About This Book and DSM-III xiii

Chapter one **Conceptions of Abnormal** **Behavior 1**

Defining abnormal behavior 2

Labeling people or behavior abnormal 2 ■ When should we call behavior abnormal? 3 ■ BOX Mental health professionals 4 ■ BOX The American Psychiatric Association's classification of abnormal behaviors 6 ■ Applying the definition of abnormal behavior 9 ■ Common misconceptions about abnormal behavior 11

Frequency of abnormal behavior 13

Changing approaches to abnormal behavior 17

Possession by the devil 17 ■ Mental illness 20 ■ BOX Moral therapy: a revolution before its time 23 ■ The Freudian revolution 24 ■ Persistence of medical models 25 ■ Interpersonal and social models 28 ■ A biochemical revolution 28

About this book 29

Organization 29 ■ Sources of data 31 ■ What you can expect from this book 32 ■ BOX "Medical students' disease" 33

Part One
Individual
Misery

37

Chapter two **Inner Conflict and Neurotic** **Behavior 39**

Inner conflict 40

Fear and anxiety 41 ■ Defense mechanisms 45 ■ BOX Freud's structural view of personality 46 ■ Interpersonal maladaptation 49 ■ Clinical signs of inner conflict 50 ■ BOX Excessive preoccupation with self 52 ■

Traditional neurotic patterns of behavior 55

Neurotic depressive reactions 56 ■ BOX Job speaking of his woes 57 ■ BOX Success depression 62 ■ Anxiety reactions 63 ■ BOX Test anxiety 65 ■ BOX Psychopharmacologic treatment of anxiety 66 ■ Phobic reactions 66 ■ Obsessive and compulsive reactions 68 ■ BOX Compulsive behavior 70 ■ Conversion reactions 71 ■ BOX Conversion reactions in the history of psychiatry 72 ■ BOX Psychological tests and neurotic behavior: the MMPI 75 ■ Dissociative reactions 78 ■ BOX Courts give credence to multiple personality 86

Personality and situational determinants of neurotic patterns of behavior 86

Chapter three Principles of Psychotherapy 90

Defining psychotherapy 91

Misconceptions about psychotherapy 91

Basic processes of psychotherapy 94

Being accepted 94 ■ Experiencing feelings 96 ■ Expanding the self-concept 98 ■ Learning new behaviors 99 ■ BOX The basic processes of psychotherapy at work 101

Major variations in psychotherapy 101

Psychodynamic psychotherapies 102 ■ BOX The use of dreams in psychotherapy 103 ■ BOX Hypnosis and psychotherapy 104 ■ Interpersonal psychotherapies 111 ■ Client-centered psychotherapy 111 ■ Humanistic, existential, and Gestalt psychotherapies 113 ■ Cognitive psychotherapies 115 ■ Action-oriented therapies 116 ■ Behavior therapies 117 ■ BOX The "symptom substitution" issue 118 ■ BOX Some specific behavior modification techniques 120 ■ Group psychotherapies 125

Group approaches to human growth 130

Sensitivity training 130 ■ BOX Some crisis intervention techniques 131
Encounter groups 133

Evaluation of psychotherapy 134

BOX Some problems in psychotherapy research 135 ■ Does psychotherapy produce changes? 135 ■ Conditions that facilitate change 136 ■ Psychotherapy as a movement 138

Chapter four

Illness and Injury 141

Psychosocial causes of illness and injury 142

Stress 143 ■ BOX Poverty and illness 145 ■ BOX illness and biorhythms 152 ■ Depression-withdrawal 153 ■ Sick-role behavior 154 ■ BOX Possible psychological factors in cancer 155 ■ Overt behavior 156 ■ Family dynamics 157

Psychophysiological causes of specific illnesses 158

Emotional specificity 159 ■ Individual psychophysiological response patterns 160 ■ Cognitive factors 160 ■ Behavioral factors 161 ■ Learning 163 ■ Interactions among factors 163 ■ BOX Losing weight 168

Psychological effects of illness and injury 170

Direct effects 171 ■ Emotional reactions 171 ■ BOX Abnormal behavior and reactive hypoglycemia 172 ■ Ways of coping 175 ■ BOX Death and dying 176

Psychotherapeutic methods 177

BOX Some ways to reduce stress 179

Part Two

Disturbing Behavior through the Life Cycle

187

Chapter five

Children and Adolescents 190

A developmental framework 192

BOX Maternal-infant bonding 198

Infancy and early childhood 200

Problems related to sleeping, eating, and fears 201 ■ Failure to thrive 202 ■ Nonconformity 203

