

CONTENTS

PREFACE	ix
1. INTRODUCTION	1
Guiding Presuppositions	1
The Basic Concepts	2
Methods of Investigation and Analysis	4
Summary	5
2. A CRITIQUE OF CURRENT PSYCHIATRIC CLASSIFICATION	7
Current Attitudes	7
The Uses of Psychiatric Diagnosis	8
Claimed Defects of the Current Nomenclature	10
Basic Conceptual Ambiguities	12
The Problems of Reliability and Objectivity	14
The Problem of Validity	17
Need for Uniform Criteria	18
Summary	20
3. ISOLATION AND MEASUREMENT OF TEN PSYCHOTIC SYNDROMES	21
Background	21
The Research Plan	23
The Hypothesized Syndromes	23
The Kinds of Variables Measured	24
The Standard of Reference	25
Guiding Criteria in Scale Writing	26
Anchoring the Scale	28
The Method of Factor Analysis	29
The Initial Experiment	32
The Normative Study	33
The Isolated Syndromes	34
Reliability of IMPS	38
The Final Form	40
Summary	40

4.	A REVIEW OF FACTOR ANALYTIC STUDIES	42
	Criteria for an Adequate Factor Analysis	42
	Experimental Requirements	44
	The Moore–Degan Study	45
	Some Early Studies	46
	The Wittenborn Studies	48
	The MSRPP Studies	51
	Analysis of a Mental Status Examination	53
	The Trouton–Maxwell Study	54
	Analysis of Special Groups	56
	The Hamilton Syndromes	57
	Studies of Depression	57
	Ward Scale Analyses	59
	Summary	63
5.	THE CONFIRMED SYNDROMES	64
	Method of Cross-Identification	64
	The Interview Syndromes	66
	The Ward Syndromes	75
	Summary	78
6.	HIGHER LEVEL SYNDROMES	79
	Higher Order Syndromes	79
	Criteria for an Adequate Analysis	80
	Degan’s Higher Level Patterns	81
	Wittenborn Scale Factors	83
	MSRPP Higher Order Syndromes	84
	Higher Level Syndromes in IMPS	86
	Cross-Study Comparisons	94
	Summary	97
7.	VALIDITY OF THE SYNDROMES	98
	Patient Type	100
	Diagnosis	103
	Correlates of the Syndromes	105
	An Application of the IMPS	105
	A Multimethod Test of Validity	108
	Some Additional Data	112
	Summary	113

8. THE SYNDROME CIRCLE	114
The Circular Order Concept	114
A Psychotic Syndrome Circle	117
Merits of the Psychotic Syndrome Circle	122
The Missing Syndromes	124
The Schizophrenic Circle	125
Summary	127
9. CLASSIFICATION AND TYPING	128
The Concept of Type	128
Value of Typing	130
Single and Multiple Purpose Types	131
Some Methodological Problems	133
Measures of Profile Similarity	134
Agreement as Similarity	136
Conditions for an Adequate Typing Analysis	137
Approaches to Typing	139
Typing by Agreement Analysis	139
Typing by Factor Analysis	141
Typing by Cluster Analysis	142
Summary	144
10. A BRIEF HISTORY OF PSYCHIATRIC CLASSIFICATION	145
The Classical Triad	145
Sixteenth to Eighteenth Century Psychiatry	147
Pinel to Kraepelin	150
Nineteenth Century French Psychiatry	150
Nineteenth Century English Psychiatry	153
Nineteenth Century German Psychiatry	154
Bleuler, Meyer, and the Analysts	157
American Standard Nomenclatures	159
Summary	160
11. A REVIEW OF TYPING STUDIES	162
Types Through Factor Analysis	162
Types by Agreement Analysis	166
Analysis of Diagnostic Groups	167
Summary	169

12. SYNDROME-BASED TYPES	170
Problem and Sample	170
The Similarity Indices	171
The Typing Process	172
Replication of the Types	173
Isolation of Types by D^2	174
Typing with Covariances	175
Evidence for the Six Types	178
Interpretation of the Patient Types	181
Summary	191
13. DIMENSIONS OF TYPE DIFFERENCES	193
Study Purposes	193
The Multiple Discriminant Analysis	194
The Dimensions of Type Difference	198
Comparison with Second-Order Factors	205
Classifying Patients	206
Summary	207
APPENDIXES A, B, C. INPATIENT MULTIDIMENSIONAL PSYCHIATRIC SCALE	209
APPENDIX D. TWO METHODS OF CLASSIFYING PSYCHOTICS	245
APPENDIX E. ILLUSTRATIVE CASE HISTORIES OF THE SIX PATIENT TYPES	251
APPENDIX F. SYNDROME-BASED TYPES	261
REFERENCES	265
AUTHOR INDEX	275
SUBJECT INDEX	279
