

## *Contents*

PREFACE vii

### PART ONE

#### *Investigations of the Treatment of Enuresis by Conditioning Methods*

I. Introduction and Historical Background	3
II. The Major Theories of Enuresis and their Implications for Treatment	9
III. The Mechanism of Micturition and Normal Continnence Development in Relation to the Aetiology and Treatment of Enuresis	19
IV. The Enuresis Survey	33
V. The Results of Psychotherapeutic and Conditioning Methods of Treatment	47
VI. The General Psychological Effects of Direct Condition- ing Treatment	61
VII. The Investigation of the General Psychological Effects of Conditioning Treatment	68
VIII. The Mechanism of Conditioning Treatment and its Re- lation to Instrumental Design and Procedure	85
IX. Field Experiment I. Experimental Comparison of Twin Signal, Crosby and Mowrer Instruments	94
X. Animal Experiments on the Maintenance of Avoidance Responding	102
XI. Field Experiments on the Reduction of the Relapse Rate	121
XII. Brief Stimulus Treatment without Awakening and Urination	132
XIII. General Conclusions	141

## PART TWO

*The Clinical Application of Conditioning Methods in the Treatment of Enuresis*

XIV. Conditioning Treatment in Practice	157
XV. Adjuvant Therapy	170

## APPENDIXES

1. Twin Signal Instrument; Circuit, Legend, Description of Circuit Operation, and Instructions for Use	176
2. Instrument for Use with Resetting Electrodes; Circuit and Legend	181
3. Transistorized Mowrer type Instrument; Circuit and Legend	183
4. Social Undervaluation Test and Neurotic Inventory	184
5. Behaviour Rating Scale	187
6. Extraversion Scale	192
7. Behaviour Problem Record	195
8. Movie Story Test: Instructions to Subjects and Categories used in Content Analysis of M.S.T. Protocols	196
9. Enuresis Survey	198
