<b>1</b>	<b>Introduction</b> Shlomi Amon	1
<b>2</b>	<b>Modulation techniques with lighting constraints</b> Jae Kyun Kwon and Sang Hyun Lee	10
	2.1 Inverse source coding in dimmable VLC	13
	2.1.1 ISC for NRZ-OOK	13
	2.1.2 ISC for M-ary PAM	16
	2.1.3 Comparisons with respect to dimming capacity	17
	2.2 Multi-level transmission in dimmable VLC	21
	2.2.1 Multi-level transmission scheme	23
	2.2.2 Asymptotic performance	28
	2.2.3 Simulation results	30
	2.3 Color intensity modulation for multi-colored VLC	33
	2.3.1 Color space and signal space	33
	2.3.2 Color intensity modulation	33
<b>3</b>	<b>Performance enhancement techniques for indoor VLC systems</b> Wen-De Zhong and Zixiong Wang	41
	3.1 Introduction	41
	3.2 Performance improvement of VLC systems by tilting the receiver plane	41
	3.2.1 SNR analysis of VLC system with a single LED lamp	42
	3.2.2 Receiver plane tilting technique to reduce SNR variation	44
	3.2.3 Multiple LED lamps with the receiver plane tilting technique	46
	3.2.4 Spectral efficiency	49
	3.3 Performance improvement of VLC systems by arranging LED lamps	51
	3.3.1 Arrangement of LED lamps	52
	3.3.2 BER analysis	56
	3.3.3 Channel capacity analysis	59

3.4	Dimming control technique and its performance in VLC systems	60
3.4.1	Bipolar OOK signal under dimming control	61
3.4.2	Adaptive M-QAM OFDM signal under dimming control	64
3.5	Summary	66
<b>4</b>	<b>Light positioning system (LPS)</b>	<b>70</b>
	Mohsen Kavehrad and Weizhi Zhang	
4.1	Indoor positioning and merits of using light	70
4.1.1	Introduction to indoor positioning	71
4.1.2	Spectrum crunch and future mobile system	71
4.1.3	Advantages of VLC-based positioning	73
4.2	Positioning algorithms	75
4.2.1	Triangulation	75
4.2.2	Triangulation – circular lateration	75
4.2.3	Triangulation – hyperbolic lateration	77
4.2.4	Triangulation – angulation	79
4.2.5	Scene analysis	81
4.2.6	Proximity	81
4.2.7	Comparison of positioning techniques	82
4.3	Challenges and solutions	82
4.3.1	Multipath reflections	82
4.3.2	Synchronization	84
4.3.3	Channel multi-access	84
4.3.4	Service outage	84
4.3.5	Privacy	85
4.4	Summary	85
<b>5</b>	<b>Visible light positioning and communication</b>	<b>88</b>
	Zhengyuan Xu, Chen Gong, and Bo Bai	
5.1	Introduction	88
5.1.1	Indoor light positioning system	88
5.1.2	Outdoor light positioning system	89
5.2	Indoor light positioning systems based on visible light communication and imaging sensors	90
5.2.1	System description	90
5.2.2	LPS with known LED positions	91
5.2.3	Monte-Carlo simulation results	94
5.3	Outdoor light positioning systems based on LED traffic lights and photodiodes	94
5.3.1	Light positioning system	94
5.3.2	Calibration of error induced by non-coplanar geometry	99
5.3.3	Numerical results	102
5.4	Summary	104

