

# Brief Table of Contents

Preface	19
About the Author	23
<b>CHAPTER 1</b>	Remembering General Chemistry: Electronic Structure and Bonding 29
<b>CHAPTER 2</b>	Acids and Bases: Central to Understanding Organic Chemistry 68
<b>TUTORIAL</b>	Acids and Bases 93
<b>CHAPTER 3</b>	An Introduction to Organic Compounds 101
<b>CHAPTER 4</b>	Isomers: The Arrangement of Atoms in Space 144
<b>CHAPTER 5</b>	Alkenes 176
<b>TUTORIAL</b>	An Exercise in Drawing Curved Arrows: Pushing Electrons 202
<b>CHAPTER 6</b>	The Reactions of Alkenes and Alkynes 210
<b>CHAPTER 7</b>	Delocalized Electrons and Their Effect on Stability, $pK_a$ , and the Products of a Reaction • Aromaticity and the Reactions of Benzene 242
<b>TUTORIAL</b>	Drawing Resonance Contributors 283
<b>CHAPTER 8</b>	Substitution and Elimination Reactions of Alkyl Halides 291
<b>CHAPTER 9</b>	Reactions of Alcohols, Ethers, Epoxides, Amines, and Thiols 331
<b>CHAPTER 10</b>	Determining the Structure of Organic Compounds 367
<b>CHAPTER 11</b>	Reactions of Carboxylic Acids and Carboxylic Acid Derivatives 421
<b>CHAPTER 12</b>	Reactions of Aldehydes and Ketones • More Reactions of Carboxylic Acid Derivatives 459
<b>CHAPTER 13</b>	Reactions at the $\alpha$ -Carbon of Carbonyl Compounds 489
<b>CHAPTER 14</b>	Radicals 513
<b>CHAPTER 15</b>	Synthetic Polymers 527
<b>CHAPTER 16</b>	The Organic Chemistry of Carbohydrates 553
<b>CHAPTER 17</b>	The Organic Chemistry of Amino Acids, Peptides, and Proteins 577
<b>CHAPTER 18</b>	How Enzymes Catalyze Reactions • The Organic Chemistry of the Vitamins AVAILABLE ON-LINE
<b>CHAPTER 19</b>	The Organic Chemistry of the Metabolic Pathways 609
<b>CHAPTER 20</b>	The Organic Chemistry of Lipids 634
<b>CHAPTER 21</b>	The Chemistry of the Nucleic Acids 650
<b>APPENDICES I</b>	Physical Properties of Organic Compounds AVAILABLE ON-LINE
<b>APPENDICES II</b>	Spectroscopy Tables AVAILABLE ON-LINE
	Answers to Selected Problems A-1
	Glossary G-1
	Photo Credits P-1
	Index I-1

# Contents

## 1 Remembering General Chemistry: Electronic Structure and Bonding 29

	<b>NATURAL ORGANIC COMPOUNDS VERSUS SYNTHETIC ORGANIC COMPOUNDS 30</b>
1.1	The Structure of an Atom 31
1.2	How the Electrons in an Atom Are Distributed 32
1.3	Ionic and Covalent Bonds 34
1.4	How the Structure of a Compound Is Represented 40
	<b>PROBLEM-SOLVING STRATEGY 42</b>
1.5	Atomic Orbitals 45
1.6	How Atoms Form Covalent Bonds 46
1.7	How Single Bonds Are Formed in Organic Compounds 47
1.8	How a Double Bond Is Formed: The Bonds in Ethene 50
	<b>DIAMOND, GRAPHITE, GRAPHENE, AND FULLERENES: SUBSTANCES THAT CONTAIN ONLY CARBON ATOMS 52</b>
1.9	How a Triple Bond Is Formed: The Bonds in Ethyne 52
1.10	The Bonds in the Methyl Cation, the Methyl Radical, and the Methyl Anion 54
1.11	The Bonds in Ammonia and in the Ammonium Ion 56
1.12	The Bonds in Water 57
	<b>WATER—A COMPOUND CENTRAL TO LIFE 58</b>
1.13	The Bond in a Hydrogen Halide 58
1.14	Summary: Hybridization, Bond Lengths, Bond Strengths, and Bond Angles 60
	<b>PROBLEM-SOLVING STRATEGY 62</b>
1.15	The Dipole Moments of Molecules 63
	<b>SOME IMPORTANT THINGS TO REMEMBER 64 ■ PROBLEMS 65</b>

**New chapter on Acid/Base Chemistry reinforces fundamental concepts and foundational skills needed for future topics in organic chemistry.**

