

TABLE OF CONTENTS

	Page
Chapter I: Introduction	1
1. Framework	1
2. Problem and Method	9
3. Results	13
Chapter II: Intuitive Characterization of the Classifier and Pseudo-classifier Relation- ship and Their Semantic Correspondents	16
Chapter III: Classification of Kernel Nouns into Proper Names, Count Nouns and Mass Nouns	37
1. Proper Names	39
2. Count Nouns	53
2.1 Differentiation of N_K from N_W	53
2.2 Subclassification of kernel count nouns	61
2.3 Derived count nouns	70
3. Mass Nouns	75
3.1 Mass nouns of the kernel	76
3.2 Derived mass nouns	76
Chapter IV. Specification of Instances of the Kernel Form <u>(the_{gen})N_1 t be a N_2</u>	82
1. N_2 is a proper name	85
2. N_2 is a mass noun	90
3. N_1 is realized by <u>a N</u>	95

4. N_1 is a count noun used generically	99
5. Summary of results	115
Chapter V: Copula Sentences with a Non-Membership	
Interpretation	120
1. Pseudo-classifier sentences of the form	
<u>N_1 t be a N_2</u>	120
2. Specification of the K-form (<u>the_{gen}N_1 t be N_2</u>)	129
3. Derived sentences of the form <u>N_1 t be N_2</u>	147
4. Summary of results	155
Appendix I: Lexicon of Classifiers	157
Appendix II	253
