About the Editor.....	xlix
<b>CHAPTER 1 OPTICAL PERFORMANCE MONITORING: PERSPECTIVES AND CHALLENGES .....</b>	<b>1</b>
1.1 Introduction.....	1
1.1.1 Overarching vision .....	2
1.1.2 Challenges .....	3
1.2 Physical-Layer Measurements and Routing Decisions in Today's Optical Networks.....	4
1.3 Signal Parameters Requiring Monitoring and OPM Techniques .....	5
1.3.1 Optical impairments .....	5
1.3.2 OPM techniques .....	8
1.4 Laudable OPM-Enabled Functionalities in Next-Generation Optical Networks .....	9
1.4.1 Robust and stable operation.....	9
1.4.2 Accommodate transparency .....	10
1.4.3 Impairment-aware routing.....	10
1.4.4 Secure links .....	12
1.4.5 Optical supervisory channel.....	13
1.5 Smart Network Operation and Security.....	13
1.5.1 Smart network operation.....	14
1.5.2 Security .....	14
1.6 Summary .....	16
<b>CHAPTER 2 OPTICAL SIGNAL-TO-NOISE RATIO MONITORING .....</b>	<b>21</b>
2.1 Introduction.....	21
2.2 Linear Interpolation Techniques .....	22
2.2.1 Optical spectrum analysis .....	22
2.2.2 Out-of-band noise measurement.....	23
2.2.3 Potential problems.....	24
2.3 Polarization-Based Techniques .....	26
2.3.1 Operating principles .....	26
2.3.2 Potential problems and limitations .....	30
2.3.3 Methods to overcome limitations .....	36

2.4	Interferometer-Based Technique .....	41
2.4.1	Operating principle.....	41
2.4.2	Potential problems and limitations .....	42
2.4.3	Method to overcome limitations.....	42
2.5	Beat Noise Analysis Techniques .....	43
2.5.1	Operating principle.....	43
2.5.2	Potential problems and limitations .....	45
2.5.3	Methods to overcome limitations .....	47
2.6	OSNR Estimation Technique Based on the Operating Condition of Optical Amplifiers .....	56
2.6.1	Operating principle.....	56
2.6.2	Link-based OSNR monitoring technique .....	57
2.6.3	Potential problems and limitations .....	59
2.7	Summary .....	61
<b>CHAPTER 3</b>	<b>CHROMATIC DISPERSION MONITORING .....</b>	<b>67</b>
3.1	Introduction.....	67
3.2	Chromatic Dispersion and Its Effects on Optical Fiber Systems .....	68
3.2.1	Fiber chromatic dispersion.....	68
3.2.2	Systems limitations due to chromatic dispersion.....	70
3.2.3	Dispersion effects in the presence of fiber nonlinearities .....	73
3.2.4	The need for chromatic dispersion monitoring.....	75
3.3	Chromatic Dispersion Monitoring Techniques.....	77
3.3.1	Measurement of RF spectrum .....	77
3.3.2	Measurement of relative group delay between VSB signals .....	80
3.3.3	Histogram monitoring techniques.....	81
3.3.4	All-optical spectral analysis using nonlinear optics .....	85
3.3.5	Electronic monitoring techniques .....	88
3.3.6	Other chromatic dispersion monitoring techniques .....	89
3.3.7	Differentiate chromatic dispersion from polarization mode dispersion.....	90
3.4	Summary .....	92
	Acknowledgments .....	92
<b>CHAPTER 4</b>	<b>POLARIZATION MODE DISPERSION MONITORING .....</b>	<b>101</b>
4.1	Introduction.....	101
4.2	PMD Monitoring Based on Measurement of RF Tone .....	106
4.3	PMD Monitoring Based on Measurement of Degree of Polarization.....	111
4.4	Electronic PMD Monitoring Techniques.....	117
4.5	Other PMD Monitoring Techniques .....	121
4.6	Summary .....	121
	Acknowledgments .....	122

