<b>1</b>	<b>Chemistry of the Group 13 metals: some themes and variations</b>	<b>1</b>
	A.J. DOWNS	
1.1	Introduction: some characteristics of the Group 13 elements	1
1.2	History and occurrence	14
1.2.1	History	14
1.2.2	Occurrence	16
1.3	Physical properties of metal atoms	19
1.3.1	Nuclear properties: isotopes	19
1.3.2	Properties of the atoms	35
1.4	Chemical properties of the elements and their compounds	39
1.4.1	Choice of oxidation state: +1, +2 or +3?	39
1.4.2	Coordination chemistry of the metals	46
1.4.3	Structural aspects	49
1.4.4	Compounds with metal-metal bonds	65
1.5	Organisation of subsequent chapters	70
	References	72
<b>2</b>	<b>The elements</b>	<b>81</b>
	I.J. POLMEAR	
2.1	Characteristics and physical properties	81
2.2	Extraction and refining of aluminium	83
2.2.1	Bayer process for alumina production	84
2.2.2	Alternative sources of alumina	85
2.2.3	Production of aluminium by the Hall-Héroult process	85
2.2.4	Alternative methods for producing aluminium	87
2.3	Production of gallium, indium and thallium	88
2.3.1	Production of gallium	88
2.3.2	Production of indium	89
2.3.3	Production of thallium	90
2.4	Alloying of aluminium	91
2.4.1	Alloying elements	91
2.4.2	Classification of aluminium alloys	92
2.4.3	Non-heat treatable alloys	93
2.4.4	Heat treatable alloys	95
2.4.5	Corrosion behaviour	98
2.4.6	New developments in aluminium alloys	100
2.5	Uses of the elements	103
2.5.1	Aluminium and its alloys	103
2.5.2	Uses of gallium	105
2.5.3	Uses of indium	106
2.5.4	Uses of thallium	108
	References	109
<b>3</b>	<b>Inorganic derivatives of the elements</b>	<b>111</b>
	M.J. TAYLOR and P.J. BROTHERS	
3.1	Introduction	111
3.2	Derivatives of the trivalent state	118
3.2.1	Hydrides	118

3.2.2	Binary halides	128
3.2.3	Derivatives with bonds to oxygen	138
3.2.4	Derivatives with bonds to sulfur, selenium or tellurium	161
3.2.5	Derivatives with bonds to Group 15 atoms	168
3.2.6	Derivatives with bonds to boron or Group 14 atoms	181
3.2.7	Pseudohalide derivatives	190
3.3	Derivatives of the lower valence states	191
3.3.1	Low oxidation states in Group 13	191
3.3.2	Low-valent hydrides	195
3.3.3	Low-valent halides	198
3.3.4	Low-valent oxides, hydroxides, alkoxides and oxyanion salts	207
3.3.5	Low-valent sulfides, selenides and tellurides	211
3.3.6	Low-valent carbonyls and organometallic derivatives	215
3.4	Intermetallic derivatives	216
3.4.1	Molecular species	216
3.4.2	Intermetallic compounds	217
3.4.3	Group 13 transition-metal carbonyl derivatives	226
	References	230
<b>4</b>	<b>Properties and uses of oxides and hydroxides</b>	<b>248</b>
	<b>K.A. EVANS</b>	
4.1	Aluminium oxides and hydroxides	248
4.2	Nomenclature	249
4.3	Physical properties and methods of synthesis	249
4.3.1	Aluminium hydroxides	249
4.3.2	Aluminium oxide hydroxide	252
4.3.3	Aluminium oxide	253
4.3.4	Uses of aluminium hydroxides	257
4.3.5	Uses of aluminium oxide	266
4.4	Activated alumina	280
4.4.1	Introduction	280
4.4.2	Production of activated alumina	281
4.4.3	Uses of activated alumina	282
4.5	Oxides and hydroxides of gallium, indium and thallium	284
4.5.1	Gallium oxides: forms, preparation and structure	284
4.5.2	Uses of gallium(III) oxide	285
4.5.3	Gallium hydroxides: forms and preparation	285
4.5.4	Indium oxides	285
4.5.5	Uses of indium oxides	286
4.5.6	Indium hydroxide	286
4.5.7	Thallium oxides	286
4.5.8	Thallium hydroxide	287
4.5.9	Superconductivity of thallium-containing compounds	287
4.5.10	Superconducting components containing aluminium or gallium	288