---

<b>6</b>	<b>The standard for visible light communication</b>	<b>107</b>
	Kang Tae-Gyu	
6.1	Scope of VLC standard	107
6.1.1	VLC service area compatibility	107
6.1.2	VLC illumination compatibility	108
6.1.3	VLC vendor compatibility	109
6.1.4	Standard compatibility	109
6.2	VLC modulation standard	110
6.2.1	Variable pulse position modulation VPPM	110
6.2.2	Line coding	111
6.3	VLC data transmission standard	111
6.3.1	Wired transmission protocol	111
6.3.2	Wireless transmission protocol	112
6.4	VLC illumination standard	112
6.4.1	LED lighting source interface	112
6.4.2	Fixture interface	113
6.4.3	LED intelligent system lighting interface	113
6.4.4	VLC service standard	114
<b>7</b>	<b>Synchronization issues in visible light communication</b>	<b>116</b>
	Shlomi Amon	
7.1	Introduction	116
7.2	VLC modulation methods in the time domain	117
7.2.1	On off keying (OOK)	117
7.2.2	Pulse position modulation (PPM)	118
7.2.3	Inverse pulse position modulation (IPPM)	118
7.2.4	Variable pulse position modulation (VPPM)	118
7.3	Bit error rate calculation	120
7.3.1	OOK BER	120
7.3.2	PPM BER	121
7.3.3	IPPM BER	123
7.3.4	VPPM BER	124
7.4	The effect of synchronization time offset on IPPM BER	125
7.4.1	The effect of clock jitter on IPPM BER	129
7.5	Summary	130
<b>8</b>	<b>DMT modulation for VLC</b>	<b>133</b>
	Klaus-Dieter Langer	
8.1	Introduction	133
8.2	Indoor application scenarios	135
8.3	Aspects of high-speed VLC transmission	139

8.3.1	LED modulation bandwidth	140
8.3.2	Channel capacity	140
8.3.3	Considerations on high-speed LED modulation	143
8.4	DMT modulation and variants	143
8.4.1	DC-biased DMT	145
8.4.2	Asymmetrically clipped optical OFDM (ACO-OFDM)	151
8.4.3	Pulse-amplitude-modulated discrete multitone (PAM-DMT)	152
8.4.4	DMT/OFDM performance and mitigation of disruptive effects	153
8.5	Performance enhancement of DMT modulation	155
8.5.1	Combination of ACO-OFDM and DC-biased DMT modulation	155
8.5.2	Spectrally factorized OFDM	156
8.5.3	Flip-OFDM	156
8.5.4	Unipolar OFDM	156
8.5.5	Position modulating OFDM	157
8.5.6	Diversity-combined OFDM	157
8.5.7	Further approaches	158
8.6	System design and implementation aspects	158
8.6.1	Aspects of system design	158
8.6.2	DMT/OFDM application in advanced systems	161
8.6.3	Practical implementation issues	163
8.6.4	Implementation and demonstration	165
8.7	Summary	170
<b>9</b>	<b>Image sensor based visible light communication</b>	<b>181</b>
	Shinichiro Haruyama and Takaya Yamazato	
9.1	Overview	181
9.2	Image sensors	181
9.2.1	CCD image sensor	182
9.2.2	CMOS image sensor	183
9.2.3	Comparing CCD image sensors, CMOS image sensors, and photodiodes (PD)	184
9.3	Image sensor as a VLC receiver	185
9.3.1	Temporal sampling	185
9.3.2	Spatial sampling	186
9.3.3	Maximal achievable data rate	187
9.4	Design of an image sensor based VLC system	187
9.4.1	Transmitter	187
9.4.2	Receiver	189
9.4.3	Channel	189
9.4.4	Field-of-view (FOV)	190
9.4.5	Effect of communication distance and spatial frequency	191

---

9.5	Massively parallel visible light transmission	192
9.5.1	Concept	192
9.5.2	System architecture	193
9.5.3	Link establishment	195
9.5.4	Prototype of a massively parallel data transmission system	195
9.6	Accurate sensor pose estimation	196
9.6.1	Overview	196
9.6.2	Single view geometry	196
9.6.3	Pose estimation using lights	198
9.6.4	Light extraction	199
9.7	Applications of image sensor based communication	201
9.7.1	Traffic signal communication	201
9.7.2	Position measurements for civil engineering	202
9.8	Summary	204
