

CONTENTS

Preface	5
I. PIONEERS IN WORD COUNTING	9
II. GENERAL PLAN OF THE PRESENT STUDY.	13
III. PREPARATORY WORK	15
Choice of System of Phonemic Notation	15
Selection of Informant	15
Informant's Phonemics	16
Recording the Corpus.	16
Phonemic Transcription of the Corpus	16
Recomputation of Phoneme Frequencies	17
Choice of Etymological Authority	19
Manner of Recording Etymological Sources	20
Recomputation of Etymological Frequencies	22
Choice of Word Count for Use in this Study	22
Review of the Criteria for Selection of Word Count	27
IV. PROCESSING THE DATA	31
V. RESULTS OF THE INVESTIGATION	34
Relationship between Alphabetic and Phonemic Codes.	35
The Etymological Composition of English	35
Phoneme Frequencies	38
Statistical Analysis of Phoneme Frequencies	42
Vowel/Consonant Ratio	44
Word Length in Phonemes and in Syllables	44
Canonical Forms	48
Canonical Forms with Respect to Manner of Articulation	51
Canonical Forms with Respect to Points of Articulation	52
Transitional Probabilities for Sequences of Two Phonemes	52

Transitional Probabilities for Word-Initial Phoneme Sequences . . .	57
Entropy and Redundancy	57
Initial Consonants and Consonant Clusters	60
Intervocalic Consonants and Consonant Clusters	60
Final Consonants and Consonant Clusters	61
VI. PREVIOUS STUDIES OF SPEECH SOUNDS	62
BIBLIOGRAPHY	64
APPENDICES	67
I. Etymological Composition of English	69
II. Relative Frequency of Segmental Phonemes	81
III. Relative Frequency of Vowels	95
IV. Relative Frequency of Consonants and Semivowels	100
V. Phoneme Proportions by Number and Frequency for Each Decile. .	111
VI. Word Length in Phonemes.	113
VII. Word Length in Syllables	116
VIII. Joint Frequency Distribution of Word Length by Syllable and Phoneme Number	118
IX. Canonical Forms of Consonant, Vowel, Semivowel	126
X. Canonical Forms by Manner of Articulation of Phonemes	159
XI. Canonical Forms by Place of Production of Phonemes	262
XII. Transitional Probabilities for Sequences of Two Phonemes	340
XIII. Transitional Probabilities for Word-Initial Phoneme Sequences . . .	357
XIV. Entropy and Redundancy based on Phoneme Frequencies by Decile. .	395
XV. Entropy and Redundancy based on Word Length in Phonemes by Decile.	396
XVI. Entropy and Redundancy based on Word Length in Syllables by Decile.	397
XVII. Initial Consonants and Consonant Clusters	398
XVIII. Intervocalic Consonants and Consonant Clusters including Pre-Consonantal Off-Glides	400
XIX. Final Consonants and Consonant Clusters including Pre-Consonantal Off-Glides	411
XX. Intervocalic Consonants and Consonant Clusters	417
XXI. Final Consonants and Consonant Clusters	425
XXII. Phonemic Transcription of the First Decile.	428
