Author biographies	vii
Abbreviations	ix
Preface	xi
1 Introduction to pneumonia	1
Introduction	1
Overview of bacterial pneumonia	1
References	4
2 Epidemiology, etiology, and risk factors of bacterial pneumonia	7
Epidemiology	7
Microbial etiology	11
Antibiotic resistance	15
Risk factors	19
Summary points	23
References	23
3 Pathology and clinical features of pneumonia	29
Pathophysiology of pneumonia	29
Pathogenesis of pneumonia	34
Signs and symptoms of pneumonia	34
<i>Prognosis of pneumonia</i>	35
Summary points	36
References	36
4 Diagnosis and classification of pneumonia	39
Diagnosis and classification of hospital-acquired and ventilator-associated pneumonia	39
Diagnosis of community-acquired pneumonia	40

Summary points	54
References	54
5 Methods for preventing pneumonia	57
Guidelines for the prevention of pneumonia	57
Preventative strategies to reduce the risk of community-acquired pneumonia in adults	58
Nonpharmacological prevention of hospital-acquired and ventilator-associated pneumonia	61
Vaccination	63
New vaccines	68
Summary points	68
References	69
6 Management of pneumonia	75
Guidelines for management and treatment of pneumonia	75
Medical management of pneumonia	77
Guidelines for the antimicrobial treatment of community-acquired pneumonia	80
Guidelines for the antimicrobial treatment of hospital-acquired/ventilator-associated pneumonia	81
Emerging therapies for the treatment of community-acquired pneumonia	84
Emerging therapies for the treatment of hospital-acquired/ventilator-associated pneumonia	88
Management of pneumonia in special populations	89
Summary points	94
References	94
