

## **SUMMARY OF CONTENTS**

List of Illustrations xv

Preface xvii

Acknowledgments xxi

- 1 Introduction: Discovering Mechanisms 1
  - 2 Biological Mechanisms 15
  - 3 Representing Biological Mechanisms 30
  - 4 Characterizing the Phenomenon 52
  - 5 Strategies for Mechanism Schema Construction 64
  - 6 Virtues and Vices of Mechanism Schemas 83
  - 7 Constraints on Mechanism Schemas 97
  - 8 Experiments and the Search for Mechanisms 119
  - 9 Strategies for Revising Mechanism Schemas 144
  - 10 Interfield and Interlevel Integration 161
  - 11 The Pragmatic Value of Knowing How Something Works 186
  - 12 Conclusion 196
- References 203
- Index 219

## CONTENTS

List of Illustrations xv

Preface xvii

Acknowledgments xxi

### CHAPTER 1 INTRODUCTION: DISCOVERING MECHANISMS 1

Learning How Curare Kills 1

Learning to Look for Mechanisms 2

Discovery: The Product Shapes the Process of Discovery 7

Strategies from History 10

The Mechanistic Integration of Biology 12

The Pragmatic Power of Mechanism 12

Bibliographic Discussion 13

### CHAPTER 2 BIOLOGICAL MECHANISMS 15

What Is a Mechanism? 15

Machines vs. Mechanisms 15

Components and Features of Mechanisms 16

Entities and Activities 16

Set Up, Start, and Finish Conditions 18

Productive Continuity 19

Regularity 19

Organization 20

Levels of Mechanisms 21

Functions 23

Mechanisms in a Wider Context 24

Multilevel, Multifield Perspective on Mechanisms 25

Conclusion 26

Bibliographic Discussion 26

<b>CHAPTER 3 REPRESENTING BIOLOGICAL MECHANISMS</b>	<b>30</b>
Introduction: Representing Mechanisms	30
Dimensions of Mechanism Schemas	30
Completeness: Black Box to Gray Box Sketch to Glass Box Schema	31
Detail: Abstract to Specific	32
Support: How-possibly, How-plausibly, How-actually	34
Scope: Narrow to Wide	35
Visual Representations of Mechanisms	38
Mathematical and Graphical Representations of Mechanisms	41
Conclusion	50
Bibliographic Discussion	51
<b>CHAPTER 4 CHARACTERIZING THE PHENOMENON</b>	<b>52</b>
Characterizations of Phenomena Shape the Discovery of Mechanisms	52
Phenomena Are Not Just Proper Functions	53
Phenomena, Data, and Experimental Techniques	54
What Is Involved in Characterizing a Phenomenon?	56
Precipitating Conditions and Manifestations	56
Inhibiting Conditions	57
Modulating Conditions	58
Nonstandard Conditions	58
By-Products	59
Summary: Characterizing the Phenomenon	60
Recharacterizing the Phenomenon	60
Fictional Phenomena	60
Lumping and Splitting	61
Conclusion	62
Bibliographic Discussion	62

## CHAPTER 5 STRATEGIES FOR MECHANISM SCHEMA

### CONSTRUCTION 64

Discovery: From Aha to Strategy 64

The Product Shapes the Process of Discovery 65

Guidance from the Phenomenon and the Store 67

Localization 69

Employ a Schema Type 71

Modular Subassembly 74

Forward/Backward Chaining 77

Conclusion 80

Bibliographic Discussion 81

## CHAPTER 6 VIRTUES AND VICES OF MECHANISM SCHEMAS 83

Introduction 83

Virtues of Good Theories 83

Evaluating Mechanism Schemas: Superficiality, Incompleteness,

Incorrectness 86

    Superficiality 87

    Incompleteness 89

        The "And How Does That Work?" Test and the Vice of Boxology 90

        The "What If That Worked Differently?" Test and the Vice of

        Chainology 91

        The Build It Test 92

    Incorrectness 94

Conclusion 95

Bibliographic Discussion 95

**CHAPTER 7 CONSTRAINTS ON MECHANISM SCHEMAS 97**

Introduction: Constraints and Correctness 97

Theoretical Background of Harvey's Discovery 98

Locations 102

Structures/Entities 104

Abilities 106

Activities 109

Timing 111

Productivity 113

Roles 114

Global Organization 115

Conclusion 117

Bibliographic Discussion 117

**CHAPTER 8 EXPERIMENTS AND THE SEARCH FOR MECHANISMS 119**

Introduction 119

Experiments for Testing Causal Relevance 120

Experimental System, Intervene, Detect 120

Interlevel Experiments for Testing Componential Relevance 125

Interference Experiments 126

Stimulation Experiments 127

Activation Experiments 128

Complex Experiments for Asking Specific Mechanistic Questions 129

By-What-Activity Experiments 129

By-What-Entity Experiments 131

Series of Experiments and Multiple Interventions 133

Preparing the Experimental System 137

Conclusion 141

Bibliographic Discussion 142

**CHAPTER 9 STRATEGIES FOR REVISING MECHANISM SCHEMAS 144**

Introduction 144

General Types of Anomalies 145

Experimental and Data Analysis Errors and Falsifying Anomalies 145

Monster, Special Case, and Model Anomalies 146

Clues from the Anomaly 147

A Monster Anomaly 148

Localizing and Fixing Special Case and Model Anomalies 151

Indicative Anomalies in the Search for Mechanisms 152

Localizing a Model Anomaly: The Discovery of Messenger RNA 154

Modular Redesign 157

Conclusion 159

Bibliographic Discussion 159

**CHAPTER 10 INTERFIELD AND INTERLEVEL INTEGRATION 161**

Different Fields, Different Questions 161

Simple Mechanistic Integration: Discovering the Mechanism of Protein  
Synthesis 164

Interlevel Integration: Discovering the Mechanisms of Learning 167

Sequential Intertemporal Integration: Sequential Relations among  
Mendelian Genetic and Molecular Biological Mechanisms 172

Continuous Intertemporal Interlevel Integration: The Evolutionary  
Synthesis 177

Conclusion 182

Bibliographic Discussion 183

CHAPTER 11 THE PRAGMATIC VALUE OF KNOWING HOW SOMETHING  
WORKS 186

Introduction: Control 186

Estuary Mechanisms: Eliminating Dead Zones 187

Cystic Fibrosis Mechanisms and Design of Therapies 189

Optogenetics: Controlling the Brain with Light 193

Conclusion 195

Bibliographic Discussion 195

CHAPTER 12 CONCLUSION 196

Discovering Mechanisms 196

Summaries 199

References 203

Index 219
