	Foreword	13		Editors' remarks	16
	Preface	15		The authors	18
1.	The Schirmacher Oasis as a part of Queen Maud Land (D. FRITZSCHE & P. BORMANN)	21	1.3.2.1.3.3.	Hydrological studies of lakes within the Schirmacher Oasis	32
1.1.	About Antarctic oases in general and the geographical setting of the Schirmacher Oasis in particular	21	1.3.2.1.3.4.	Physico-geographical and geological studies of the Schirmacher Oasis	32
1.2.	History of discoveries and first investigations in Queen Maud Land	27	1.3.2.1.3.5.	Biological investigations	32
1.3.	Systematic investigations of the Schirmacher Oasis and its surroundings since 1959	28	1.3.2.2.	Major geographic-geological surveys and geophysical and aerophotogrammetric mapping of the eastern mountain region of Queen Maud Land	32
1.3.1.	Contributions of the Norwegian Antarctic Expedition in 1958-59	28	1.3.3.	Investigations of the Indian Antarctic Expedition	33
1.3.2.	Investigations of the Soviet Antarctic Expedition	29	1.3.3.1.	India's interest in Antarctica	33
1.3.2.1.	The wintering stations Lasarev and Novolazarevskaya - their observatory registrations and field programmes	29	1.3.3.2.	Indian Antarctic Expeditions and main results of investigations in the area of the Schirmacher Oasis and its surroundings	34
1.3.2.1.1.	Logistical bases	29	1.3.4.	Contributions by German investigators	35
1.3.2.1.2.	Regular Soviet observatory programmes	30	1.3.4.1.	Origin of scientific interest in the Schirmacher Oasis and the establishment of the Georg Forster Station	35
1.3.2.1.3.	Field studies in the surroundings of the stations	30	1.3.4.2.	Observational programmes at Georg Forster Station	35
1.3.2.1.3.1.	Glaciological studies at the Lazarev and Novolazarevskaya Ice Shelves	30	1.3.4.3.	Field observations within and in the surroundings of the Schirmacher Oasis	38
1.3.2.1.3.2.	Geophysical investigations	31			

2.	Geophysical investigations (P. BORMANN, U. SCHÄFER, C. KOPSCH & S. WAGNER)	39	2.2.1.	Review of former geophysical field investigations in Queen Maud Land	44
2.1.	Permanent geomagnetic recordings	39	2.2.2.	Geomagnetic field measurements by GDR teams	47
2.1.1.	Recording environment, requirements and facilities	39	2.2.2.1.	Measuring of variation differences	49
2.1.2.	Recording of the total intensity F	41	2.2.2.2.	Geomagnetic mapping of the Schirmacher Oasis and profile measurements in its surroundings: data, results and geological implications	51
2.1.3.	Recording of the variation field	42			
2.2.	Geophysical field investigations	44			
3.	Geology (H.-J. PAECH & W. STACKEBRANDT)	59	3.2.4.	Photogeological indications (E. BANKWITZ & P. BANKWITZ)	112
3.1.	Geological setting and former investigations (H.-J. PAECH)	59	3.2.4.1.	Rock series	112
3.2.	Schirmacher Oasis	62	3.2.4.2.	Fault zones	114
3.2.1.	Lithostratigraphy (W. STACKEBRANDT)	62	3.3.	The Nunatak region (H.-U. WETZEL)	115
3.2.2.	Tectonics (W. STACKEBRANDT)	68	3.3.1.	The Nunatak Metamorphic Complex	117
3.2.2.1.	Planar structures	68	3.3.1.1.	Nunatak Palets	117
3.2.2.2.	Linear structures	70	3.3.1.2.	Nunatak Aerodromnaya	118
3.2.2.3.	Fault structures and dykes	74	3.3.1.3.	Nunatak 870 m	118
3.2.2.4.	Structure and kinematics of the Lake 55 m fault zone by means of petromagnetic fabric analysis (V. DAMM)	80	3.3.1.4.	Nunatak Südnachbar	120
3.2.3.	Petrography and petrochemistry	84	3.3.1.5.	Southern IGA Rocks	120
3.2.3.1.	Metamorphics (G. ANDREHS & P. BORMANN)	84	3.3.2.	The Schirmacher Oasis Metamorphic Complex	122
3.2.3.1.1.	Methodology	88	3.3.2.1.	Nunatak Basisniy	123
3.2.3.1.2.	Classification of rock types	88	3.3.2.2.	Nunatak Kit	125
3.2.3.1.3.	Investigation of rock deformation	88	3.4.	Generalization of the geological history of the Schirmacher Oasis and Nunatak Metamorphic Complexes (H.-J. PAECH, W. STACKEBRANDT & H.-U. WETZEL)	126
3.2.3.1.4.	Mylonitization in fault zones	95	3.4.1.	Lithostratigraphic succession	126
3.2.3.1.5.	Characterization of metamorphism	97	3.4.2.	History of endogenic processes	130
3.2.3.1.6.	Conclusions	108			
3.2.3.2.	Dykes (U. WAND)	109			