The preschool years 205

Hyperactivity 207 ■ BOX Brain waves and the EEG 209 ■ BOX Neurometric assessment of behavior problems 211 ■ Speech problems 213 ■ Bed-wetting 215 ■ School refusal 217

The school years 218

Aggressive behavior 219 ■ Problems in mastering school skills 220 ■ Specific reading disability 222

Mental retardation 223

Causes of mental retardation 226 ■ BOX Genetics and abnormal behavior 227 ■ Helping with mental retardation 230 ■ BOX "Christmas in purgatory" 232

Helping with childhood disturbing behavior 235

Counseling and therapy for concerned adults 236 ■ Child psychotherapy 236 ■ Other methods 239 ■ BOX Does abnormal behavior in childhood lead to abnormal behavior in adulthood? 240

Adolescence 241

Developmental tasks and associated problems 242 ■ When changes are out of sync 245 ■ Rebellion 247 ■ Helping with adolescent disturbing behavior 248

Chapter six Couples, Families, and Older People 251

Psychological development in the adult years 251

Couples 255

Common marital relationship problems 256 ■ Marriage as a social system 258 ■ Disordered interpersonal contracts 261 ■ Marital therapy 266 ■ BOX Some differences between optimal and maximal closeness 272

Family dynamics 273

Family integration 274 ■ Scapegoating 276 ■ Family therapy 278

Evaluation of marital and family therapies 281

Disturbing and abnormal behavior in older people 281

Disturbing behavior 282 ■ General adaptive problems 284 ■ Accidents 285 ■ Depression 285 ■ Helping older people 286

Part Three Chapter seven

Severely Abnormal Behavior

Abnormal Behavior

291

Abnormal Behavior and the Brain 293

By Matthew J. Blusewicz, Veterans Administration Medical Center and University of Nevada, Reno

Understanding brain function and dysfunction 294

Historical views of brain function 294 ■ Current views of brain function 297 ■ Causes of brain dysfunction 301 ■ BOX The "split brain" 302 ■ Factors that can alter the effects of brain dysfunction 307

Perceptual-motor and cognitive disorders 308

Perceptual-motor disorders 308 ■ Disorders of symbolic communication and speech 311 ■ Disorders of learning and memory 313

Disorders of consciousness, attention, mood, and motivation 315

Disorders of consciousness and attention 315 ■ Disorders of mood and motivation 317

Some clinical syndromes 323

Senile dementia 323 ■ BOX Psychological tests and brain dysfunction: the WAIS and the Halstead-Reitan Test Battery 324 ■ Seizure disorders 326 ■ Phenylketonuria 329 ■ "Minimal brain dysfunction" 330 ■ Cerebrovascular accident, or stroke 331

Therapeutic intervention 333

Direct alteration of the brain 333 ■ BOX Psychosurgery: ethical and social issues 336 ■ Helping with brain dysfunction 336

Chapter eight

Paranoid Behavior 341

What is paranoid behavior? 341

Key features of paranoid behavior 347

Extreme suspicion and distrust 347 ■ Rigid convictions about others 347 ■ BOX What is reality, anyway? 349 ■ BOX Folie à deux 350 ■ Centrality 352 ■ Blaming and projection 352 ■ Effects of paranoid behavior on others 353

Coexistence of paranoid behavior with other abnormal behaviors 354

Kinds of paranoid behavior 355

Causes of paranoid behavior 355

Epidemiology 355 ■ Biological factors 357 ■ Cognitive style 358 ■ Conflict 358 ■ BOX Paranoid behavior, homosexual conflict, and power 359 ■ Unadmitted low self-esteem 360 ■ Exclusion by others 360 ■ Interactions among factors 361

Helping with paranoid behavior 363

Chapter nine

Schizophrenic Behavior: Characteristics and Kinds 369

Toward a definition of schizophrenic behavior 370

Schizophrenic behavior distinguished from other problems 373 ■ Misconceptions about schizophrenic behavior 374

Specific characteristics of schizophrenic behavior 376

Communicative slippage 376 ■ Interpersonal disjunction 378 ■ Withdrawal 380

Schizophrenic experiences 382

Perception 382 ■ Thinking 383 ■ Selfhood 384

Kinds of schizophrenic behavior 387

BOX The changing clinical picture of schizophrenic behavior 388

Closely related severely abnormal behaviors 390

Co-occurring neurotic and schizophrenic behavior 390 ■ Profoundly abnormal behavior in children 391 ■ BOX Psychological tests and schizophrenic behavior: the Rorschach 392

