List of Contributors *xi*

Introduction *xiii*

Part I **The basics: the definition of psychiatric illness and rules for classification**

Chapter 1

Introduction *3*

Kenneth S. Kendler

Chapter: Classification and causal mechanisms: a deflationary approach to the classification problem *6*

Derek Bolton

Comments: The National Institute of Mental Health Research Domain Criteria (RDoC) project: moving towards a neuroscience-based diagnostic classification in psychiatry *12*

Michael B. First

Chapter 2

Introduction *19*

Kenneth S. Kendler

Chapter: Progress and the calibration of scientific constructs: the role of comparative validity *21*

Peter Zachar

Comments: Progress and the calibration of scientific constructs: a new look at validity *35*

Rachel Cooper

Chapter 3

Introduction *41*

Josef Parnas

Chapter: Taking disease seriously: beyond “pragmatic” nosology *42*

S. Nassir Ghaemi

Comments: What is psychiatric disease? A commentary on Dr Ghaemi’s paper *54*

Derek Bolton

Chapter 4

Introduction 59

Kenneth S. Kendler

Chapter: Is psychiatric classification a good thing? 61

Rachel Cooper

Comments: Diagnoses as labels 71

S. Nassir Ghaemi

Part II The historical development of modern psychiatric diagnoses

Chapter 5

Introduction 75

Josef Parnas

Chapter: The nosological entity in psychiatry: a historical illusion or a moving target? 77

Assen Jablensky

Comments: The Kraepelinian pipe organ model (for a more dimensional) DSM-5 classification 95

Darrel A. Regier

Chapter 6

Introduction 99

Kenneth S. Kendler

Chapter: The 19th-century nosology of alienism: history and epistemology 101

German E. Berrios

Comments: The nature of the psychiatric object and classification 118

Josef Parnas

Chapter 7

Introduction 125

Kenneth S. Kendler

Chapter: The development of DSM-III from a historical/conceptual perspective 127

Michael B. First

Comments: Evaluating DSM-III: structure, process and outcomes 141

Harold Alan Pincus

Chapter 8

Introduction 143

Kenneth S. Kendler

Chapter: DSM-IV: context, concepts and controversies 145

Harold Alan Pincus

Comments: DSM-IV: some critical remarks 161

*Mario Maj***Part III The problem of validity****Chapter 9**

Introduction 167

Josef Parnas

Chapter: A philosophical overview of the problems of validity for psychiatric disorders 169

Kenneth F. Schaffner

Comments: Validity, utility and reality: explicating Schaffner's pragmatism 190

*Peter Zachar***Chapter 10**

Introduction 197

Kenneth S. Kendler

Chapter: Structural validity and the classification of mental disorders 199

Robert F. Krueger and Nicholas R. Eaton

Comments: Seeing sense in psychiatric diagnoses 213

*Paul R. McHugh***Part IV Application to major depression and schizophrenia****Chapter 11**

Introduction 219

Josef Parnas

Chapter: When does depression become a mental disorder? 221

Mario Maj

Comments: A sea of distress 229

Josef Parnas

Chapter 12

Introduction 235

Assen Jablensky

Chapter: DSM-IV and the founding prototype of schizophrenia: are we regressing to a pre-Kraepelinian nosology? 237

Josef Parnas

Comments: Phenomenology, nosology and prototypes 260

Kenneth S. Kendler

Part V The way(s) forward

Chapter 13

Introduction 267

Josef Parnas

Chapter: Rendering mental disorders intelligible: addressing psychiatry's urgent challenge 269

Paul R. McHugh

Comments: A search for coherence 280

Assen Jablensky

Chapter 14

Introduction 283

Kenneth S. Kendler

Chapter: Diagnostic threshold considerations for DSM-5 285

Darrel A. Regier

Comments: The tangible burden of mental disorder in the absence of mental disorder categories in nature: some reflections on Regier's contribution 298

Robert F. Krueger

Chapter 15

Introduction 303

Josef Parnas

Chapter: Epistemic iteration as a historical model for psychiatric nosology: promises and limitations 305

Kenneth S. Kendler

Comments: Coherentist approaches to scientific progress in psychiatry: comments on Kendler 323

Kenneth F. Schaffner