## 2 Acids and Bases: Central to Understanding Organic Chemistry 68

2.1	An Introduction to Acids and Bases 68
2.2	$pK_a$ and pH 70
	<b>ACID RAIN 72</b>
2.3	Organic Acids and Bases 72
	<b>POISONOUS AMINES 73</b>
	<b>PROBLEM-SOLVING STRATEGY 75</b>
2.4	How to Predict the Outcome of an Acid–Base Reaction 76
2.5	How to Determine the Position of Equilibrium 76
2.6	How the Structure of an Acid Affects Its $pK_a$ Value 77
2.7	How Substituents Affect the Strength of an Acid 81
	<b>PROBLEM-SOLVING STRATEGY 82</b>
2.8	An Introduction to Delocalized Electrons 83
	<b>FOSAMAX PREVENTS BONES FROM BEING NIBBLED AWAY 84</b>
2.9	A Summary of the Factors that Determine Acid Strength 85
2.10	How pH Affects the Structure of an Organic Compound 86
	<b>PROBLEM-SOLVING STRATEGY 87</b>
	<b>ASPIRIN MUST BE IN ITS BASIC FORM TO BE PHYSIOLOGICALLY ACTIVE 88</b>

### MasteringChemistry\* for Organic Chemistry

MasteringChemistry tutorials guide you through topics in chemistry with self-paced tutorials that provide individualized coaching. These assignable, in-depth tutorials are designed to coach you with hints and feedback specific to your individual needs. For additional practice on Acids and Bases, go to MasteringChemistry where the following tutorials are available:

- Acids and Bases: Base Strength and the Effect of pH on Structure
- Acids and Bases: Factors that Influence Acid Strength
- Acids and Bases: Predicting the Position of Equilibrium
- Acids and Bases: Definitions

- 2.11 Buffer Solutions 89  
**BLOOD: A BUFFERED SOLUTION** 89  
 SOME IMPORTANT THINGS TO REMEMBER 90 ■ PROBLEMS 91

TUTORIAL ACIDS AND BASES 93

## 3 An Introduction to Organic Compounds 101

- 3.1 How Alkyl Substituents Are Named 104  
**BAD-SMELLING COMPOUNDS** 105
- 3.2 The Nomenclature of Alkanes 108  
**HOW IS THE OCTANE NUMBER OF GASOLINE DETERMINED?** 110
- 3.3 The Nomenclature of Cycloalkanes • Skeletal Structures 111  
**PROBLEM-SOLVING STRATEGY** 112
- 3.4 The Nomenclature of Alkyl Halides 114  
**PROBLEM-SOLVING STRATEGY** 114
- 3.5 The Classification of Alkyl Halides, Alcohols, and Amines 115  
**NITROSAMINES AND CANCER** 115
- 3.6 The Structures of Alkyl Halides, Alcohols, Ethers, and Amines 116
- 3.7 Noncovalent Interactions 118  
**PROBLEM-SOLVING STRATEGY** 121  
**DRUGS BIND TO THEIR RECEPTORS** 122
- 3.8 Factors that Affect the Solubility of Organic Compounds 122  
**CELL MEMBRANES** 125
- 3.9 Rotation Occurs About Carbon—Carbon Single Bonds 125
- 3.10 Some Cycloalkanes have Angle Strain 128  
**VON BAEYER, BARBITURIC ACID, AND BLUE JEANS** 129
- 3.11 Conformers of Cyclohexane 129
- 3.12 Conformers of Monosubstituted Cyclohexanes 132  
**STARCH AND CELLULOSE—AXIAL AND EQUATORIAL** 133
- 3.13 Conformers of Disubstituted Cyclohexanes 134  
**PROBLEM-SOLVING STRATEGY** 134
- 3.14 Fused Cyclohexane Rings 137  
**CHOLESTEROL AND HEART DISEASE** 138  
**HOW HIGH CHOLESTEROL IS TREATED CLINICALLY** 138  
 SOME IMPORTANT THINGS TO REMEMBER 139 ■ PROBLEMS 139

New Feature—Tutorials help students develop and practice important problem solving skills.

## 4 Isomers: The Arrangement of Atoms in Space 144

- 4.1 Cis–Trans Isomers Result from Restricted Rotation 145  
**CIS-TRANS INTERCONVERSION IN VISION** 148
- 4.2 Designating Geometric Isomers Using the *E,Z* System 148  
**PROBLEM-SOLVING STRATEGY** 151
- 4.3 A Chiral Object Has a Nonsuperimposable Mirror Image 151
- 4.4 An Asymmetric Center Is a Cause of Chirality in a Molecule 152
- 4.5 Isomers with One Asymmetric Center 153
- 4.6 How to Draw Enantiomers 154
- 4.7 Naming Enantiomers by the *R,S* System 154  
**PROBLEM-SOLVING STRATEGY** 156  
**PROBLEM-SOLVING STRATEGY** 157
- 4.8 Chiral Compounds Are Optically Active 158
- 4.9 How Specific Rotation Is Measured 160
- 4.10 Isomers with More than One Asymmetric Center 162
- 4.11 Stereoisomers of Cyclic Compounds 163  
**PROBLEM-SOLVING STRATEGY** 164
- 4.12 Meso Compounds Have Asymmetric Centers but Are Optically Inactive 165  
**PROBLEM-SOLVING STRATEGY** 167

New coverage of stereoisomers now precedes the coverage of the reactions of alkenes.