3.5.	Wohlthat Massif (H. KÄMPF, W. STACKEBRANDT, K. HAHNE, H.-J. PAECH & V. S. LEPIN)	133	3.5.4.1.	Structural features	153
3.5.1.	Introduction	133	3.5.4.2.	Folding and schistosity	156
3.5.2.	Eliseev Anorthosite Complex	134	3.5.4.3.	Fracture tectonics	158
3.5.2.1.	Introduction	134	3.5.4.4.	Magmatic veins	158
3.5.2.2.	Magmatic features	137	3.6.	Mineralizations in central Queen Maud Land (H. KÄMPF)	159
3.5.2.3.	Metamorphic structures and textures	142	3.6.1.	Mineralization associated with metamorphics	160
3.5.2.4.	Chemical composition	144	3.6.2.	Mineralization associated with anorthosite and gabbro	161
3.5.2.5.	Fracture tectonics and non-metamorphic dyke rocks	145	3.6.3.	Mineralizations in granitoids and pegmatites	164
3.5.2.6.	Ages and isotopic compositions	145	3.6.4.	Hydrothermal mineralizations	164
3.5.3.	Rock assemblages covered by ice (K. HAHNE, P. VOGLER & R. LEWIS)	146	3.7.	Conclusions on the structure, composition and history of the Earth's crust in central Queen Maud Land (P. BORMANN, H.-J. PAECH & W. STACKEBRANDT)	164
3.5.4.	Photogeological structures of the basement of the Wohlthat Massif (P. BANKWITZ & E. BANKWITZ)	152			
4.	Geomorphology (W. RICHTER & P. BORMANN)	171	4.4.2.2.	Results (W. KRÜGER & P. BORMANN)	191
4.1.	Introduction	171	4.4.2.2.1.	Data for bedrock	191
4.2.	Overview of the macro-relief between the ice shelf barrier and the Wegener Inland Ice	171	4.4.2.2.2.	Temperature data for unconsolidated rock and soil	193
4.3.	Characterization of landforms in the Schirmacher Oasis	176	4.4.2.2.3.	Soil moisture data for unconsolidated rock and soil	196
4.3.1.	General characterization of landforms	176	4.4.2.2.4.	Discussion of results on rock and soil temperature as well as soil moisture measurements with regard to frost and insolation weathering in the Schirmacher Oasis (W. KRÜGER & P. BORMANN)	197
4.3.2.	Structural geomorphology	178	4.4.3.	Special forms of weathering	199
4.3.3.	Surface forms due to glacial erosion and deposition	180	4.4.3.1.	Chemical weathering and initial processes of pedogenesis	199
4.3.4.	Surface water geomorphology	189	4.4.3.2.	Salt efflorescences (U. WAND)	201
4.4.	Weathering processes	190	4.4.3.3.	Cavernous weathering (J. BALKE & W. RICHTER)	204
4.4.1.	Background and scope	190	4.4.3.4.	Wind action (W. RICHTER)	206
4.4.2.	Frost and insolation weathering	190			
4.4.2.1.	Measuring programme (W. KRÜGER)	190			

5.	Weather and climate (W. RICHTER & P. BORMANN)	207	5.2.2.1.	Solar radiation	212
5.1.	General climatic conditions	207	5.2.2.2.	Air temperature	212
5.2.	Local climatic conditions and variability of essential elements of the macro-climate in the Schirmacher Oasis	208	5.2.2.3.	Wind direction and velocity	214
5.2.1.	General peculiarities of oasis climate	208	5.2.2.4.	Precipitation	216
5.2.2.	Elements of macro-climate in the Schirmacher Oasis and their variability	212	5.2.2.5.	Humidity	217
			5.2.2.6.	Cloudiness	217
			5.3.	Isotope variations in atmospheric moisture and precipitation (P. KOWSKI)	217
6.	The continental ice cover in the surroundings of the Schirmacher Oasis (W.-D. HERMICHEN)	221	6.5.	Isotope studies on the glacio-climatic history of the area	229
6.1.	Antarctic ice and world climate	221	6.6.	Some remarkable morpho- logical minor forms of the snow and ice surface (W. RICHTER)	232
6.2.	Regional survey	222	6.7.	Moraines around Lake Untersee - indicators of the Late-Quaternary regional glacial history (W. STACKEBRANDT)	237
6.3.	Survey of former glaciological investigations	222			
6.4.	Present structure and dynamics of the regional ice cover	222			
7.	Satellite sea ice observations in the Atlantic sector of the Southern Ocean (H. GERNANDT)	243	7.3.	The break-up of ice shelf areas (H. GERNANDT, P. GLÖDE & J. SCHMECHEL)	248
7.1.	General introduction	243	7.3.1.	Introduction	248
7.2.	Long-term variations of the sea ice edge (H. GERNANDT, K. DRESCHER & L. THARANG)	243	7.3.2.	Satellite observations of the Filchner Ice Shelf's break-up	250
7.2.1.	Data evaluation	243	7.4.	Typical sea ice distribution as a response to the circulation of the Southern Ocean (H. GERNANDT & P. GLÖDE)	254
7.2.2.	Mean seasonal variations	245	7.4.1.	Data interpretation	254
7.2.3.	Anomalies of sea ice distribution	246	7.4.2.	Typical sea ice distributions	254
7.2.4.	Interannual variations	247	7.4.3.	Discussion	256
7.2.5.	Conclusions	247	7.4.4.	Conclusions	258

