

# Contents

<b>Preface</b>	xiii
<b>Note on Recommended Readings</b>	xv
<b>1</b>	
<b>Introduction</b>	1
1.1 The Pure Theory of Trade	1
1.2 Distinguishing Features of International Trade Theory	1
1.3 Positive and Normative Aspects	3
1.4 Organization of the Volume	3
1.5 Standardized Notation	4
<b>I</b>	
<b>The Pattern of Trade</b>	
<b>2</b>	
<b>Model and Analytic Relationships in Ricardian Theory</b>	9
2.1 The Ricardian Model	9
2.2 Supply Relations	10
2.3 Self-Sufficiency Equilibrium	14
2.4 Trade Equilibrium and Offer Curves	16
2.5 Trade-Indifference Curves	21
2.6 Formal Notes on the Ricardian Model	26
<b>3</b>	
<b>Ricardian Theory and the Pattern of Trade</b>	30
3.1 Multiple Zero-Trade Equilibria	33

3.2 Alternative Demand Assumptions	34
3.3 Weaker Formulation of Ricardian Theorem	35

## **4**

<b>Some Extensions of Ricardian Theory</b>	36
4.1 Multiple Countries	36
4.2 Multiple Goods	42
4.3 Transportation Costs	44
4.4 Tariffs	45
4.5 Nontraded Goods	47

## **5**

<b>Model and Analytic Relationships under the Heckscher-Ohlin Theory</b>	50
5.1 Heckscher-Ohlin Model	50
5.2 Supply Relations	51
5.3 Competitive System	56
5.4 Depiction of Free-Trade Equilibrium	67

## **6**

<b>The Pattern of Trade and the Heckscher-Ohlin Theory</b>	74
6.1 Heckscher-Ohlin Theorem with Physical Definition of Factor Abundance	74
6.2 Heckscher-Ohlin Theorem with Price Definition of Factor Abundance	79

## **7**

<b>Extensions of the Heckscher-Ohlin Theory</b>	82
7.1 Many-Good and Many-Factor Extensions	82
7.2 Factor-Content Proposition	85
7.3 Growth-Theoretic Extension	86

## **8**

<b>Alternative Models and Theories</b>	88
8.1 Sector Specificity of Factors of Production	89
8.2 Imperfect Competition and Trade	95
8.3 Alternative Approach to Explaining Trade in Similar Products	100

## **II**

### **Tariffs, Quotas, and Transfers**

## **9**

<b>Tariffs and Trade Equilibrium</b>	105
9.1 Free-Trade Version of the Classical Model	105
9.2 Effect of a Tariff on External and Domestic Terms of Trade	106
9.3 Geometry of Tariffs	108
9.4 The Metzler Paradox	115
9.5 Some Extensions	116

## **10**

<b>Tariffs versus Quotas</b>	119
10.1 The Equivalence Argument	119
10.2 Breakdown of Equivalence	120
10.3 An Alternative Question	122
10.4 Other Commercial Policy Instruments	124

## **11**

<b>Effective Rate of Protection</b>	126
11.1 Two Definitions	127
11.2 Predictive Power of ERP Indices	129

## **12**

<b>The Transfer Problem</b>	134
12.1 Direct Solution	134
12.2 Two-Stage Derivation	136
12.3 Welfare Impact	137
12.4 Immiserizing Transfers	138
12.5 Transfer Criteria in Other Models	139

## **III**

### **Trade and Welfare in an Open Economy**

## **13**

<b>Principal Issues and Policy Instruments</b>	145
13.1 Major Concepts and Distinctions	145

13.2 Alternative Policy Instruments and Hierarchy of Policies	146
---	-----

## **14**

<b>Gains from Trade</b>	152
14.1 Basic Theorem without Prices	152
14.2 Basic Theorem with Prices	155
14.3 Optimality of Free-Trade Policy for a Small Country	158
14.4 Optimality of Free Trade from World Viewpoint	160
14.5 Superiority of Trade over Autarky, without Lump-Sum Transfers	161
14.6 Illustrating the Dixit-Norman Argument	163

## **15**

<b>Measuring Gains from Trade</b>	167
15.1 Gains from Free Trade	167
15.2 Decomposing Gains from Trade	168
15.3 Factor Immobility	169
15.4 Other Considerations	169