### MasteringChemistry\* for Organic Chemistry

MasteringChemistry tutorials guide you through the toughest topics in chemistry with self-paced tutorials that provide individualized coaching. These assignable, in-depth tutorials are designed to coach you with hints and feedback specific to your individual misconceptions. For additional practice on Drawing Curved Arrows: Pushing Electrons, go to MasteringChemistry where the following tutorials are available:

- An Exercise in Drawing Curved Arrows: Pushing Electrons
- An Exercise in Drawing Curved Arrows: Predicting Electron Movement
- An Exercise in Drawing Curved Arrows: Interpreting Electron Movement

- 4.13 Receptors 168  
**THE ENANTIOMERS OF THALIDOMIDE** 170  
 4.14 How Enantiomers Can Be Separated 170  
**CHIRAL DRUGS** 171  
 SOME IMPORTANT THINGS TO REMEMBER 171 ■ PROBLEMS 172

## 5 Alkenes 176

- PHEROMONES** 177  
 5.1 The Nomenclature of Alkenes 177  
 5.2 How an Organic Compound Reacts Depends on its Functional Group 180  
 5.3 How Alkenes React • Curved Arrows Show the Flow of Electrons 181  
**A FEW WORDS ABOUT CURVED ARROWS** 183  
 5.4 Thermodynamics: How Much Product Is Formed? 185  
 5.5 Increasing the Amount of Product Formed in a Reaction 187  
 5.6 Using  $\Delta H^\circ$  Values to Determine the Relative Stabilities of Alkenes 188  
**PROBLEM-SOLVING STRATEGY** 189  
**TRANS FATS** 192  
 5.7 Kinetics: How Fast Is the Product Formed? 192  
 5.8 The Rate of a Chemical Reaction 194  
 5.9 The Reaction Coordinate Diagram for the Reaction of 2-Butene with HBr 194  
 5.10 Catalysis 196  
 5.11 Catalysis by Enzymes 197  
 SOME IMPORTANT THINGS TO REMEMBER 199 ■ PROBLEMS 200

### TUTORIAL AN EXERCISE IN DRAWING CURVED ARROWS: PUSHING ELECTRONS 202

## 6 The Reactions of Alkenes and Alkynes 210

- GREEN CHEMISTRY: AIMING FOR SUSTAINABILITY** 211  
 6.1 The Addition of a Hydrogen Halide to an Alkene 211  
 6.2 Carbocation Stability Depends on the Number of Alkyl Groups Attached to the Positively Charged Carbon 212  
 6.3 Electrophilic Addition Reactions Are Regioselective 215  
**WHICH ARE MORE HARMFUL, NATURAL PESTICIDES OR SYNTHETIC PESTICIDES?** 217  
**PROBLEM-SOLVING STRATEGY** 217  
 6.4 A Carbocation will Rearrange if It Can Form a More Stable Carbocation 219  
 6.5 The Addition of Water to an Alkene 221  
 6.6 The Stereochemistry of Alkene Reactions 222  
**PROBLEM-SOLVING STRATEGY** 224  
 6.7 The Stereochemistry of Enzyme-Catalyzed Reactions 225  
 6.8 Enantiomers Can Be Distinguished by Biological Molecules 226  
 6.9 An Introduction to Alkynes 227  
**SYNTHETIC ALKYNES ARE USED TO TREAT PARKINSON'S DISEASE** 228  
**WHY ARE DRUGS SO EXPENSIVE?** 229  
 6.10 The Nomenclature of Alkynes 229  
**SYNTHETIC ALKYNES ARE USED FOR BIRTH CONTROL** 230  
 6.11 The Structure of Alkynes 231  
 6.12 The Physical Properties of Unsaturated Hydrocarbons 231  
 6.13 The Addition of a Hydrogen Halide to an Alkyne 232  
 6.14 The Addition of Water to an Alkyne 233  
 6.15 The Addition of Hydrogen to an Alkyne 235  
 SOME IMPORTANT THINGS TO REMEMBER 236 ■ SUMMARY OF REACTIONS 237  
 ■ PROBLEMS 238

## 7 Delocalized Electrons and Their Effect on Stability, $pK_a$ , and the Products of a Reaction • Aromaticity and the Reactions of Benzene 242

