

TABLE DES MATIÈRES

Résumés des articles	xi
Abstracts	xv
D. GAITSGORY — <i>Outline of the proof of the geometric Langlands conjecture for GL_2</i>	1
Introduction.....	1
1. A roadmap to the contents.....	15
2. The theory of singular support.....	24
3. Statement of the categorical geometric Langlands conjecture.....	34
4. The Hecke action.....	38
5. The Whittaker model.....	47
6. Parabolic induction.....	62
7. The degenerate Whittaker model.....	75
8. The extended Whittaker model.....	82
9. The gluing procedure.....	87
10. Compatibility with Kac-Moody localization and opers.....	94
11. The proof modulo the conjectures.....	102
References.....	110
T. HAUSEL & F. RODRIGUEZ VILLEGAS — <i>Cohomology of large semiprojective hyperkähler varieties</i>	113
1. Semiprojective varieties.....	115
2. Arithmetic harmonic analysis on symplectic quotients: the microscopic picture.....	124
3. Visual distribution of Betti numbers: the big picture.....	131
4. Asymptotic shape of Betti numbers: the macroscopic picture.....	136
5. Results and speculations on the asymptotics of discrete distributions.....	148
6. Appendix.....	150
References.....	152
