

TABLE OF CONTENTS

PREFACE	xi
ACKNOWLEDGEMENTS	xvii
CHAPTER 1 / DEFINING THE PROBLEM SITUATION	1
1.1. The Problem of Consonance	1
1.1.1. Zarlino's Redefinition of the Problem	3
1.1.2. Objections to the <i>Senario</i>	6
1.2. The Nature of the Scientific Revolution	7
1.2.1. The Science of Music Around 1600	10
1.3. Outline of Chapters 2 through 7	11
CHAPTER 2 / THE MATHEMATICAL APPROACH	13
2.1. Johannes Kepler	13
2.1.1. The Empirical Foundation	15
2.1.2. Distinguishing Consonance from Dissonance	16
2.1.3. The Genesis of Harmony	23
2.1.4. Passing by Acoustics	29
2.1.5. Conclusions	32
2.2. The Division of the Octave	34
2.2.1. The Incompatibility of the Pure Consonances	37
2.2.2. Summary	43
2.3. Simon Stevin	45
2.3.1. 'On the Theory of Music'	48
2.3.2. Preliminary Definitions	48
2.3.3. The Octave Comprises 6 Equal Tones	51
2.3.4. The Octave Comprises 12 Equal Semitones	53
2.3.5. Sustaining Arguments	57
2.3.6. A Musician's Critique	61
2.3.7. Contemporary Music	63
2.3.8. Conclusions	67
CHAPTER 3 / THE EXPERIMENTAL APPROACH	75
3.1. Giovanni Battista Benedetti	75
3.2. Vincenzo Galilei	78

3.2.1. The Singer's Dilemma	79
3.2.2. Smashing the <i>Senario</i>	82
3.2.3. Summary and Conclusions	83
3.3. Galileo Galilei	85
3.3.1. Pendulums and Resonance	87
3.3.2. The Coincidence Theory of Consonance	90
3.3.3. Conclusions	92
3.4. The Nature of the Coincidence Theory	94
3.5. Marin Mersenne	97
3.5.1. The 'Abstract of Musical Theory'	100
3.5.2. Some Properties of Sound	101
3.5.3. The Coincidence Theory Put to the Test	103
3.5.4. The Division of the Octave	111
3.5.5. Quantifying All Possible Music	112
3.5.6. Conclusions	114
 CHAPTER 4 / THE MECHANISTIC APPROACH	 115
4.1. Isaac Beeckman	116
4.1.1. The Corpuscular Theory of Sound	120
4.1.2. The Nature of Consonance	127
4.1.3. Musical Instruments	147
4.1.4. Intermezzo: Consolations for the Physicist	149
4.1.5. The Division of the Octave	151
4.1.6. Conclusions	157
4.2. René Descartes	161
4.2.1. The 'Compendium of Music'	161
4.2.2. The Scientific Analysis of Musical Beauty	166
4.2.3. The Perception of Consonance	172
4.2.4. Conclusions	175
 CHAPTER 5 / CONTACTS AND CRITICISMS	 180
5.1. The Renaissance Theorists	181
5.2. The Early Physicists	182
5.2.1. Benedetti	183
5.2.2. Vincenzo Galilei	183
5.3. The Mathematicians	184
5.3.1. Stevin	184
5.3.2. Kepler	185
5.4. The Mersenne Circle	187

TABLE OF CONTENTS

ix

5.4.1. Prologue: Beeckman Meets Young Descartes	188
5.4.2. Beeckman, Descartes, and Mersenne	190
5.5. Galileo Galilei	201
5.6. Conclusion	202
CHAPTER 6 / AN EXAMPLE FROM THE SECOND GENERATION	205
6.1. The Prevalence of the Coincidence Theory	206
6.2. Christiaan Huygens	209
6.2.1. The Theory of Consonance	210
6.2.2. The Division of the Octave	214
6.2.3. The Consonance of the Intervals with 7	225
6.2.4. Conclusion	228
CHAPTER 7 / CONCLUSIONS	231
7.1. 2500 Years since Pythagoras	231
7.1.1. What Had Been Accomplished and What Not	231
7.1.2. What Was To Be Accomplished	234
7.2. Music as a Science: Implications and Perspectives	243
7.2.1. The Scientific Revolution	243
7.2.2. Music as an Art and Music as a Science	250
7.2.3. The Victory of the Coincidence Theory: An Example of Theory Replacement	254
7.2.4. Quest Without End	258
