Preface	ix
The Author	xix
Part One: A Flexible Model for Fostering Cognitive Development	1
1. Understanding Cognitive Development and Change in Young Adults	3
Kelly's Role Construct Theory • Social Psychology: Concepts of Cognitive Dissonance and Attribution • Ellis's Rational-Emotive Therapy Approach • The Cognitive-Behavioral Approach • Cognitive Development Theory • Representational Theory • Other Influential Theories • Value of Cognitive Approaches for Student Development Interventions	
2. The Model and Its Use in Assessing Developmental Needs	33
Overview of the Model • Phase 1: Identifying Important Cognitive Events • Phase 2: Assessing Cognitive Systems •	

	Phase 3: Assessing Cognitive Development • Assessment of Phases 1–3 • Summary and Conclusions	
3.	Completing Assessment and Planning the Intervention	71
	Ways of Creating Cognitive Change • Phase 4: Formulations of Problem, Client, and Process • Phase 5: Identifying Goals • Three Individual Counseling Strategies • Summary and Conclusions	
	Part Two: Using the Model in Counseling with Individuals and Groups	107
4.	Counseling Individuals: Building Rapport and Encouraging Self-Exploration	109
	Facilitating Communication and Self-Exploration • Cognitive-Focused Interviewing • Perspective-Challenging Responses • Remembering the Principles of Challenge and Support • Summary and Conclusions	
5.	Helping Clients Develop Cognitive Coping Skills	140
	Helping the Client Formulate the Problem • Developing Commitment to Coping Skills Training • Setting Goals for the Intervention • Early-Detection Training • Analyzing Cognitions and Developing Coping Skills • Helping the Client “Own” Coping Methods • Termination of Counseling • Summary and Conclusions	
6.	Focusing on Old and New Experiences in the Change Process	176
	Managing Issues of Resistance and Control • Focusing on Cognitive Dissonance Contained in Previous Experiences • Improving Cognitive Development by Introducing New Experiences • Summary and Conclusions	
7.	Applying Cognitive Approaches in Group Counseling	207
	Value of Groups in Enhancing Cognitive Complexity • Potential Negative Effects of Groups on Cognitive Development • Applying the Cognitive Intervention Planning Model •	

Assessing and Screening Potential Group Members • Use of Principles of Challenge and Support • Importance of Group Cohesion and Interaction • Observing, Formulating, and Intervening in Group Process • Leadership Style and Cognitive Development • Group Leadership Skills • Group Involvement Exercises • Using Humor in Group Counseling • Summary and Conclusions

8. Designing and Leading Structured Groups and Workshops 236

Enhancing Learning Opportunities in Groups and Workshops • The Planning Model in Structured Groups • Considerations for Leading Structured Groups • Outreach Workshops: A Different Direction • The Planning Model in Psychoeducational Workshops • Benefits and Liabilities of Outreach Workshop Interventions • Considerations in Conducting Outreach Education Workshops • Designing and Conducting Brief Workshops • Summary and Conclusions

Part Three: Applications to Specific Developmental Needs in Groups and Workshops 265

- A. Managing Evaluative Anxiety 267
- B. Stress Management 275
- C. The Cognitive Style of Perfectionism 283
- D. Assertiveness Training 287
- E. Social Skills and Shyness 295
- F. Developing Self-Confidence 302
- G. Career Planning 308
- H. Workshop: “Developing Self-Image” 317
- I. “Learning How the Other Half Lives and Thinks”: A Workshop for Exploring Social Expectations 322

J. Brief Workshop on “Stress Management”	328
Conclusion: Using Cognitive Approaches in Student Counseling Research and Practice	333
Cognitive Approaches and Research • Cognitive Interven- tion Approaches • Applications of the Model to Other Pro- fessional Activities • Conclusion
