Preface xi

---

## PART ONE: ABNORMALITY AND SCIENCE 1

---

### Chapter 1. Relatively Crazy: The Definition of Abnormality 3

The Self-Diagnosis Syndrome 4 Traditional Definitions of Abnormality 7 Crazy Is Relative 9 The Variance Continuum 12 Plan of the Book 14 Summary 15 Suggested Readings 16 Important Terms and Concepts 16

### Chapter 2. Research Methods in Clinical Science 17

The Nature of Science 18 Experimental Designs: The Search for Causes 24 Data Collection Methods 28 Data Interpretation 29 Problems and Issues 31 Summary 35 Suggested Readings 36 Important Terms and Concepts 36

---

## PART TWO: MODELS OF HUMAN VARIANCE 39

---

### Chapter 3. Biomedical Models of Deviance 41

The Human Nervous System 43 The Biomedical Models 54 Revolving Sources: Behavior and Genetics 63 The Biomedical Perspective:

Problems and Promise 68 Summary 72 Suggested Readings 72 Important Terms and Concepts 73

### Chapter 4. Psychoanalysis 74

The Roots of Psychoanalysis 75 The Structure of Personality 76 Psychosexual Development 80 Presumed Causes of Distress and Deviance 84 Evaluation of Psychoanalytic Theory 87 Summary 91 Suggested Readings 92 Important Terms and Concepts 92

### Chapter 5. Behavior Modification 93

Radical and Methodological Behaviorism 96 Classical Conditioning: History and Principles 99 Operant Conditioning 103 Evaluating the Conditioning Models 115 Summary 117 Suggested Readings 119 Important Terms and Concepts 119

### Chapter 6. Cognitive Social Learning Perspectives 120

A Diverse History 121 The Cognitive Basis of Learning 126 Illustrations of Cognitive Influence 131 Causes of Distress and Deviance 138 Evaluating the Cognitive Social Learning Approach 140 Summary 142 Suggested Readings 142 Important Terms and Concepts 143

---

**PART THREE:  
ASSESSMENT AND TREATMENT 145**

**Chapter 7. Assessment 147**

A Brief History of Psychological Assessment 147  
Traditional Psychological Assessment 149  
Behavioral Assessment 156 Differences of  
Opinion 163 Summary 163 Suggested  
Readings 164 Important Terms and Concepts 164

**Chapter 8. Diagnosis and Classification 165**

Classification Systems: From Hippocrates to  
DSM-III 165 Problems With Traditional  
Diagnosis and Classification 169 Summary 180  
Suggested Readings 180 Important Terms and  
Concepts 181

**Chapter 9. Approaches to Treatment 182**

The Biomedical Therapies 183  
Psychoanalysis 190 Behavior Modification 196  
Cognitive Social Learning Therapies 201  
Phenomenological Approaches 207  
Summary 216 Suggested Readings 216  
Important Terms and Concepts 217

---

**PART FOUR:  
HUMAN DISTRESS AND VARIANCE 219**

**Chapter 10. Psychophysiological Disorders 221**

The Concept of Stress 222 Psychosomatic and  
Somatopsychic Perspectives 228 The  
Dermatological System 230 The Respiratory  
System 232 The Cardiovascular System 236  
The Gastrointestinal System 242  
Psychophysiological Disorders: Consensus and  
Issues 246 Therapeutic Approaches to  
Psychophysiological Disorders 249 Summary 253  
Suggested Readings 254 Important Terms and  
Concepts 255

**Chapter 11. Anxiety 256**

Anxiety and Neurosis 257 The Nature of  
Anxiety 266 Theory and Treatment 273  
Summary 284 Suggested Readings 284  
Important Terms and Concepts 284

**Chapter 12. Depression 285**

Characteristics and Prevalence 287 Diagnosis  
and Classification 288 Suicide 294 Theory  
and Treatment 299 Summary 310 Suggested  
Readings 312 Important Terms and Concepts 312

**Chapter 13. Antisocial Patterns 313**

Criminal Behavior 316 Delinquency 318  
The Antisocial Personality 321 Perspectives on  
Social Deviance 324 Prisons: Kind and Usual  
Punishment 342 Summary 345 Suggested  
Readings 346 Important Terms and Concepts 346

**Chapter 14. Addictions and Alcoholism 347**

Coming to Terms with Terms: Addiction and  
Abuse 348 Depressants 351 Stimulants 365  
Hallucinogens 369 Perspectives on Etiology and  
Treatment 371 Summary 383 Suggested  
Readings 384 Important Terms and Concepts 384

**Chapter 15. Relationships and Sexuality 385**

Communication and Relationships 386  
Fundamentals of Human Sexuality 391 Sexual  
Disorders 408 Treatment of Sexual Disorders 418  
Summary 423 Suggested Readings 424  
Important Terms and Concepts 424

**Chapter 16. Schizophrenia 425**

Reality Contact and the Concept of Deviance 426  
Schizophrenia 432 Paranoid Disorders 437  
Theory and Treatment 439 Summary 455  
Suggested Readings 456 Important Terms and  
Concepts 457

---

**Chapter 17. Developmental and  
Organic Disorders 458**

Mental Retardation 458    Infantile Autism and  
Early Childhood Psychosis 465    Organic Mental  
Disorders 468    Psychological Variance in the  
Elderly 473    Theory and Treatment 475  
Summary 478    Suggested Readings 479  
Important Terms and Concepts 479

---

**PART FIVE: CONCLUSION 481**

---

**Chapter 18. Summary and Implications 483**

A Brief History of Psychopathology 485  
Theories and Therapies: Current Status 489  
Legal and Ethical Issues 495    Deviance vs.  
Difference: A Humanitarian Postscript 505

Glossary 509
