

Contents

Foreword.....	5
Introduction.....	15
The Purpose & Scope of this Study.....	16
Which Criteria Can We Use as a Comparison?.....	18
Chapter 1: Growth Process Worldwide.....	21
All About Growth.....	25
“Savings = Investment” Paradox.....	27
On Added-value Criterion.....	30
The Relationship Between the Laborer – Technological Progress & Growth....	31
What Role Does Investment Play in Regard to Technology and Long-run Growth?.....	34
Access to and the Use of Technology.....	34
Laborer, Knowledge & Growth.....	36
Qualified Labor or “Human Capital”	37
Creative Labor and Growth	39
Unqualified Labor	39
Technological Progress & the Global Economy.....	39
Is it possible to Measure the “Qualification Level of the Laborer” Accurately?.....	40
Other Factors Having an Impact on Growth.....	42
The Institutional and Cultural Infrastructure	42
Competitive Conditions	43
Economic and Political Stability.....	43
Financing the Investments	44
Natural Resources.....	44
Chapter 2: Basic Concepts Related to Growth.....	45
Productivity- (Productivity) Growth - Qualified Laborer - Technological Progress.....	45
Productivity (V).....	47
Measuring Productivity: a Static Analysis.....	48
The Quantitative Analysis.....	48

Measuring Qualitative Differences	49
Value Analysis of "Productivity"	49
An Alternative Value Measurement.....	50
Optimum Productivity	51
"(Productivity) Growth"	51
Quantitative Productivity Growth	52
Partial Factor Productivity Growth.....	53
Added-value Based Productivity Growth	54
Is a "Value" Criterion a Perfect Choice?	54
"New Products" and Growth	55
An Inter-Country Productivity Comparison	55
Concluding Remarks	56
Chapter 3: Growth Theories: Historical Perspective.....	57
A. Smith.....	60
Ricardo.....	63
Marx.....	65
Marshall.....	68
Keynes.....	70
Keynes's Model.....	71
The Characteristics of Keynes' "Static" Model	73
Harrod-Domar	74
A summary of the Harrod-Domar model.....	75
Schumpeter	75
Overview	76
Chapter 4: New Approaches to Growth Theory	79
Neoclassical Growth Theory-1: Pre-Solow	80
A Criticism of the Theory in Regard to Growth.....	85
Neoclassical Growth Theory-2: Solow & After	86
Estimation of TFP	88
Criticism of Solow's Model & the TFP Approach.....	89
TFP & Long-run Growth	90
Some TFP-related Data.....	94
TFP and Growth in Turkey	95
"Endogenous" Growth Models	96
Lucas: the Mechanical Model of Growth	97
The Institutional School	105

P. Romer: An Endogenous Growth Theory.....	109
R.J. Barro on Growth	120
Aghion-Howitt: Creative Destruction.....	123
Sectors and Production	126
Grossman-Helpman: Foreign Trade and Growth.....	128
G. Mankiw.....	135
Middle-Income-Trap: End of Growth?	139
In Conclusion.....	141
Concluding Remarks for the Chapter.....	144

Chapter 5: An Alternative Growth Model..... 145

Introduction.....	145
The Purpose.....	146
“Productive” Factors & “Production” Factors or Inputs.....	147
Productive Factors.....	148
Factors (Inputs) of Production	148
“Productive” Factors and Value-creation	148
The Genesis of Growth.....	149
Some Basic Assumptions.....	152
An Attempt at an Alternative Growth Model.....	153
Initial Case: A Simple “Stationary” Output, Exchange & Distribution Model.....	153
A Simple “Short-run” Growth Model: 1	154
Assuming Access to a “New” Market.....	156
A Simple “Long-run” Growth Model: 2	157
“New Markets” for the “New Product”	158
Conclusions to be Drawn from the Simple Growth Models	159
Limit of Short-run Growth	159
Technological Innovations and Producers.....	160
The Importance of Innovations.....	161
Conclusions.....	163
A Note on Labor, Innovation & Value-Price Theory	163

Chapter 6: Short-run Growth in the Real Economy 165

1- Short-run Growth: A “Given” Technology	165
1-a) EE and/or TE growth.....	165
1-b) Extended Production for New Markets	167
Eight Methods to Increase Short-run Growth.....	168

Chapter 7: Long-run Growth in the Real Economy.....	177
Technological (Macro) Productivity Growth	177
a) A “Given” Product, but a “New” Production Method.....	177
b-) New Products	179
Growth: Reconsidered - Both in the Short- & Long-run.....	181
The Concrete Effects of Innovations	182
Given Product – New Method of Production	182
Technological Productivity Growth.....	184
“Given” Product – “New” Production Process	184
New Product	189
New Product and Functional Income Distribution.....	190
New Product, “Monopoly” and Profit Rate	191
Innovations, Growth and Price.....	192
A “Given Product” but a “New Production Process”.....	192
“New” Product and “New” Price.....	193
Other Factors Influencing Price Level.....	193
Technology Transfer & Long-run Growth.....	195
Measures to be Taken.....	196
Major Costs of Technology Transfer Through FDIs.....	198
Conclusion	199
Chapter 8: Growth & The Service Sector	203
“Productivity” & “Productivity Growth” in the Services Sector	204
“Productivity “in the Services Sector.....	205
“Productivity Growth” in the Services Sector.....	206
“New” Types of Services and Long-run Growth.....	206
Competition in the Services Sector.....	207
Global (International) Trade in the Services Sector	208
Chapter 9: Growth & Income Distribution.....	211
Functional Income Distribution.....	211
An Ideal Income Distribution	212
Pareto Optimum.....	212
Optimum Functional Income Distribution and Growth.....	213
Initial Case: Functional Income Distribution: with a “Given” Technology.....	215
1- “Efficiency Growth” & Income Distribution.....	216
2- “Innovation” & Income Distribution	217

Wage Rise in the Long-run & its Impact on Income Distribution 220

Technological Imperfections & Global Income Distribution..... 221

“Technology-intensive” & “Labor-intensive” Methods of Production..... 221

Concluding Remarks 222

Chapter 10: Growth or Development?..... 225

Growth..... 226

Development..... 227

Elements of the Development Theory..... 228

Development Economics..... 230

Chapter 11: Epilogue & a Suggestion 233

Developed Countries & Long-run Growth..... 234

LDCs & Long-run Growth..... 235

Producing New Technologies 235

More Efficient Use of Technologies 236

Efficient Use of Political, Institutional & Cultural Framework..... 236

A Suggestion to Boost Global Competition..... 237

Firms that “Only Produce Technology” 238

Suggestions for “Fairer” Income Distribution &
 Increased Democracy at Work 240

Is “Unlimited Growth” Desirable?..... 241

Bibliography..... 243
