Table of Contents

Introduction 15

1. The fascination of financial markets *15*

1.1 Three groups of financial market participants 15
1.2 Demand for understanding 18
1.3 Research 19
1.4 Asset Pricing Models 21

2. Complications ahead *23*

3. Roadmap for resolution *24*

4. Overview of the thesis *27*

Chapter 2: 29

Asset Pricing Models, Theories and Assessment 29

Introduction *29*

1. Asset pricing data and models *32*

1.1 Financial market data 34
1.2 Two groups of asset pricing models 39
1.3 Factor-based asset pricing models 40

2. Financial market facts and a story *46*

2.1 The financial market facts 46
2.2 The financial market story 49

3. Investor, utility and risk *53*

3.1 The Investor 53
3.2 Inter-temporal consumption choice and utility 55
3.3 Marginal rate of substitution 57
3.4 Investment risk and contingent consumption 59
3.5 Risk preference 62

4. The consumption based asset pricing model *66*

4.1 The basic pricing equation 66
4.2 The first order condition and the central asset pricing formula 67
4.3 The stochastic discount factor 69
4.4 The covariance 71

5. From individual optimization to equilibrium asset pricing *74*

5.1 Simplifications with respect to the investor 76
5.2 Simplifications with respect to financial markets 77
5.3 Simplifications with respect to financial assets 78
5.4 Equilibrium 79

6. ***Assessing the CCAPM*** ***81***

6.1 The research question 82
6.2 The complication 83
6.3 Three avenues of rectification 87
6.3.1 Data 87
6.3.2 Theoretical understanding 88
6.3.3 Incorporating Non-Standard Preferences 90
6.3.4 Habit-persistency 92
6.4 Evaluation of the suggested solutions 96
6.5 Recent work on consumption based models 98

Chapter 3: **101**

CCAPM Theory, Assumptions and Research Programme **101**

Introduction ***101***

1. ***The microeconomic foundation*** ***104***

1.1 The investor 107
1.1.1 From the "whole man" to the representative investor 108
1.1.2 The triad of temperaments 112
1.2 The domain of the financial market activity 116
1.2.1 The financial market domain 116
1.2.2 The financial market assets 119
1.3 Simplifications, idealizations, fictions and separateness 121
1.3.1 Buchanan's and Hendry's simplification 122
1.3.2 Maeki's idealizations and Morgan's fictions 126
1.3.3 Hausman's separate realm 131
1.4 The fallacy of simplification 134
1.4.1 The dogmatic starting point 135
1.4.2 The consequences of the dogmatic starting point 137

2. ***CCAPM and its assumptions*** ***140***

2.1 Some assumptions are more fundamental than other 141
2.1.1 Fundamental principles 142
2.1.2 Auxiliary assumptions 144
2.2 A hierarchy of assumptions 146

3. ***Imre Lakatos' research programme and the CCAPM*** ***147***

3.1 The "research programme" 148
3.2 CCAPM's historical development 150
3.3 Cochrane's hard core and protective belt 156
3.3.1 Combining the hard core and the protective belt 160
3.3.2 Interlinked theories 162
3.3.3 Deductions from the a priori 165
3.4 Cochrane's positive and negative heuristic 171
3.5 Progressive of degenerating? 174
3.6 Lakatos' critics 177

Chapter 4: 181

CCAPM Ontology, Use and Representation 181

Introduction *181*

1. What is the consumption based asset pricing model? *183*

1.1 The model "M" in CCAPM 184
1.2 Model ontology 185
1.2.1 Frigg and Hartman's model classification 187
1.2.2 Gibbard and Varian's model views 188
1.2.3 Giere's pure and applied models 190
1.2.4 Friedman's layers 191
1.3 An applied mathematical model 193

2. How is the consumption based model used? *194*

2.1 The analytically convenient special cases 195
2.2 The empirically useful representations 199

3. Analytical cases and their representation *202*

3.1 What models represent 203
3.1.1 Idealization and fictions 204
3.1.2 Richer analytical cases 206
3.1.3 De-idealization 208
3.1.4 Vertical Portability 210
3.1.5 Horizontal Portability 211
3.2 Hausman's "conceptual explorations" 213

4. Empirical representations of analytical cases *217*

4.1 Analytical cases and real situations 219
4.2 Cochrane "works with theory" 219
4.2.1 Category one cases 221
4.2.2 Category two cases 223
4.3 A stylized HD account 227
4.4 Stories and other bridges to the empirical 231
4.4.1 Cochrane's story 231
4.4.2 Friedman's connectors 235
4.4.3 Hempel's bridges and Cartwright's two models 236

Chapter 5: 243

CCAPM Application and Assessment 243

Introduction *243*

1. The research question, complications and rejections *246*

2. Cochrane's response *247*

2.1 Habit-persistence 248
2.2 Reverse-engineering 251
2.3 Statistical results 253
2.3.1 Model evaluation 253
2.3.2 Rejected models 256

2.4 Assessing Cochrane's habit-persistence response 257
3. *Justifying CCAPM and the empirical tests* 264
3.1 The CCAPM is the correct starting point 264
3.2 The "litmus-test" 269
3.3 What is "tested"? 271
4. *CCAPM, the challenges and a possible solution* 273
4.1 Idealizations, fictions and unrealistic assumptions 274
4.2 A complex socio-economic world 280
4.3 Point-forecasts or claims about tendencies? 287
5. *Statistical philosophy - a way out?* 302
5.1 De-emphasizing predictability 303
5.2 Interesting and clean stories? 309
6. *Main conclusions* 311
