and Quantifier Restrictions	158
5.5.1	Noun Phrase Restrictions	158
5.5.2	Quantifier Restrictions	165
5.6	Selection Restrictions	165
5.7	Sentence Nominalization Restrictions	171
5.8	<i>Wh</i> Restrictions	176
5.8.1	Accepting NULLWH	178
5.8.2	Embedding	180
5.8.3	Conjunctions in <i>Wh</i> -Strings	184
	Notes	187
Chapter 6.	The Treatment of Conjunctions	190
6.1	The Generation of Conjunction Strings	191
6.2	Features of Specific Conjunction Strings	195
6.2.1	Scope Markers	195
6.2.2	Comma Conjunctions	196

6.2.3	Comparatives	196
6.3	Restrictions Under Conjunctions	197
6.4	Automatic Expansion of Conjunction Strings with Ellipsis	200
	Notes	202
Chapter 7.	The Transformational Component of the Grammar	203
7.1	Transformational Analysis	203
7.2	Transformational Computation	208
	Notes	211
Part 3.	Applications	213
Chapter 8.	Information Formatting	213
8.1	Processing Radiology Reports	215
8.1.1	Specifying the Information Format	216
8.1.2	Transferring the Information into the Format	216
8.1.3	Filling in Implicit Information	218
8.1.4	Fact Retrieval from Information Formats	219
8.2	Processing Clinical Narrative	220
8.2.1	Form of the Input Data	220
8.2.2	Information Format for Clinical Narrative	223
8.2.3	Information Table of a Patient Document	229
	Notes	231
Chapter 9.	Applications of Medical Information Formatting	232
9.1	Health Care Evaluation	233
9.2	Organization of Patient Data	237
	Notes	239
Chapter 10.	Applications in Teaching	240
10.1	Computational Linguistics	241
10.2	Teaching a Second Language	253
	Notes	255
References	256

Appendices	263
Introduction to Appendix 1	265
Appendix 1. LSP Computer Grammar of English	266
Appendix 2. A Guide to Finding LSP BNF Definitions	310
Appendix 3. The Lexical Subclasses of the LSP English Grammar	322
Appendix 4. Restriction Short Index	375
Index to Symbols of the Computer Grammar in Part 2*	385
Index	395