## **16**

<b>Distortions: Departures from Free-Trade Optimality</b>	171
---	-----

## **17**

<b>Monopoly Power in Trade</b>	174
17.1 Optimal Policy Intervention	174
17.2 Tariff Level	175
17.3 Can the Optimal Tariff Be Negative?	178
17.4 Optimal Tariff Structure with Several Traded Goods	178
17.5 Retaliation or Extortion	179
17.6 Ranking Alternative Policies	182

## **18**

<b>Production Externalities</b>	185
---------------------------------	-----

## **19**

<b>Monopoly in Production</b>	192
19.1 Nontangency	192

19.2 Welfare Analysis	192
19.3 Gains from Trade	193

## 20

<b>Monopsony</b>	195
20.1 Positive Analysis of Monopsony Distortion	195
20.2 Welfare Implications	202

## 21

<b>Wage Differentials</b>	204
21.1 The Nature of the Distortion	204
21.2 Analysis	205

## 22

<b>Generalized Sticky Wages</b>	212
22.1 One-Good Model with Sticky Wage	212
22.2 Two-Good Model with Factor Immobility	212
22.3 Generalized Sticky Wage with Full Factor Mobility in $2 \times 2$ Model	213

## 23

<b>Sector-Specific Sticky Wages</b>	222
23.1 Harris-Todaro Model	222
23.2 Policy Implications	224
23.3 Other Extensions	226

## 24

<b>Noneconomic Objectives</b>	230
24.1 Different Objectives	231
24.2 Formal Mathematics of the Problem	238
24.3 Turning Noneconomic Objectives into Economic Objectives	242

## 25

<b>Immiserizing Growth</b>	245
25.1 The Original Case	245
25.2 Immiserizing Growth for a Small Country with a Tariff	246
25.3 Generalized Theory	247

25.4 Two Caveats	249
25.5 Diverse Applications of Immiserizing-Growth Theory	249
25.6 Algebra of the Bhagwati and the Johnson Cases	251

## 26

<b>Increasing Returns</b>	257
26.1 Panagariya Model	257
26.2 Kemp Model	261

## 27

<b>Uniform versus Preferential Tariff Reduction</b>	267
27.1 Uniform Reduction	267
27.2 Preferential Reduction	274

## 28

<b>International Capital Flows</b>	287
28.1 Goods-Price Equalization: Turning Factor-Price Equalization on its Head	287
28.2 Diversification with Different Technologies	288
28.3 Welfare Analysis: Inflows without Optimal Policy Intervention	290
28.4 Welfare Analysis: Optimal and Second-Best Interventions	294
28.5 Other Welfare-Theoretic Questions	296

## 29

<b>International Migration</b>	300
29.1 Asymmetries	300
29.2 Choice between International Labor and Capital Mobility	303
29.3 Response to Import Competition	304

## IV

### Recent Theoretical Developments

## 30

<b>Directly Unproductive Profit-Seeking (DUP) Activities</b>	309
20.1 Tariff Evasion	311
30.2 Revenue Seeking	315

30.3 Tariff Seeking	319
30.4 General Theory of DUP Activities	320
30.5 Price versus Quantity Distortions	326

## 31

<b>Growth and Welfare</b>	330
31.1 Distortionary Situations	330
31.2 Optimal Policies Everywhere: Absence of Deadweight Loss under Free Trade	332
31.3 Steady States, Trade, and Welfare	333

## 32

<b>Shadow Prices for Project Selection in Open Economies</b>	340
32.1 “World-Price”-Valuation Rule	340
32.2 Derivation of World-Price-Valuation Shadow Prices with Given Distortion	342
32.3 Negative Shadow Prices	344

## 33

<b>Twoness and Duality</b>	349
----------------------------	-----

## 34

<b>Uncertainty</b>	357
34.1 Ricardian Model for Complete Set of Markets	359
34.2 Ricardian Model for Securities and Spot Markets	361
34.3 Ricardian Model for Equivalence of World Market with Securities Market and with Complete Set of Markets	363
34.4 Models with an Incomplete Set of Markets	364

### Appendixes

A Alternative Elasticity Formulas	375
B Basic Results of the $2 \times 2$ Neoclassical Model of Trade Theory	378
C The Classical Comparative-Statics Model and Analytical Relationships	391
<b>Index</b>	409