- 7.1 Delocalized Electrons Explain Benzene's Structure 243  
**KEKULÉ'S DREAM 245**
- 7.2 The Bonding in Benzene 245
- 7.3 Resonance Contributors and the Resonance Hybrid 246
- 7.4 How to Draw Resonance Contributors 247  
**ELECTRON DELOCALIZATION AFFECTS THE THREE-DIMENSIONAL SHAPE OF PROTEINS 250**
- 7.5 The Predicted Stabilities of Resonance Contributors 250
- 7.6 Delocalization Energy Is the Additional Stability Delocalized Electrons Give to a Compound 252
- 7.7 Delocalized Electrons Increase Stability 253  
**PROBLEM-SOLVING STRATEGY 255**  
**PROBLEM-SOLVING STRATEGY 256**
- 7.8 Delocalized Electrons Affect  $pK_a$  Values 256  
**PROBLEM-SOLVING STRATEGY 259**
- 7.9 Electronic Effects 259
- 7.10 Delocalized Electrons Can Affect the Product of a Reaction 262
- 7.11 Reactions of Dienes 263
- 7.12 The Diels–Alder Reaction Is a 1,4-Addition Reaction 266
- 7.13 Benzene Is an Aromatic Compound 268
- 7.14 The Two Criteria for Aromaticity 269
- 7.15 Applying the Criteria for Aromaticity 270  
**BUCKYBALLS 271**
- 7.16 How Benzene Reacts 272
- 7.17 The Mechanism for Electrophilic Aromatic Substitution Reactions 273  
**THYROXINE 275**
- 7.18 Organizing What We Know About the Reactions of Organic Compounds 276
- SOME IMPORTANT THINGS TO REMEMBER 277**    **SUMMARY OF REACTIONS 277**  
**PROBLEMS 278**

### MasteringChemistry® for Organic Chemistry

MasteringChemistry tutorials guide you through the toughest topics in chemistry with self-paced tutorials that provide individualized coaching. These assignable, in-depth tutorials are designed to coach you with hints and feedback specific to your individual misconceptions. For additional practice on Drawing Resonance Contributors, go to MasteringChemistry where the following tutorials are available:

- Drawing Resonance Contributors I
- Drawing Resonance Contributors II
- Drawing Resonance Contributors of Substituted Benzenes

**New Feature—**  
**Organizing What We Know About Organic Chemistry lets students see how families of organic compounds react in similar ways.**

## TUTORIAL DRAWING RESONANCE CONTRIBUTORS 283

## 8 Substitution and Elimination Reactions of Alkyl Halides 291

- DDT: A SYNTHETIC ORGANOHALIDE THAT KILLS DISEASE-SPREADING INSECTS 292**
- 8.1 The  $S_N2$  Reaction 293
- 8.2 Factors That Affect  $S_N2$  Reactions 297  
**WHY ARE LIVING ORGANISMS COMPOSED OF CARBON INSTEAD OF SILICON? 301**
- 8.3 The  $S_N1$  Reaction 301
- 8.4 Factors That Affect  $S_N1$  Reactions 304
- 8.5 Comparing  $S_N2$  and  $S_N1$  Reactions 305  
**PROBLEM-SOLVING STRATEGY 305**
- NATURALLY OCCURRING ORGANOHALIDES THAT DEFEND AGAINST PREDATORS 307**
- 8.6 Intermolecular versus Intramolecular Reactions 307  
**PROBLEM-SOLVING STRATEGY 309**
- 8.7 Elimination Reactions of Alkyl Halides 309
- 8.8 The Products of an Elimination Reaction 311
- 8.9 Relative Reactivities of Alkyl Halides in Elimination Reactions 315  
**THE NOBEL PRIZE 316**
- 8.10 Does a Tertiary Alkyl Halide Undergo  $S_N2/E2$  Reactions or  $S_N1/E1$  Reactions? 316
- 8.11 Competition between Substitution and Elimination 317

- 8.12 Solvent Effects 320  
**SOLVATION EFFECTS 320**
- 8.13 Substitution Reactions in Synthesis 324  
 SOME IMPORTANT THINGS TO REMEMBER 325 ■ SUMMARY OF REACTIONS 326  
 ■ PROBLEMS 327