<b>CHAPTER 5</b>	<b>TIMING MISALIGNMENT MONITORING</b> .....	<b>127</b>
5.1	Introduction.....	127
5.2	Monitoring of Timing Alignment.....	128
5.2.1	Synchronization of pulse carver and data modulation.....	128
5.2.2	Synchronization for phase remodulation.....	134
5.2.3	Synchronization for I/Q data and data/pulse carver.....	134
5.2.4	OTDM clock recovery using timing misalignment of data pulses.....	136
5.3	Investigation of the Effects of Timing Misalignment.....	137
5.3.1	Clock/data synchronization in CPFSK systems.....	137
5.3.2	Misalignment between pulse carver/data modulator in RZ-DPSK systems.....	137
5.3.3	Misalignment between ASK and DQPSK modulation in ASK/DQPSK orthogonal modulation systems.....	138
5.4	Mitigation of Timing Misalignment.....	140
5.4.1	Hybrid OTDM scheme for demultiplexing with better timing misalignment tolerance.....	140
5.4.2	Novel remodulation scheme for colorless high-speed WDM-PON without remodulation synchronization.....	140
5.4.3	Misalignment mitigation using MLSE equalizers.....	141
5.5	Summary.....	141
<b>CHAPTER 6</b>	<b>OPTICAL PERFORMANCE MONITORING BASED ON ASYNCHRONOUS AMPLITUDE HISTOGRAMS</b> .....	<b>145</b>
6.1	Introduction.....	145
6.2	Monitoring Techniques Based on Analysis of Asynchronous Histograms.....	149
6.2.1	Q-factor monitoring.....	149
6.2.2	OSNR monitoring using asynchronous histograms.....	157
6.3	General Concepts on the Acquisition and Processing of Amplitude Histograms.....	163
6.3.1	Sampling noise.....	163
6.3.2	Averaging effects.....	168
6.4	Summary.....	172
<b>CHAPTER 7</b>	<b>OPTICAL PERFORMANCE MONITORING BASED ON ASYNCHRONOUS DELAY-TAP SAMPLING</b> .....	<b>175</b>
7.1	Introduction.....	175
7.2	Technique.....	176
7.2.1	Phase portrait.....	177
7.2.2	Pattern recognition.....	180
7.3	Experiment.....	182
7.3.1	Network emulator.....	182

7.3.2	Multi-impairment monitor .....	183
7.3.3	First-order PMD .....	183
7.3.4	Results for 10-G NRZ and 40-G NRZ-DPSK .....	183
7.3.5	System testing .....	185
<b>7.4</b>	<b>Discussion .....</b>	<b>187</b>
7.4.1	Extension to new impairments .....	188
7.4.2	Application to higher-order formats .....	188
<b>7.5</b>	<b>Summary .....</b>	<b>191</b>
<b>CHAPTER 8</b>	<b>OPTICAL PERFORMANCE MONITORING BASED ON OPTICAL SAMPLING .....</b>	<b>193</b>
<b>8.1</b>	<b>Introduction .....</b>	<b>193</b>
8.1.1	Data encoding in the electric field of optical waves .....	193
8.1.2	Temporal characterization of optical signals .....	194
8.1.3	Linear optical sampling .....	196
<b>8.2</b>	<b>LOS Principle and Properties .....</b>	<b>196</b>
8.2.1	Coherent detection .....	196
8.2.2	Various implementations of coherent detection for optical performance monitoring .....	199
8.2.3	Polarization and wavelength sensitivity .....	201
8.2.4	Phase sensitivity .....	202
8.2.5	Digital phase tracking .....	204
<b>8.3</b>	<b>Implementations of LOS .....</b>	<b>205</b>
8.3.1	Balanced photodetection .....	206
8.3.2	Direct photodetection .....	208
8.3.3	LOS with four-wave mixing .....	208
8.3.4	Correction of imperfections .....	209
<b>8.4</b>	<b>Optical Performance Monitoring with LOS .....</b>	<b>211</b>
8.4.1	Characterization of amplified spontaneous emission .....	211
8.4.2	Phase and amplitude noise measurements .....	211
8.4.3	Nonlinear phase noise .....	213
8.4.4	Nonlinear phase shift measurement .....	216
8.4.5	Digital processing of sampled electric field .....	216
8.4.6	Characterization of the electric field of periodic sources .....	217
<b>8.5</b>	<b>Recent Results and Related Techniques .....</b>	<b>218</b>
<b>8.6</b>	<b>Summary .....</b>	<b>219</b>
	Acknowledgments .....	219
<b>CHAPTER 9</b>	<b>OPTICAL PERFORMANCE MONITORING BASED ON RF PILOT TONES .....</b>	<b>223</b>
<b>9.1</b>	<b>Introduction .....</b>	<b>223</b>