Chapter ten

Schizophrenic Behavior: Causes and Helping 403

Causes of schizophrenic behavior 403

Frequency and epidemiology 403 ■ Biological factors 405 ■ Psychological factors 412 ■ Social factors 418 ■ Interactions among factors 418

Helping with schizophrenic behavior 421

Hospitalization 421 ■ BOX (Insane treatment of “the insane”—an early protest 422 ■ Therapeutic medications 427 ■ BOX Law and mental health 428 ■ Psychotherapy 432

Chapter eleven

Severe Depressive Behavior and Manic Behavior 436

Severe depressive behavior 438

Manic behavior 442

Kinds of severe depressive and manic behaviors 446

Causes of severe depressive and manic behaviors 448

Frequency and epidemiology 448 ■ Biological factors 449 ■ Psychological factors 453 ■ Interactions among factors 456

Helping 456

Electroconvulsive therapy 456 ■ Therapeutic medications 457 ■ Psychotherapy 459

Part Four **Chapter twelve**
Deviant **Sexual Problems and**
and **Variations 466**
Abnormal
Behavior
463

Defining abnormal sexual behavior 466

Scope of this chapter 468

Sexual response problems 469

BOX The greatest male chauvinist myth 471 ■ Premature
ejaculation 473 ■ Erectile dysfunction 474 ■ Orgasmic dysfunction 476

Deviant sexually related behaviors 478

Compulsive promiscuity 479 ■ Use of pornography 480 ■ BOX "Swinging"
couples 481 ■ BOX Prostitution 482 ■ Fetishism 484 ■ Transvestism 484 ■
Transsexualism 486 ■ Exhibitionism 490 ■ Peeping (voyeurism) 492 ■
Offensive telephoning 492 ■ Sadistic and masochistic (S/M) sexual behaviors 494
■ Incest 495 ■ Sexual child molesting 498 ■ Rape 500 ■ BOX Common
misconceptions about rape 504 ■ BOX Some ideas on how to stop a rape 507

Homosexual behavior 508

Frequency 508 ■ Life styles 509 ■ BOX Common misconceptions about
homosexual behavior 512 ■ Causal factors 514 ■ Association with
abnormality 516 ■ Issues of helping 517 ■ Social, legal, and clinical
perspectives 518

Chapter thirteen **Misuse of Drugs 522**

BOX: Compulsive gambling 524

Relaxation versus death: the "downers" 525

Alcohol 525 ■ BOX The economic and human costs of misuse of alcohol and
tobacco in the United States 531 ■ BOX Behavioral signs of alcohol
misuse 532 ■ Barbiturates 534 ■ Heroin 536

Arousal versus breakdown: the "uppers" 539

Caffeine 540 ■ Nicotine 543 ■ BOX Helping people to stop
smoking 546 ■ Amphetamines 546 ■ Cocaine 549

Mind expansion versus mind distortion: the psychedelics and other drugs 551

Marijuana 551 ■ LSD 555 ■ Volatile substances 557

Escape versus oblivion: multiple drug misuse 558

BOX PCP 559

Why do we misuse drugs? 560

We are a drug culture 562 ■ Biological factors 565 ■ Family factors 565 ■ Peer group influence 566 ■ Self-medication: a pill for every ill 568

Helping with drug misuse 569

Chemical methods 570 ■ Psychosocial methods 571 ■ BOX Alcoholics Anonymous 572 ■ Features of ideal helping programs 576

Prevention 578

Individual and family 579 ■ School and community 579 ■ Business and industry 580 ■ Government and law 580

Chapter fourteen

Destructive and Violent Behavior 585

Destructiveness and violence toward self 586

Self-destructive behaviors and life styles 586 ■ Suicide 587 ■ BOX Misconceptions about suicide 588 ■ BOX Suicide among physicians 592

Destructiveness and violence toward others 601

BOX Inducing abnormal behavior in others: are there "Lokians"? 602 ■ Sociopathic behavior 603 ■ BOX Psychological tests and sociopathic behavior: the TAT 606 ■ Physical abuse in the family 610 ■ Murder 620

Causes of violence 624

Biological factors 624 ■ BOX Vincent van Gogh: a victim of episodic dyscontrol? 626 ■ Psychological factors 626 ■ Situational, social, and cultural factors 628 ■ Interactions among factors 631

What we can do about destructiveness and violence 633

Part Five **Chapter fifteen**
Constructive **Social and Community**
Social **Interventions 641**
Change

639

Preventing abnormal behavior 643

Secondary prevention 643 ■ Primary prevention 653

Promoting effective functioning 656

Fostering social and community change 658