## 9 Reactions of Alcohols, Ethers, Epoxides, Amines, and Thiols 331

- 9.1 The Nomenclature of Alcohols 331  
**GRAIN ALCOHOL AND WOOD ALCOHOL 333**
- 9.2 Activating an Alcohol for Nucleophilic Substitution by Protonation 334
- 9.3 Activating an OH Group for Nucleophilic Substitution in a Cell 336  
**THE INABILITY TO PERFORM AN S<sub>N</sub>2 REACTION CAUSES A SEVERE CLINICAL DISORDER 338**
- 9.4 Elimination Reactions of Alcohols: Dehydration 338
- 9.5 Oxidation of Alcohols 341  
**BLOOD ALCOHOL CONTENT 343**  
**TREATING ALCOHOLISM WITH ANTABUSE 343**  
**METHANOL POISONING 344**
- 9.6 Nomenclature of Ethers 344
- 9.7 Nucleophilic Substitution Reactions of Ethers 345  
**ANESTHETICS 347**
- 9.8 Nucleophilic Substitution Reactions of Epoxides 347
- 9.9 Using Carbocation Stability to Determine the Carcinogenicity of an Arene Oxide 351  
**BENZO[A]PYRENE AND CANCER 353**  
**CHIMNEY SWEEPS AND CANCER 354**
- 9.10 Amines Do Not Undergo Substitution or Elimination Reactions 354  
**ALKALOIDS 355**  
**LEAD COMPOUNDS FOR THE DEVELOPMENT OF DRUGS 356**
- 9.11 Thiols, Sulfides, and Sulfonium Salts 356  
**MUSTARD GAS—A CHEMICAL WARFARE AGENT 357**  
**ALKYLATING AGENTS AS CANCER DRUGS 358**
- 9.12 Methylating Agents Used by Chemists versus Those Used by Cells 358  
**ERADICATING TERMITES 359**  
**S-ADENOSYLMETHIONINE: A NATURAL ANTIDEPRESSANT 360**
- 9.13 Organizing What We Know about the Reactions of Organic Compounds 360  
 SOME IMPORTANT THINGS TO REMEMBER 361 ■ SUMMARY OF REACTIONS 361  
 ■ PROBLEMS 363

## 10 Determining the Structure of Organic Compounds 367

- 10.1 Mass Spectrometry 368
- 10.2 The Mass Spectrum • Fragmentation 369
- 10.3 Using The  $m/z$  Value of The Molecular Ion to Calculate the Molecular Formula 371  
**PROBLEM-SOLVING STRATEGY 372**
- 10.4 Isotopes in Mass Spectrometry 373
- 10.5 High-Resolution Mass Spectrometry Can Reveal Molecular Formulas 374
- 10.6 Fragmentation Patterns 375
- 10.7 Gas Chromatography–Mass Spectrometry 376  
**MASS SPECTROMETRY IN FORENSICS 376**
- 10.8 Spectroscopy and the Electromagnetic Spectrum 376
- 10.9 Infrared Spectroscopy 378
- 10.10 Characteristic Infrared Absorption Bands 379
- 10.11 The Intensity of Absorption Bands 379
- 10.12 The Position of Absorption Bands 380
- 10.13 The Position and Shape of an Absorption Band Is Affected by Electron Delocalization, Electron Donation and Withdrawal, and Hydrogen Bonding 380  
**PROBLEM-SOLVING STRATEGY 382**

10.14	The Absence of Absorption Bands	385
10.15	How to Interpret an Infrared Spectrum	386
10.16	Ultraviolet and Visible Spectroscopy	387
	<b>ULTRAVIOLET LIGHT AND SUNSCREENS</b>	<b>388</b>
10.17	The Effect of Conjugation on $\lambda_{\text{max}}$	389
10.18	The Visible Spectrum and Color	390
	<b>WHAT MAKES BLUEBERRIES BLUE AND STRAWBERRIES RED?</b>	<b>391</b>
10.19	Some Uses of UV/VIS Spectroscopy	391
10.20	An Introduction to NMR Spectroscopy	392
	<b>NIKOLA TESLA (1856–1943)</b>	<b>393</b>
10.21	Shielding Causes Different Hydrogens to Show Signals at Different Frequencies	394
10.22	The Number of Signals in an $^1\text{H}$ NMR Spectrum	395
10.23	The Chemical Shift Tells How Far the Signal Is from the Reference Signal	396
10.24	The Relative Positions of $^1\text{H}$ NMR Signals	397
10.25	The Characteristic Values of Chemical Shifts	397
10.26	The Integration of NMR Signals Reveals the Relative Number of Protons Causing Each Signal	399
10.27	The Splitting of Signals Is Described by the $N + 1$ Rule	401
10.28	More Examples of $^1\text{H}$ NMR Spectra	404
	<b>PROBLEM-SOLVING STRATEGY</b>	<b>406</b>
10.29	$^{13}\text{C}$ NMR Spectroscopy	407
	<b>PROBLEM-SOLVING STRATEGY</b>	<b>410</b>