9.2 Performance Monitoring Techniques Using AM Pilot Tones .....	224
9.2.1 Operating principle.....	224
9.2.2 Potential problems.....	225
9.2.3 Scalability .....	232
9.2.4 Typical applications .....	234
9.3 Performance Monitoring Techniques Using PM and FM Pilot Tones.....	238
9.3.1 Using PM pilot tones .....	238
9.3.2 Using FM pilot tones .....	243
9.4 Dispersion Monitoring Techniques for Adaptive Compensators.....	245
9.4.1 CD monitoring techniques using AM and PM pilot tones.....	246
9.4.2 CD monitoring technique using chirped pilot tone .....	249
9.4.3 CD monitoring technique using pilot tone carried by broadband light source.....	252
9.4.4 PMD monitoring technique using SSB pilot tone .....	256
9.5 Summary .....	258
<b>CHAPTER 10 OPTICAL PERFORMANCE MONITORING BASED ON ELECTRONIC DIGITAL SIGNAL PROCESSING .....</b>	<b>261</b>
10.1 Introduction.....	261
10.2 OPM in Digital Direct Detection Systems .....	263
10.2.1 The channel model for direct detection systems .....	264
10.2.2 State-based equalization based on MLSE.....	265
10.2.3 State-based OSNR estimation.....	268
10.2.4 Referenced parameter estimation .....	271
10.2.5 Conclusion.....	274
10.3 OPM in Digital Coherent Receivers.....	274
10.3.1 Theory.....	275
10.3.2 Joint estimation of linear channel parameters .....	280
10.3.3 Conclusion.....	295
10.4 Summary .....	296
<b>CHAPTER 11 OPTICAL PERFORMANCE MONITORING BASED ON NONLINEAR OPTICAL TECHNIQUES .....</b>	<b>301</b>
11.1 Introduction.....	301
11.2 Nonlinear Optics.....	303
11.3 OPM Techniques Using Nonlinear Optics .....	304
11.4 Key Challenges.....	309
11.4.1 Sensitivity .....	309
11.4.2 Cost, size, and complexity .....	312
11.4.3 Impairment isolation .....	312
11.5 Summary .....	314

