PART ONE

Foundations of Abnormal Psychology 1

Introduction to the study of abnormal behavior 3

Popular Views and Beliefs	3
Abnormal Behavior: Problems for Contemporary Society	5
Scope of the Problem	6
The Social Problem	7
The Human Problem	8
Personal Reactions	8
Involvement in the Issues	9
Historical Perspective	9
Primitive Supernaturalism	10
The Golden Age: Greece and Rome	10
The Middle Ages: The Return of Supernaturalism	12
Emerging Humanism of the Renaissance	14

The Seventeenth and Eighteenth Centuries	15
The Nineteenth Century	16
Abnormal Psychology as a Field of Study	19
The Scientific Method	19
Viewpoints, Models, and Perspectives	20
Two Dominant Views of Abnormal Behavior	20
Summary	22

2 The designation and classification of abnormal behavior **23**

Designating Behavior as Abnormal	23
Criteria of Normality	24
Criteria of Abnormality	26
Sociopsychological Factors in the Designation of Abnormal Behavior	31
Diagnostic Classification	32
Classification in Science, Medicine, and Psychiatry	32
The Current Classification System: American Psychiatric Association (APA) DSM-II	34
Issues and Problems in the Use of DSM-II	37
The Medical Model—How Appropriate Is It?	37
Issues of the Reliability of the Diagnostic System	38
Sociopsychological Issues Involved in Labeling	38
Summary	39

3 Psychodynamic and behavioral views of abnormal behavior **40**

Psychodynamic Approaches	41
Psychoanalysis	41
The Humanistic Approach	51
Critique of Psychodynamic Approaches	53
Behavioral Approaches	54
Historical Antecedents	55
Respondent Behavior	57
Operant Behavior	61
Broadening the Behavioral Viewpoint	65
Behavior-Shaping Environments: How Environments Create and Support Maladaptive Behavior	68

Critique of the Behavioral Viewpoint	69
Postscript: Psychodynamic and Behavioral Models Compared and Contrasted	70
Summary	71

4 Causal, contributing, and maintaining factors of abnormal behavior 72

Overview of Causal Factors of Abnormal Behavior	72
The Search for Etiological Factors	72
Proposed Causal Factors of Abnormal Behavior	73
Multiple Routes to Abnormal Behavior and Functional Autonomy	73
Causal, Contributing, and Maintaining Factors	76
Biological Factors of Abnormal Behavior	76
Genetic Factors	76
Biochemical Factors	78
Neurophysiological Factors: The Central Nervous System	79
Biological Stresses and Deprivations	80
Psychological Factors of Abnormal Behavior	81
The Developing Organism	82
Parent and Family Factors	83
Conflict, Stress, and Coping in the Adult	88
Sociocultural Factors of Abnormal Behavior	88
Sociological Variables	88
Cross-Cultural Studies of Abnormal Behavior	90
Ecological Factors	90
Summary	90

5 Clinical and research methods of inquiry about abnormal behavior 92

Inquiry: Learning about Abnormal Behavior	93
Formulating and Answering Questions	93
Clinical and Research Approaches to Inquiry	94
Kinds of Inquiry	94
Important Considerations for All Approaches to Inquiry	96
The Clinical Approach to Inquiry	98
General Issues of Clinical Inquiry	98
Clinical Methods of Inquiry	99

The Research Approach to Inquiry	106
General Issues of Research Inquiry	106
Research Methods of Inquiry	109
Evaluating Research Approaches	112
Summary	113

PART TWO

Psychotherapeutic Intervention 115

6

Psychotherapy: General issues and traditional approaches 116

General Issues of All Psychotherapies	117
Common Features of the Psychotherapies	120
Goals, Strategies, and Formats of the Psychotherapies	126
Varieties of Treatment Approaches and Some Attempts at Organization	126
Issues of Research and Evaluation of Psychotherapy	127
Psychodynamic Psychotherapy—Insight, Personality Change, and Growth Therapies	129
Individual Psychodynamic Therapies	130
Group Psychodynamic Therapies	137
Critique of Psychodynamic Approaches to Therapy	138
Summary	139

7

Psychotherapy: Contemporary approaches to behavior change 140

Behavioral Approaches to Psychotherapy	141
Basic Principles	141
Procedures Based on the Respondent Learning Model	142
Procedures Based on the Operant Learning Model	147
Variations of the Behavioral Approaches	154
Research and Evaluation of Behavioral Approaches	157
Community Mental Health	157
Basic Principles	158
Methods of Intervention	159
Evaluation of Community Mental Health	160

