	Acknowledgements	xi
Part One	In Theory	1
Chapter 1	Genetics, Schools, and Learning	3
	The Aims and Assumptions of Education	4
	Diverse Opportunities to Draw Out Individual Potential	8
	DNA in the Classroom	10
	In Summary . . .	11
Chapter 2	How We Know What We Know	14
	Twins: A Natural Experiment	15
	DNA Sequencing	18
Chapter 3	The 3Rs: Reading, wRiting . . .	22
	From DNA to ABC	24
	Environmental Influences on Reading Ability	31
	Struggling Readers	34
	The Genetics of Writing Ability	38
Chapter 4	. . . and 'Rithmetic	42
	So, Why are Some People Better at Math than Others?	43

	How does Nurture Affect Mathematical Ability?	52
Chapter 5	Physical Education: Who, What, Why, Where, and How?	57
	Genes, Sports, and Smoking	62
	Obesity, Genes, and Environment	64
	The Heritability of Fitness	67
	Gym Class Heroes	69
	In Summary . . .	74
Chapter 6	Science: A Different Way of Thinking?	78
	Differences Between the Sexes	85
	In Summary . . .	87
Chapter 7	How do IQ and Motivation Fit In?	89
	IQ + Genetics = Controversy (and Name-calling)	95
	Self-Confidence and Motivation	98
	Improving Confidence and Cognition in the Classroom	100
Chapter 8	Special Educational Needs: Ideas and Inspiration	105
	The Expansion of Special Educational Needs	110
	Personalized Learning in Action	113
	In Summary . . .	114
Chapter 9	“Clones” in the Classroom	115
	Positivity and Achievement	122
	Clones in the Classroom	122
Chapter 10	Mind the Gap: Social Status and School Quality	126
	Low SES: What Does It Look Like?	129
	What Does the Heritability of SES Mean?	133
	School Quality	136

Chapter 11	Genetics and Learning: The Big Ideas	141
	Big Idea #1: Achievement and Ability Vary, Partly for Genetic Reasons	141
	Big Idea #2: The Abnormal is Normal	142
	Big Idea #3: Continuity is Genetic and Change is Environmental	143
	Big Idea #4: Genes are Generalists and Environments are Specialists	144
	Big Idea #5: Environments are Influenced by Genes	144
	Big Idea #6: The Environments that Matter Most are Unique to Individuals	145
	Big Idea #7: Equality of Opportunity Requires Diversity of Opportunity	146
Part Two	In Practice	147
Chapter 12	Personalization in Practice	149
	So, What Can Be Done to Make Teaching and Learning More Personalized?	150
	A Good “Mindset” for Learning	153
	Other Ways to Personalize Learning	158
	In Summary . . .	159
Chapter 13	Eleven Policy Ideas	161
	1. Minimize the Core Curriculum and Test Basic Skills	161
	2. Increase Choice	163
	3. Forget About Labels	165
	4. Teach the Child, As Well As the Class	166
	5. Teach Children How To Succeed	168
	6. Promote Equal Opportunities from an Early Age as a Foundation for Social Mobility in the Future	170
	7. Equalize Extracurricular Opportunities at School	172

	8. Create a Two Stage PE Program	172
	9. Change the Destination	173
	10. Train New Teachers in Genetics and Give Them the Tools to Put it Into Practice	175
	11. Big Is Beautiful	177
Chapter 14	Education Secretary for a Day	178
	Index	189