## 12 Reactions of Aldehydes and Ketones • More Reactions of Carboxylic Acid Derivatives 459

- 12.1 The Nomenclature of Aldehydes and Ketones 460  
**BUTANEDIONE: AN UNPLEASANT COMPOUND 461**
- 12.2 The Relative Reactivities of Carbonyl Compounds 462
- 12.3 How Aldehydes and Ketones React 463
- 12.4 Organometallic Compounds 463
- 12.5 The Reactions of Carbonyl Compounds with Grignard Reagents 465  
**SYNTHESIZING ORGANIC COMPOUNDS 467**  
**SEMISYNTHETIC DRUGS 468**  
**PROBLEM-SOLVING STRATEGY 469**
- 12.6 The Reactions of Aldehydes and Ketones with Cyanide Ion 469
- 12.7 The Reactions of Carbonyl Compounds with Hydride Ion 470
- 12.8 The Reactions of Aldehydes and Ketones with Amines 473  
**SERENDIPITY IN DRUG DEVELOPMENT 476**
- 12.9 The Reactions of Aldehydes and Ketones with Alcohols 477  
**CARBOHYDRATES FORM HEMIACETALS AND ACETALS 479**
- 12.10 Nucleophilic Addition to  $\alpha,\beta$ -Unsaturated Aldehydes and Ketones 479
- 12.11 Nucleophilic Addition to  $\alpha,\beta$ -Unsaturated Carboxylic Acid Derivatives 481  
**ENZYME-CATALYZED CIS-TRANS INTERCONVERSION 481**
- 12.12 Conjugate Addition Reactions in Biological Systems 482  
**CANCER CHEMOTHERAPY 482**
- SOME IMPORTANT THINGS TO REMEMBER 483    ◻    SUMMARY OF REACTIONS 483  
 ◻    PROBLEMS 485

## 13 Reactions at the $\alpha$ -Carbon of Carbonyl Compounds 489

- 13.1 The Acidity of an  $\alpha$ -Hydrogen 490  
**PROBLEM-SOLVING STRATEGY 492**
- 13.2 Keto–Enol Tautomers 492
- 13.3 Keto–Enol Interconversion 493
- 13.4 Alkylation of Enolate Ions 495  
**THE SYNTHESIS OF ASPIRIN 496**
- 13.5 An Aldol Addition Forms  $\beta$ -Hydroxyaldehydes or  $\beta$ -Hydroxyketones 496
- 13.6 The Dehydration of Aldol Addition Products forms  $\alpha,\beta$ -Unsaturated Aldehydes and Ketones 498
- 13.7 A Crossed Aldol Addition 499  
**BREAST CANCER AND AROMATASE INHIBITORS 500**
- 13.8 A Claisen Condensation Forms a  $\beta$ -Keto Ester 500
- 13.9  $\text{CO}_2$  Can Be Removed from a Carboxylic Acid with a Carbonyl Group at the 3-Position 503
- 13.10 Reactions at the  $\alpha$ -Carbon in Cells 504
- 13.11 Organizing What We Know about the Reactions of Organic Compounds 508  
 SOME IMPORTANT THINGS TO REMEMBER 508    ◻    SUMMARY OF REACTIONS 509  
 ◻    PROBLEMS 510

## 14 Radicals 513

- 14.1 Alkanes are Unreactive Compounds 513  
**NATURAL GAS AND PETROLEUM 514**  
**FOSSIL FUELS: A PROBLEMATIC ENERGY SOURCE 514**
- 14.2 The Chlorination and Bromination of Alkanes 515  
**WHY RADICALS NO LONGER HAVE TO BE CALLED FREE RADICALS 516**
- 14.3 Radical Stability Depends on the Number of Alkyl Groups Attached to the Carbon with the Unpaired Electron 516

- 14.4 The Distribution of Products Depends on Radical Stability 517  
**PROBLEM-SOLVING STRATEGY** 518
- 14.5 The Stereochemistry of Radical Substitution Reactions 519
- 14.6 Formation of Explosive Peroxides 520
- 14.7 Radical Reactions Occur in Biological Systems 521  
**DECAFFEINATED COFFEE AND THE CANCER SCARE** 522  
**FOOD PRESERVATIVES** 523  
**IS CHOCOLATE A HEALTH FOOD?** 523
- 14.8 Radicals and Stratospheric Ozone 524  
**ARTIFICIAL BLOOD** 525
- SOME IMPORTANT THINGS TO REMEMBER 525 ■ SUMMARY OF REACTIONS 525  
 ■ PROBLEMS 526

## 15 Synthetic Polymers 527

- 15.1 There Are Two Major Classes of Synthetic Polymers 528
- 15.2 Chain-Growth Polymers 529  
**TEFLON: AN ACCIDENTAL DISCOVERY** 532  
**RECYCLING SYMBOLS** 533
- 15.3 Stereochemistry of Polymerization • Ziegler–Natta Catalysts 538
- 15.4 Organic Compounds That Conduct Electricity 539
- 15.5 Polymerization of Dienes • Natural and Synthetic Rubber 540
- 15.6 Copolymers 542  
**NANOCONTAINERS** 542
- 15.7 Step-Growth Polymers 543
- 15.8 Classes of Step-Growth Polymers 543  
**HEALTH CONCERNS: BISPHENOL A AND PHTHALATES** 547  
**DESIGNING A POLYMER** 547
- 15.9 Recycling Polymers 549
- 15.10 Biodegradable Polymers 549
- SOME IMPORTANT THINGS TO REMEMBER 550 ■ PROBLEMS 551

