

## Contents

List of Figures .....	V
List of Tables .....	XI
Abbreviations .....	XIII
Summary .....	XV
Zusammenfassung .....	XIX
 Chapter 1	
General introduction and objectives .....	1
1.1 General introduction .....	2
1.1.1 Recent problems of land use in Amazonia .....	2
1.1.2 Pre-Columbian anthropogenic ecosystem modifications as model for sustainable agriculture in the humid tropics .....	2
1.1.3 Nutrients and nutrient sources in pre-Columbian modified soils .....	4
1.1.4 Methods for identification and quantification of nutrient inputs into soils .....	5
1.2 Objectives .....	8
 Chapter 2	
State of the scientific knowledge on properties and genesis of Anthropogenic Dark Earths in Central Amazonia ( <i>terra preta de Índia</i> ) .....	11
2.1 Abstract .....	12
2.2 Introduction .....	12
2.3 Classification and occurrence of ADE .....	14
2.3.1 Classification .....	14
2.3.2 Occurrence .....	15
2.4 Ecological properties of <i>terra preta</i> .....	16
2.4.1 pH .....	16
2.4.2 Nutrients in terra preta .....	17
2.4.3 Nutrient holding capacity .....	17
2.4.4 SOM stability .....	19
2.5 Theories of <i>terra preta</i> genesis .....	21
2.5.1 Sedimentation of allochthonous soil material vs. in situ genesis .....	21
2.5.2 Sources of biochar .....	22
2.5.3 Nutrient sources and further amendments .....	23
2.5.4 Role of microorganisms in terra preta genesis .....	25
2.5.5 Intentional vs. unintentional terra preta creation .....	29
2.6 Conclusions .....	29
 Chapter 3	
Faeces deposition on Amazonian Anthrosols as assessed from 5 $\beta$ -stanols .....	31
3.1 Abstract .....	32

3.2 Introduction .....	32
3.2.1 Amazonian Dark Earths and agriculture in Amazonia .....	32
3.2.2 Geochemical properties and genesis of ADE .....	33
3.2.3 $5\beta$ -stanols as biomarkers for faecal input into archaeological soils .....	34
3.3 Materials and methods .....	35
3.3.1 Sites and sampling .....	35
3.3.2 Analytical procedures .....	37
3.3.3 Calculations .....	38
3.4 Results .....	39
3.4.1 Amounts of $\Delta^5$ -sterols and non-faecal derived stanols .....	39
3.4.2 Amounts of the faecal biomarkers $5\beta$ -cholestan- $3\beta$ -ol and $5\beta$ -cholestan- $3\alpha$ -ol .....	41
3.4.3 Relative abundances of the faecal biomarker $5\beta$ -stigmastan- $3\beta$ -ol .....	42
3.4.4 $5\beta/(5\beta + 5\alpha)$ -stanol ratios .....	44
3.5 Discussion .....	45
3.5.1 Threshold values to detect ancient faecal deposition on ADE vs. comparison to reference soils .....	45
3.5.2 Concentrations of $\Delta^5$ -sterols and non-faecal derived stanols .....	46
3.5.3 Concentrations of biomarkers characteristic for faeces ( $5\beta$ -stanols) and $5\beta/(5\beta + 5\alpha)$ -stanol ratios .....	47
3.5.4 Origin of faeces in ADE .....	49
3.6 Conclusions .....	50

## Chapter 4

Combined quantification of faecal sterols, stanols, stanones and bile acids in soils and terrestrial sediments by gas chromatography-mass spectrometry .....	51
4.1 Abstract .....	52
4.2 Introduction .....	52
4.3 Experimental .....	54
4.3.1 Chemical and reagents .....	54
4.3.2 Soil samples .....	57
4.3.3 Lipid extraction .....	57
4.3.4 Saponification .....	57
4.3.5 Sequential liquid-liquid extraction .....	59
4.3.6 Methylation of bile acids .....	59
4.3.7 SPE clean up .....	59
4.3.8 Silylation .....	60
4.3.9 External standards .....	60
4.3.10 GC-MS analysis and quantification .....	60
4.3.11 Comparison of effects of different saponification procedures .....	61
4.3.12 Method evaluation .....	61
4.4 Results and discussion .....	63
4.4.1 Saponification .....	63

4.4.2 Sequential liquid–liquid extraction .....	65
4.4.3 SPE clean up and derivatisation .....	66
4.4.4 Method validation and analytical performance.....	68
4.5 Conclusions.....	71

## Chapter 5

### Ecological engineers ahead of their time:

The functioning of pre-Columbian raised-field agriculture and its potential contributions to sustainability today.....	73
5.1 Abstract.....	74
5.2 Introduction.....	74
5.2.1 The search for sustainable agriculture .....	74
5.2.2 What science is needed? .....	75
5.2.3 Folk knowledge, contemporary and past, as a source of inspiration for agroecological innovation .....	75
5.2.4 Advantages of raised-field agriculture and its pertinence to today's problems.....	78
5.3 Towards a systems-level understanding of raised-field agriculture .....	80
5.3.1 Raised-field agriculture as ecological engineering .....	80
5.3.2 Agroecological functioning at the field level.....	83
5.4 Raised-field agriculture: is it pertinent to today's world? .....	94
5.4.1 Why promote further agricultural conversion of wetlands? .....	95
5.4.2 What factors could limit the adoption of this way of practicing agriculture? .....	96
5.4.3 Labor requirements and the potential of raised-field agriculture to support viable rural livelihoods .....	97
5.5 Conclusion .....	99

## Chapter 6

### Legacy of pre-Columbian raised-field agriculture in French Guiana on soil organic matter and nutrient concentrations .....

6.1 Abstract.....	102
6.2 Introduction.....	102
6.3 Material and Methods .....	105
6.3.1 Study area.....	105
6.3.2 Sampled raised fields and flat areas .....	107
6.3.3 Soil sampling.....	109
6.3.4 Analyses .....	109
6.3.5 Statistical analysis .....	110
6.4 Results.....	111
6.4.1 pH .....	111
6.4.2 Total organic carbon and total nitrogen .....	111
6.4.3 Plant-available element concentrations.....	113

6.4.4 Pseudo-total nutrient amounts (large raised fields at the Bois Diable and the K-VIII sites) .....	117
6.5 Discussion.....	120
6.5.1 Total organic carbon and application of organic material .....	120
6.5.2 Amounts of phosphorus and fertilization .....	122
6.5.3 Concentrations of Ca, K, Mg and Na.....	124
6.5.4 Amounts of pseudo-total Cu, Ba and Zn .....	127
6.6 Conclusions .....	127
 Chapter 7	
Synopsis and conclusions.....	129
7.1 Synopsis.....	130
7.1.1 Nutrient sources in terras pretas and steroid analysis .....	130
7.1.2 Nutrients in raised fields and nutrient management in pre-Columbian raised-field agriculture in Amazonia .....	133
7.2 Conclusions .....	137
 References .....	139
 Appendices .....	175
Appendix 1 (Chapter 4) Equation for the calculation of relative standard deviation (RSD).....	176
Appendix 2 (Chapter 6) .....	177
Appendix 2.1 SI1 Genesis, archaeological background and distribution of sampled raised fields .....	177
Appendix 2.2 SI2 Figures .....	180
 Acknowledgements .....	193
 Hallenser Bodenwissenschaftliche Abhandlungen	
Bislang erschienene Bände.....	195