Somatic Therapies	160
Pharmacological Therapy (Drug Treatment)	160
Electroshock Therapy	163
Psychosurgery	163
Other Somatic Therapies	164
Evaluation of Somatic Therapies	164
Summary	165
Overview of Psychotherapy	165

PART THREE

Types of Abnormal Behavior 167

8

The neuroses 168

The Nature of Neurotic Behavior	168
The "Neuroses"—Definition and Orientation	169
The Concept of Anxiety	169
Psychodynamic View of the Neuroses	169
Behavioral View of Neurotic Behavior	170
Types of Neurotic Reactions	171
Anxiety Reaction	171
Phobic Reactions	175
Hypochondriacal Reaction	178
Hysterical Reaction—Conversion Type	180
Hysterical Reaction—Dissociative Type	185
Depersonalization Neurosis	189
Obsessive-Compulsive Reaction	189
Depressive Reactions	195
Neurasthenic Reaction and Existential Neurosis	195
Traumatic and Occupational Reactions	198
Personality Disorders	199
The Borderline Patient	201
Summary	203

9

Psychophysiological disorders 204

The Body-Mind Issue	204
Bereavement Studies	205

Life-Stress Research	205
Sudden Death	207
General Overview	207
Types of Psychophysiological Disorders	209
Theoretical Aspects	211
Why Psychophysiological Disorders At All?	211
What Determines the Type of Disorder?	212
Treatment Approaches	216
Psychodynamic Approaches	217
Behavioral Approaches	217
Hypnosis	218
Biofeedback	218
Experimental Verification in Human Subjects	220
Biofeedback as Therapy	221
Two Specific Psychophysiological Disorders	222
Peptic Ulcers	222
Heart Disease	226
Summary	228

10 Schizophrenia: Background, classification, and description 230

The Concept of Schizophrenia	230
The Development of the Concept of Schizophrenia	232
Current Definition of Schizophrenia	233
Epidemiology of Schizophrenia	233
Behavioral Description	233
Clinical Manifestations	234
Behavior Patterns ("Types" of Schizophrenia)	239
Dimensions of Schizophrenic Behavior	247
Evaluation of Current Nosology	249
The Course of Schizophrenia	250
Onset Experiences	250
The Decision to Hospitalize	251
The Effects of Hospitalization	254
Outcome Studies (Prognosis)	258
Summary	259

11

Schizophrenia: Causal, contributing, and maintaining factors and treatment approaches 260

Causal, Contributing, and Maintaining Factors	261
Biological Factors	261
Biophysical Factors	262
Psychological Factors	263
Sociocultural Factors	268
Research on Etiology	269
Treatment Approaches	271
Psychodynamic Approaches	272
Somatic Therapies	274
Individual Behavioral Approaches	276
Token Economies: Behavioral Approaches to the Institution as a Vehicle for Treatment	278
Summary	282

12

Affective disorders and suicide 283

Descriptions of Affective Disorders	284
Depressive Reactions	284
Manic Reactions	286
Classification Approaches	290
Neurotic Depression	290
Psychotic Depression	291
Manic-Depressive Psychosis	292
Involutional Melancholia	293
Endogenous-Exogenous Distinction	294
Unipolar-Bipolar Distinction	294
Causal, Contributing, and Maintaining Factors	295
Psychodynamic Factors	295
Behavioral Factors	297
Other Psychological Factors	298
Sociocultural Factors	299
Biological Factors	302
Treatment Approaches	302
Psychodynamic Approaches	302
Behavioral Approaches	303
Somatic Therapies	304

Suicide	306
Statistics on Suicide	306
Psychological Characteristics	307
The Campus Suicide—A Special Concern	309
"Therapy" for Suicide—Prevention and Management of Attempters	310
Summary	311

13

Antisocial behavior and society's response 312

Types of Antisocial Reactions	313
Antisocial Personality (Psychopathy)	313
Criminal or Dyssocial Behavior	318
Juvenile Delinquency	320
Society's Response to Antisocial Behavior	322
The Criminal-Legal System and Mental Health	322
Prisons and Prisoners	323
Treatment Approaches	329
Summary	334