## 16 The Organic Chemistry of Carbohydrates 553

- 16.1 Classification of Carbohydrates 554
- 16.2 The *D* and *L* Notations 555
- 16.3 The Configurations of Aldoses 556
- 16.4 The Configurations of Ketoses 557
- 16.5 The Reactions of Monosaccharides in Basic Solutions 558  
**MEASURING THE BLOOD GLUCOSE LEVELS IN DIABETES** 559
- 16.6 Monosaccharides Form Cyclic Hemiacetals 560  
**VITAMIN C** 562
- 16.7 Glucose Is the Most Stable Aldohexose 563
- 16.8 Formation of Glycosides 564
- 16.9 Disaccharides 566  
**LACTOSE INTOLERANCE** 567
- 16.10 Polysaccharides 568  
**WHY THE DENTIST IS RIGHT** 569  
**HEPARIN—A NATURAL ANTICOAGULANT** 569  
**CONTROLLING FLEAS** 571
- 16.11 Carbohydrates on Cell Surfaces 571
- 16.12 Artificial Sweeteners 572  
**ACCEPTABLE DAILY INTAKE** 574
- SOME IMPORTANT THINGS TO REMEMBER 574 ■ SUMMARY OF REACTIONS 575  
 ■ PROBLEMS 575

## 17 The Organic Chemistry of Amino Acids, Peptides, and Proteins 577

- 17.1 The Nomenclature of Amino Acids 578  
**PROTEINS AND NUTRITION 581**
- 17.2 The Configuration of Amino Acids 582  
**AMINO ACIDS AND DISEASE 582**
- 17.3 The Acid–Base Properties of Amino Acids 583
- 17.4 The Isoelectric Point 584
- 17.5 Separating Amino Acids 585  
**WATER SOFTENERS: EXAMPLES OF CATION-EXCHANGE CHROMATOGRAPHY 588**
- 17.6 The Synthesis of Amino Acids 589
- 17.7 The Resolution of Racemic Mixtures of Amino Acids 590
- 17.8 Peptide Bonds and Disulfide Bonds 591  
**RUNNER'S HIGH 592**  
**DIABETES 594**  
**HAIR: STRAIGHT OR CURLY? 594**
- 17.9 An Introduction to Protein Structure 595  
**PRIMARY STRUCTURE AND TAXONOMIC RELATIONSHIP 595**
- 17.10 How to Determine the Primary Structure of a Polypeptide or a Protein 595  
**PROBLEM-SOLVING STRATEGY 597**
- 17.11 Secondary Structure 600
- 17.12 Tertiary Structure 602  
**DISEASES CAUSED BY A MISFOLDED PROTEIN 603**
- 17.13 Quaternary Structure 604
- 17.14 Protein Denaturation 605  
**SOME IMPORTANT THINGS TO REMEMBER 605 ■ PROBLEMS 606**

## 18 How Enzymes Catalyze Reactions • The Organic Chemistry of the Vitamins AVAILABLE ON-LINE

- 18.1 Enzyme-Catalyzed Reactions 1
- 18.2 An Enzyme-Catalyzed Reaction That Involves Two Sequential  $S_N2$  Reactions 4  
**HOW TAMIFLU WORKS 5**
- 18.3 An Enzyme-Catalyzed Reaction That Is Reminiscent of Acid-Catalyzed Amide and Ester Hydrolysis 8
- 18.4 An Enzyme-Catalyzed Reaction That Is Reminiscent of the Base-Catalyzed Enediol Rearrangement 10
- 18.5 An Enzyme-Catalyzed Reaction That Is Reminiscent of a Retro-Aldol Addition 12
- 18.6 Vitamins and Coenzymes 13  
**VITAMIN B<sub>1</sub> 15**
- 18.7 Niacin: The Vitamin Needed for Many Redox Reactions 15  
**NIACIN DEFICIENCY 16**
- 18.8 Riboflavin: Another Vitamin Used in Redox Reactions 20
- 18.9 Vitamin B<sub>12</sub>: The Vitamin Needed for Acyl Group Transfer 23  
**CURING A HANGOVER WITH VITAMIN B<sub>12</sub> 26**
- 18.10 Vitamin H: The Vitamin Needed for Carboxylation of an  $\alpha$ -Carbon 28  
**PROBLEM-SOLVING STRATEGY 30**
- 18.11 Vitamin B<sub>6</sub>: The Vitamin Needed for Amino Acid Transformations 30  
**ASSESSING THE DAMAGE AFTER A HEART ATTACK 34**
- 18.12 Vitamin B<sub>12</sub>: The Vitamin Needed for Certain Isomerizations 35
- 18.13 Folic Acid: The Vitamin Needed for One-Carbon Transfer 37  
**THE FIRST ANTIBIOTICS 38**  
**COMPETITIVE INHIBITORS 41**  
**CANCER DRUGS AND SIDE EFFECTS 41**

