<i>Preface</i>	ix
<i>List of figures</i>	xiii
<i>List of abbreviations and notational conventions</i>	xiv
<i>Latin authors and works cited in abbreviation</i>	xvii
<b>1 Introduction</b>	<b>1</b>
1.1 The starting point: vowel length in Classical Latin	1
1.2 The long-term trend: Latin harbingers of the loss of CVL	9
1.3 Structure of the argument and aims of the book	12
<b>2 Vowel length in the Latin–Romance transition</b>	<b>18</b>
2.1 Change in Latin VL: metalinguistic testimonies and the rise of OSL	20
2.2 Why OSL must be Proto-Romance: excluding conceivable alternatives	25
2.2.1 OSL at a later date, and only in some Romance languages	25
2.2.2 OSL in Republican Latin?	30
2.3 The rise of OSL and the regional diversification of Latin	40
2.3.1 Evidence from metrical inscriptions, part 1: Herman (1982)	41
2.3.2 Evidence from metrical inscriptions, part 2: Adams (1999)	46
2.3.3 Latin and Romance in Africa	47
2.4 Quality is not quantity, after all	51
2.5 Intermediate summary and provisional conclusion	57
<b>3 The development of VL in Romance</b>	<b>61</b>
3.1 Three types of distribution of VL in the Romance languages	61
3.2 In defence of Open Syllable Lengthening in modern Standard Italian	65
3.3 The eastern and western peripheries of Romance	75
3.4 Northern Romance	80
3.4.1 Northern Italo-Romance	82
3.4.2 Gallo-Romance	101
3.4.3 (The rest of) Rhaeto-Romance	108
3.5 Summing up: VL and OSL from Proto-Romance to the modern languages	115
<b>4 The analysis of Northern Romance vowel length</b>	<b>121</b>
4.1 Competing analyses of the rise of CVL in Northern Italo-Romance	121
4.1.1 Formal accounts of the rise of VL in Milanese	124
4.1.2 Competing explanations of the rise and status of VL in Friulian	129
4.1.3 Alternative formal accounts for the rise of VL in Cremonese	132

4.2	Diachronic phonology, generative grammar, and method in historical linguistics	133
4.3	Too much synchrony into diachrony, too much diachrony into synchrony	138
5	Dialect variation and comparative reconstruction	145
5.1	At the vanguard of change: the fading of contrastive VL in Northern Italo-Romance	147
5.1.1	Loss of CVL in peripheral Friulian dialects	148
5.1.2	The areal pattern of CVL in Liguria and Piedmont	149
5.1.3	The fading of CVL in Alpine and Eastern Lombard	152
5.1.4	The position of Venetan	163
5.2	Apocope and the rise of contrastive VL in Northern Romance	164
5.2.1	On the non-co-occurrence of CVL and apocope	165
5.2.2	The gradual spread of apocope in Northern Italo-Romance	168
5.3	The rearguard of change: at the source of VL in Northern Romance	172
5.3.1	Geminate consonants and VL in Alpine Lombard	174
5.3.2	On the southern periphery of Northern Romance	184
5.3.3	Phonetic gradience in vowel and consonant length and the change from PRom gemination to NRom CVL	190
5.3.4	A closer look at Western Romance degemination	194
5.3.5	The odd one out: CVL without degemination south of the Apennines?	200
5.4	Making sense of the comparative picture	203
5.4.1	A phonetic constraint on vowel length: rhythmical compensation	208
5.4.2	Romance oxytones and VL	214
5.5	Taking stock of the reconstructive evidence	223
6	In lieu of a conclusion	227
	<i>Appendix: Language and dialect maps</i>	241
	<i>References</i>	250
	<i>Index of languages</i>	287
	<i>Index of names</i>	293
	<i>Index of subjects</i>	300