14

Addiction and dependence: Alcoholism, drug abuse, overeating, and smoking 335

Alcoholism	336
Nature of Alcoholism	336
Causal, Contributing, and Maintaining Factors in Alcoholism	339
Treatment Approaches	341
Emerging Approaches—Controlled Drinking	346
Drug Addiction and Dependence	347
Nature of Drug Addiction and Dependence	349
Causal, Contributing, and Maintaining Factors in Drug Addiction	352
Treatment Approaches	353
Research on the Use of Marijuana	356
Overeating	357
Nature of Obesity	357
Patterns of Abuse and Stages of Overeating	358
Causal, Contributing, and Maintaining Factors in Overeating	358
Treatment Approaches	361

Cigarette Smoking	363
Modification of Smoking	363
Summary	365

15 Behavior disorders of childhood 367

Severe Behavior Problems: Infantile Autism and Childhood Schizophrenia	368
Introduction: A Problem of Labels	368
Behavioral Description	368
Theoretical and Research Contributions	373
Treatment Approaches to Autism and Schizophrenia	375
Frequent Psychological Problems of Childhood	379
Enuresis	379
Anxiety Reactions of Childhood	380
Phobias	380
Other Problems of Childhood	382
The Hyperactive Child: Hyperkinesis, Minimal Brain Damage, Dyslexia	382
Behavioral Description	382
Theory and Research	384
Treatment Approaches to Hyperactivity	385
Psychotherapy with Children	385
Psychodynamic Approaches	385
Behavioral Approaches	387
The Family Context of Behavioral Problems of Children	388
Methods of Studying Families	388
Family Factors in Abnormal Behavior in Children	389
Approaches to Treatment Within the Family Context	
—Family Therapy	390
Summary	392

16 Mental retardation 393

Basic Issues	393
Definitions	394

Current Terminology	394
Incidence and Prevalence	395
Classification Approaches	396
Classification by Level of Intellectual Ability	396
Classification by Etiology	399
Classification by Adaptive Social Behavior	400
Types of Retardation	400
Cultural-Familial ("Garden Variety") Retardation	400
Organic Types of Retardation	403
Treatment of Retardation	405
Institutional Care	406
Special Education	408
Other Approaches to Helping the Retarded	410
Summary	412

17 Organic brain syndrome and aging 414

Clinical Features of Organic Brain Syndrome	415
General Behavioral Descriptions	415
Acute-Chronic Distinction	416
Delirium	416
Effect of Focal Lesions	418
Aphasia	420
Types of Organic Brain Dysfunction	421
Syndromes Associated with Different Etiological Agents	421
Syndromes Associated with Head Injury	425
Syndromes Associated with Epilepsy	427
Aging	429
Traditional Views of Aging and Senility	429
Is All Senility Organic Brain Syndrome?	430
Psychological and Sociological Aspects of Aging	430
Treatment and Prevention of Aging	431
Summary	436

18 Abnormal sexual behavior: Sexual dysfunction and sexual deviation 437

"Normal" Sexual Behavior	438
The Need for Knowledge	438

Heterosexual Intercourse	439
Sexual Normality and Deviation	441
Human Sexual Dysfunction	442
Stages of Sexual Response	442
Types of Sexual Dysfunction	444
Causal, Contributing, and Maintaining Factors	446
Treatment of Sexual Dysfunction	450
Sexual Deviation	454
Types of Sexual Deviation	454
Treatment of Sexual Deviation	464
Rape	466
What Is Rape?	466
The Rapist	467
The Rape Victim	470
Summary	471

PART FOUR

A Field in Transition: Emerging Approaches and Future Directions

473

19

Emerging issues in conceptualizing abnormal behavior

474

The Social Context of Abnormal Behavior	475
Sociopsychological Factors	476
Racial Issues	477
Special Problems for Women	478
Legal Aspects of Abnormal Behavior	481
Adult Life Stages and Crises	483
Life Stages and Predictable Crises	483
Special Problem Stages and Crises	484
The Middle Years	487
Old Age	488
Ecological Problems of Abnormal Behavior	490
Basic Principles	490
"Future Shock" as an Ecological Issue	491
Community Mental Health View of Abnormal Behavior	493
Summary	496

Introduction—Models of Intervention	497
Recent Clinical Approaches to Treatment	499
Therapeutic Models	499
Institutional Treatment	507
Emerging Approaches to Community Mental Health	511
Clinical-Community Intervention	511
Public Health—Community Intervention	517
Social Action Approaches	521
Summary	522
Glossary	523
Bibliography	541
Name Index	566
Subject Index	573