- 18.14** Vitamin K: The Vitamin Needed for Carboxylation of Glutamate 41  
**ANTICOAGULANTS** 42  
**TOO MUCH BROCCOLI** 43  
 SOME IMPORTANT THINGS TO REMEMBER 43 ■ PROBLEMS 44

## 19 The Organic Chemistry of the Metabolic Pathways 609

- DIFFERENCES IN METABOLISM** 610  
 19.1 ATP Is Used for Phosphoryl Transfer Reactions 610  
**WHY DID NATURE CHOOSE PHOSPHATES?** 611  
 19.2 The “High-Energy” Character of Phosphoanhydride Bonds 611  
 19.3 The Four Stages of Catabolism 612  
 19.4 The Catabolism of Fats 613  
 19.5 The Catabolism of Carbohydrates 616  
**PROBLEM-SOLVING STRATEGY** 620  
 19.6 The Fate of Pyruvate 620  
 19.7 The Catabolism of Proteins 621  
**PHENYLKETONURIA (PKU): AN INBORN ERROR OF METABOLISM** 623  
 19.8 The Citric Acid Cycle 623  
 19.9 Oxidative Phosphorylation 626  
**BASAL METABOLIC RATE** 627  
 19.10 Anabolism 627  
 19.11 Gluconeogenesis 628  
 19.12 Regulating Metabolic Pathways 629  
 19.13 Amino Acid Biosynthesis 630  
 SOME IMPORTANT THINGS TO REMEMBER 631 ■ PROBLEMS 632

## 20 The Organic Chemistry of Lipids 634

- 20.1 Fatty Acids Are Long-Chain Carboxylic Acids 635  
**OMEGA FATTY ACIDS** 636  
**WAXES ARE ESTERS THAT HAVE HIGH MOLECULAR WEIGHTS** 636  
 20.2 Fats and Oils Are Triglycerides 637  
**WHALES AND ECHOLOLOCATION** 638  
 20.3 Soaps and Detergents 638  
 20.4 Phosphoglycerides and Sphingolipids 640  
**SNAKE VENOM** 641  
**MULTIPLE SCLEROSIS AND THE MYELIN SHEATH** 642  
 20.5 Prostaglandins Regulate Physiological Responses 642  
 20.6 Terpenes Contain Carbon Atoms in Multiples of Five 642  
 20.7 How Terpenes are Biosynthesized 644  
**PROBLEM-SOLVING STRATEGY** 645  
 20.8 How Nature Synthesizes Cholesterol 646  
 20.9 Synthetic Steroids 647  
 SOME IMPORTANT THINGS TO REMEMBER 648 ■ PROBLEMS 648

## 21 The Chemistry of the Nucleic Acids 650

- 21.1 Nucleosides and Nucleotides 650  
**THE STRUCTURE OF DNA: WATSON, CRICK, FRANKLIN, AND WILKINS** 653  
 21.2 Nucleic Acids Are Composed of Nucleotide Subunits 653  
 21.3 The Secondary Structure of DNA—The Double Helix 654  
 21.4 Why DNA Does Not Have a 2'-OH Group 656

21.7	The Biosynthesis of DNA Is Called Replication	657
21.8	DNA and Heredity	658
	<b>NATURAL PRODUCTS THAT MODIFY DNA</b>	<b>658</b>
21.9	The Biosynthesis of RNA Is Called Transcription	659
21.9	The RNAs Used for Protein Biosynthesis	660
21.9	The Biosynthesis of Proteins Is Called Translation	662
	<b>SICKLE CELL ANEMIA</b>	<b>664</b>
	<b>ANTIBIOTICS THAT ACT BY INHIBITING TRANSLATION</b>	<b>664</b>
21.10	Why DNA Contains Thymine Instead of Uracil	665
	<b>ANTIBIOTICS ACT BY A COMMON MECHANISM</b>	<b>666</b>
21.11	Antiviral Drugs	666
	<b>INFLUENZA PANDEMICS</b>	<b>667</b>
21.12	How the Base Sequence of DNA Is Determined	667
21.12	Genetic Engineering	669
	<b>RESISTING HERBICIDES</b>	<b>669</b>
	<b>USING GENETIC ENGINEERING TO TREAT THE EBOLA VIRUS</b>	<b>670</b>
	<b>SOME IMPORTANT THINGS TO REMEMBER</b>	<b>670</b>
	<b>PROBLEMS</b>	<b>671</b>
