# Contents

Series Preface.....	vii
Preface.....	ix
Editor .....	xi
Contributors .....	xiii
<b>Chapter 1</b> Discovery of Small Molecule EPAC Specific Modulators by High-Throughput Screening.....	1
<i>Xiaodong Cheng, Tamara Tsalkova, and Fang Mei</i>	
<b>Chapter 2</b> Cyclic Nucleotide Analogs as Pharmacological Tools for Studying Signaling Pathways .....	19
<i>Elke Butt</i>	
<b>Chapter 3</b> High-Throughput FRET Assays for Fast Time-Dependent Detection of Cyclic AMP in Pancreatic $\beta$ Cells.....	35
<i>George G. Holz, Colin A. Leech, Michael W. Roe, and Oleg G. Chepurny</i>	
<b>Chapter 4</b> Assessing Cyclic Nucleotide Recognition in Cells: Opportunities and Pitfalls for Selective Receptor Activation .....	61
<i>Rune Kleppe, Lise Madsen, Lars Herfindal, Jan Haavik, Frode Selheim, and Stein Ove Døskeland</i>	
<b>Chapter 5</b> Monitoring Cyclic Nucleotides Using Genetically Encoded Fluorescent Reporters.....	81
<i>Kirill Gorshkov and Jin Zhang</i>	
<b>Chapter 6</b> Structural Characterization of Epac by X-Ray Crystallography.....	99
<i>Holger Rehmann</i>	
<b>Chapter 7</b> Sensory Neuron cAMP Signaling in Chronic Pain.....	113
<i>Niels Eijkelkamp, Pooja Singhmar, Cobi J. Heijnen, and Annemieke Kavelaars</i>	

<b>Chapter 8</b>	Monitoring Real-Time Cyclic Nucleotide Dynamics in Subcellular Microdomains .....	135
	<i>Zeynep Bastug and Viacheslav O. Nikolaev</i>	
<b>Chapter 9</b>	Identifying Complexes of Adenylyl Cyclase with A-Kinase Anchoring Proteins .....	147
	<i>Yong Li and Carmen W. Dessauer</i>	
<b>Chapter 10</b>	Assessing Cyclic Nucleotide Binding Domain Allostery and Dynamics by NMR Spectroscopy.....	165
	<i>Bryan VanSchouwen, Madoka Akimoto, Stephen Boulton, Kody Moleschi, Rajanish Giri, and Giuseppe Melacini</i>	
<b>Chapter 11</b>	A Protocol for Expression and Purification of Cyclic Nucleotide-Free Protein in <i>Escherichia coli</i> .....	191
	<i>Jeong Joo Kim, Gilbert Y. Huang, Robert Rieger, Antonius Koller, Dar-Chone Chow, and Choel Kim</i>	
<b>Chapter 12</b>	Cyclic Nucleotide Analogues as Chemical Tools for Interaction Analysis .....	203
	<i>Robin Lorenz, Claudia Hahnefeld, Stefan Möller, Daniela Bertinetti, and Friedrich W. Herberg</i>	
<b>Chapter 13</b>	Dissecting the Physiological Functions of PKA Using Genetically Modified Mice .....	225
	<i>Brian W. Jones, Jennifer Deem, Linghai Yang, and G. Stanley McKnight</i>	
<b>Index</b> .....		255
