

Contents

- Foreword
by Else Roesdahl 9
- Preface 11
- 1 Introduction 13
- 1.1 Aims and limits of this study 14
- 1.2 Methodology 14
- 1.3 Course of investigation 16
- 1.4 Terms, names and place names 16
- 2 Historical research on merchant seafaring in Danish waters and in the western Baltic Sea 1000-1250
by Carsten Jahnke & Anton Englert 17
- 2.1 Developments in merchant seafaring 17
- 2.2 Transport capacities 31
- 2.3 Cargo ship-types in contemporary chronicles and documentary sources 35
- 2.4 Limited written evidence 37
- 3 Specialised merchant seafaring – a definition 39
- 3.1 Free merchants living from their trade rather than from their land 39
- 3.2 Multiple ownership of ship or cargo and the codification of maritime law 42
- 3.3 Towns with access to navigable waters 45
- 3.4 The use of pure sailing vessels and large cargo vessels in particular 50
- 4 Archaeological research on cargo vessels in Danish waters 1000-1250 55
- 4.1 The introduction of the sail in Scandinavia 55
- 4.2 The advent of the pure sailing vessel 58
- 4.3 Nordic cargo ships in Danish waters in the 11th and 12th centuries 60
- 4.4 The ‘Big Ship’ from Bergen – the largest known cargo vessel of the period 61
- 4.5 The introduction of the cog 64
- 4.6 Constructional features revealing technological change 70
- 4.7 Unsolved problems 73
- 4.8 Definition of the cargo vessels to be investigated 73
- 5 The Eltang ship 77
- 5.1 Excavation and documentation 77
- 5.2 Description of the preserved parts 91
- 5.3 Dating and provenance 109
- 5.4 Characteristic features and shipbuilding tradition 110
- 5.5 Reconstruction 111
- 5.6 Function and size 112
- 5.7 Local context 113
- 5.8 Conclusion 114

6 The Lynæs ships 115

- 6.1 Excavation and documentation
by Ole Crumlin-Pedersen 115
- 6.2 Description of the preserved parts
by Ole Crumlin-Pedersen & Anton Englert 126
- 6.3 Dating and provenance 159
- 6.4 Characteristic features and
shipbuilding tradition 162
- 6.5 Reconstruction of Lynæs 1 164
- 6.6 Function and size 181
- 6.7 Local context 183
- 6.8 Conclusion 189

7 The Karschau ship

*by Anton Englert &
Hans Joachim Kühn* 191

- 7.1 Excavation and documentation 191
- 7.2 Description of the preserved part 196
- 7.3 Dating and provenance 221
- 7.4 Characteristic features and shipbuilding
tradition 222
- 7.5 Reconstruction 222
- 7.6 Function and size 223
- 7.7 Local context 225
- 7.8 Conclusion 228

8 The Haderslev ship 229

- 8.1 Excavation and documentation 229
- 8.2 Description of the preserved parts 230
- 8.3 Dating and provenance 224
- 8.4 Characteristic features and shipbuilding
tradition 228
- 8.5 Reconstruction 253
- 8.6 Function and size 253
- 8.7 Local context and secondary function 254
- 8.8 Conclusion 258

9 Discussion: Large and medium-sized cargo ship-finds 261

- 9.1 Dating, timber provenance and find region 261
- 9.2 Constructional changes and shipbuilding traditions 264
- 9.3 Cargo capacity and size classes 272
- 9.4 Local context 279
- 9.5 Conclusion 284

10 Summary and conclusion 287

RESUMÉ

Store lastskibe i danske farvande
1000-1250 291

ZUSAMMENFASSUNG

Große Lastschiffe in dänischen
Gewässern 1000-1250 295

Terminology 301

Abbreviations of institutions 310

Primary sources 311

Bibliography 312

Catalogue 325

Cargo ships over 14 m length 325

Other ships used for comparison 329

APPENDIX 1

The iron objects found near
the keel of the Lynæs 2 ship
by Tinna Damgård-Sørensen 331

A sword blade 331

A battle axe 332

Another battle axe 333

A frying-pan 334

Three rivets 335

Discussion 335

Postscript *by Michael R. Kristiansen* 336

References 337

APPENDIX 2

Linden bast cordage
from the Karschau ship
by Ole Magnus (†) 338

Technical background 338

Examination method 340

Identification as linden bast 340

Description of individual fragments 340

Analysis of the individual finds 343

Quality of workmanship 346

Conclusion 347

Reference 348

APPENDIX 3

The hair and textile caulking
of the medieval cargo ship-finds Lynæs 1,
Karschau and Haderslev
by Susan Möller-Wiering 349

Woven textiles and loosely spun yarns from
the ship-find Lynæs 1 349

Unprocessed staples, loose fibres, loosely spun yarn
and a woven textile from the Karschau ship 351

A staple from the Haderslev ship 354

Discussion 355

References 355

APPENDIX 4

Dendrochronological analysis of
medieval cargo ships from Danish waters
by Aoife Daly 356

Introduction 356

Results of the dendrodating and
dendroprovenancing 357

Discussion 371