8.	Hydrology (W. RICHTER & P. BORMANN)	259	8.4.4.	Dissolved oxygen (E. KAUP)	293
8.1.	General remarks	259	8.4.5.	pH-values (E. KAUP & D. HAENDEL)	295
8.2.	Fundamentals of physical geography	260	8.4.6.	Isotope hydrological conditions (W. RICHTER)	296
8.2.1.	Hydrographic relevance of geology and topography	260	8.4.6.1.	General remarks	296
8.2.2.	Meteorological and hydro- meteorological conditions	263	8.4.6.2.	δ D values of pools	296
8.3.	Distribution, formation and morphology of water bodies and catchment areas in the Schir- macher and Untersee Oases	266	8.4.6.3.	δ D variations in lakes of medium size and depth (Lake POMORNIK type)	297
8.3.1.	Running waters	266	8.4.6.4.	δ D variations in large and deep lakes (Lake GLUBOKOYE type)	297
8.3.2.	Standing waters	269	8.4.6.5.	δ D variations in large and shallow lakes (Lake ZUB type)	299
8.3.2.1.	Schirmacher Oasis	269	8.4.6.6.	δ D variations in epishelf lakes (Lake KAROVOYE type)	300
8.3.2.2.	Obersee and Untersee Oases	274	8.4.7.	Trace metals in aerosols and waters (L. BRÜGMANN & D. HAENDEL)	300
8.3.2.3.	Classification of lake basins	274	8.4.8.	On the entry of weathering products into surface waters (D. HAENDEL)	305
8.3.3.	Watersheds and catchment areas	277	8.4.9.	Hydrogeochemistry (U. WAND)	309
8.3.4.	General features of water budget in the Schirmacher Oasis	278	8.5.	Nutrients and primary production (D. HAENDEL & E. KAUP)	312
8.4.	Physical and hydrochemical properties of water bodies (D. HAENDEL, E. KAUP, A. LOOPMANN & U. WAND)	279	8.5.1.	Nutrients (D. HAENDEL & E. KAUP)	312
8.4.1.	Snow and ice cover of water bodies (E. KAUP & D. HAENDEL)	279	8.5.2.	Chlorophyll <i>a</i> and primary production (E. KAUP)	316
8.4.2.	Solar radiation in water bodies (E. KAUP)	286			
8.4.3.	Thermal regime of water bodies (E. KAUP, D. HAENDEL & A. LOOPMANN)	290	9.2.2.2.	Description of selected species	333
9.	Biology (W. RICHTER)	321	9.2.3.	Bryophytes in the Schir- macher Oasis (W. RICHTER)	341
9.1.	Introduction	321	9.3.	Animals	342
9.2.	Cryptogamic plants	322	9.3.1.	Birds	342
9.2.1.	Algae (H. PANKOW & D. HAENDEL)	322	9.3.2.	Radiocarbon study of solidified stomach oil deposits (U. WAND)	346
9.2.2.	Lichen flora (W. RICHTER)	331	9.3.3.	Seal mummies (W. RICHTER)	347
9.2.2.1.	General remarks	331			

10.	Contribution to ionospheric, geomagnetic and middle atmosphere observations in high southern latitudes (H. GERNANDT)	349	10.4.	Instrumental auroral observations (A. GRAFE)	357
10.1.	General remarks	349	10.4.1.	Observational equipment	357
10.2.	Investigations of the ionospheric plasma (J. BREMER)	350	10.4.2.	Results	358
10.2.1.	Observational conditions	350	10.4.3.	Conclusions	361
10.2.2.	Normal ionospheric variations	351	10.5.	The vertical ozone distribution in the southern polar stratosphere (H. GERNANDT)	361
10.2.3.	Events of precipitating high energetic particles	352	10.5.1.	Introduction	361
10.2.4.	Control of particle precipitation by inter-planetary structure parameter	353	10.5.2.	Observations at Georg Forster Station	362
10.2.5.	Conclusions	354	10.5.3.	The morphology of the ozone distribution in the southern polar stratosphere	362
10.3.	Results of ground-based pulsation data (A. BEST)	356	10.5.4.	The dynamical control	366
10.3.1.	Data	356	10.5.5.	Comparison with model calculations	369
10.3.2.	Results	356	10.5.6.	Solar forcing and interannual variations	370
10.3.3.	Conclusions	357	10.5.7.	Conclusions	373