<b>CHAPTER 12</b>	<b>OPTICAL PERFORMANCE MONITORING OF OPTICAL PHASE-MODULATED SIGNALS .....</b>	<b>319</b>
12.1	Introduction.....	319
12.2	Performance of Phase-Modulated Signals.....	320
12.2.1	Signal impairments.....	321
12.2.2	Generation and detection of N-PSK signals .....	325
12.3	Optical Performance Monitoring .....	327
12.3.1	Monitoring techniques .....	327
12.3.2	Comparison of monitoring techniques .....	343
12.4	Summary.....	345
	Acknowledgments .....	346
<b>CHAPTER 13</b>	<b>OPTICAL PERFORMANCE MONITORING FOR COHERENT OPTICAL SYSTEMS .....</b>	<b>351</b>
13.1	Historical Aspect of Coherent Optical Systems.....	351
13.2	Single-Carrier and Multicarrier Coherent Optical Systems.....	352
13.2.1	Principle of coherent detection.....	353
13.2.2	Single-carrier coherent optical system .....	354
13.2.3	Coherent optical OFDM system.....	356
13.2.4	Comparison of single-carrier and multicarrier coherent optical system.....	360
13.3	OPM Using Coherent Detection.....	361
13.3.1	OPM without receiver electrical equalization.....	361
13.3.2	OPM with receiver electrical equalization.....	366
13.4	OPM in CO-OFDM Systems .....	368
13.4.1	Optical channel model .....	369
13.4.2	Principle of OPM through optical channel estimation .....	371
13.5	Progress in OPM for CO-OFDM Systems.....	373
13.5.1	Simulation model and results .....	373
13.5.2	Optical performance monitoring in CO-OFDM systems with 4-QAM ...	375
13.5.3	OPM in CO-OFDM systems with 16-QAM modulation .....	378
13.6	OPM Experiment Results.....	379
13.7	Summary.....	381
<b>CHAPTER 14</b>	<b>OPTICAL PERFORMANCE MONITORING IN OPTICAL TRANSPORT NETWORKS .....</b>	<b>385</b>
14.1	Introduction.....	385
14.2	Overview.....	385
14.2.1	Business interface model .....	385
14.2.2	Generic OTN service requirements.....	386
14.2.3	OTN: A network of networks.....	387

<b>14.3</b>	Generic Modeling Principles for Transport Networks.....	388
14.3.1	Top-level functional architecture.....	388
14.3.2	Control plane functions.....	388
14.3.3	Management functions.....	388
14.3.4	Transport functions.....	390
<b>14.4</b>	Modeling of Multilayer Networks.....	390
14.4.1	Application of partitioning concept.....	392
14.4.2	Application of the layering concept.....	392
14.4.3	Transport entities: trails and connections.....	392
14.4.4	Characteristic information.....	393
<b>14.5</b>	Optical Transport Network–Layered Structure.....	393
14.5.1	OTN-layer networks.....	393
14.5.2	Layer management.....	394
14.5.3	OTN information structure.....	394
<b>14.6</b>	OTN Services.....	395
14.6.1	All-Optical Networks.....	395
<b>14.7</b>	Test and Measurement Tasks in Optical Networking.....	396
14.7.1	Lightpath provisioning.....	396
14.7.2	Service assurance.....	398
<b>14.8</b>	Optical Performance Monitoring.....	400
14.8.1	Optical-layer signal quality supervision requirements.....	401
14.8.2	Optical power.....	403
14.8.3	Channel wavelength.....	403
14.8.4	OSNR.....	403
14.8.5	Q-factor measurement.....	407
14.8.6	OTUk, ODUkT, and ODUkP signal quality supervision.....	409
14.8.7	What is missing?.....	410
<b>14.9</b>	Implementation Issues.....	411
14.9.1	Accuracy requirements.....	411
14.9.2	External versus embedded monitoring.....	412
14.9.3	Monitoring points.....	413
14.9.4	Recommended measurement interval.....	414
14.9.5	Risk management aspects.....	415
14.9.6	Improved fault diagnostics by event correlation.....	417
<b>14.10</b>	Future Challenges.....	419
<b>14.11</b>	Summary.....	419
<b>CHAPTER 15</b>	<b>OPTICAL PERFORMANCE MONITORING IN OPTICAL LONG-HAUL TRANSMISSION SYSTEMS.....</b>	<b>423</b>
<b>15.1</b>	Introduction.....	423

<b>15.2</b> Elements of a Long-Haul Transmission System.....	424
<b>15.3</b> System Performance Measures .....	430
<b>15.4</b> OPM in a Long-Haul Transmission System .....	432
15.4.1 OPM functions and applications .....	432
15.4.2 Optical device monitoring .....	433
15.4.3 OSNR monitoring along transmission line .....	435
15.4.4 Transmission performance testing and analysis.....	438
15.4.5 Service-oriented system design .....	442
<b>15.5</b> Summary .....	445
<b>Index</b> .....	<b>447</b>
