

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Background and Motivation . . . . .	1
1.2	Methods of Computational Intelligence . . . . .	2
1.2.1	Fuzzy Systems . . . . .	2
1.2.2	Neural Networks . . . . .	4
1.2.3	Evolutionary Algorithms . . . . .	5
1.3	Thesis Objective . . . . .	7
1.4	Thesis Organization . . . . .	8
<b>2</b>	<b>Advanced Methods of Fusion</b>	<b>10</b>
2.1	Methods of Fusion . . . . .	10
2.2	Fuzzy Neural Networks – An Overview . . . . .	13
2.2.1	Fuzzy Systems as Feed Forward Neural Networks . . . . .	14
2.2.2	Input Space Partition in Generating Fuzzy Systems . . . . .	19
2.2.3	Neural Networks Equivalent to TSK Fuzzy Systems . . . . .	21
2.2.4	Neural Networks Equivalent to FuNe I Fuzzy Systems . . . . .	23
2.2.5	Neural Networks Equivalent to Mamdani Type Fuzzy Controllers . . . . .	24
2.2.6	Neural Networks Equivalent to Classifier Type Fuzzy Systems . . . . .	25
2.2.7	Adaptive Fuzzy Systems Based on Reinforcement Learning . . . . .	27
2.3	Fusion Techniques Based on Evolutionary Algorithms . . . . .	28
2.3.1	Construction of Optimal Neural Network Architectures . . . . .	29
2.3.2	Genetic Design of a Fuzzy Controller . . . . .	29
<b>3</b>	<b>Application and Test with Combined Systems</b>	<b>31</b>
3.1	Benchmarks . . . . .	31
3.1.1	Artificially Generated Data . . . . .	31
3.1.2	Iris Species . . . . .	32
3.2	Industrial Quality Control . . . . .	34
3.2.1	Solder Joint Recognition . . . . .	34
3.2.2	Sonar Data Identification . . . . .	35
3.3	The Mechatronic Systems . . . . .	36
3.3.1	Intelligent Tyres . . . . .	37

3.3.2	Reverse Driving of a Truck with a Long Trailer . . . . .	37
3.3.3	Autonomous Driving of Mobile Robot with Collision Avoidance . . . . .	41
3.4	Handwritten Numerical Character Recognition . . . . .	45
<b>4</b>	<b>Fuzzy Systems with Gradient Descent Learning</b>	<b>47</b>
4.1	Methods of Fuzzy Rule extraction . . . . .	47
4.1.1	FuNe I Fuzzy Model . . . . .	47
4.1.2	Method Proposed for Complex Applications . . . . .	48
4.1.3	Identification of Rule Relevant Nodes . . . . .	49
4.2	Towards an Optimized Solution . . . . .	51
4.2.1	Parameter Tuning . . . . .	51
4.2.2	Rule Optimization . . . . .	52
4.2.3	Posterior Input Feature Reduction . . . . .	52
4.2.4	Knowledge Integration . . . . .	52
4.3	Summary of Applications of FuNe I . . . . .	52
4.3.1	<i>Iris</i> Species Classifier . . . . .	53
4.3.2	State Identification . . . . .	54
4.3.3	Image Classification . . . . .	55
4.4	Real Time Solutions for FuNe I system . . . . .	58
4.5	Conclusion . . . . .	58
<b>5</b>	<b>Radial Basis Function Network–Fuzzy Systems</b>	<b>59</b>
5.1	RBFN with RCE Learning . . . . .	59
5.2	CBFN with MRCE Learning . . . . .	62
5.3	Training RBF and CBF Networks . . . . .	64
5.4	Fuzzy Rule Based Classification . . . . .	65
5.4.1	Removal of Superfluous Inputs . . . . .	66
5.4.2	Methods for the Segmentation of Input Space . . . . .	67
5.4.3	Antecedent Membership Functions . . . . .	68
5.4.4	Fuzzy Rule Generation . . . . .	70
5.5	Simulation Results . . . . .	71
5.6	Conclusion . . . . .	74
<b>6</b>	<b>Fuzzy interpretable Neural Clustering</b>	<b>75</b>
6.1	Nearest Prototype Clustering . . . . .	75
6.2	Fuzzy Interpretation of nearest prototype clustering . . . . .	76
6.3	Dynamically Growing Nearest Prototypes . . . . .	78
6.3.1	The Geometrical Method – DVQ2 . . . . .	79
6.3.2	Sub-Bayesian Approximation – DVQ3 . . . . .	79
6.4	Applicability of the Method . . . . .	81
6.4.1	Simulation results . . . . .	81
6.4.2	Possible Improvements . . . . .	83

<b>7 Rule Based Classifiers with Genetic Algorithms</b>	<b>84</b>
7.1 Rule Based Classification . . . . .	84
7.2 A Heuristic Method . . . . .	84
7.3 Genetic Algorithm Based Method . . . . .	87
7.3.1 Encoding . . . . .	87
7.3.2 Genetic Operators . . . . .	87
7.3.3 Fitness Evaluation . . . . .	88
7.4 Results . . . . .	89
7.4.1 Heuristic Method . . . . .	89
7.4.2 Genetic Algorithm Based Solutions . . . . .	90
7.5 Further Improvements . . . . .	95
7.5.1 Improving the Heuristic Method . . . . .	95
<b>8 CBADD—Universal Defuzzification Approximator</b>	<b>100</b>
8.1 Conventional Methods . . . . .	100
8.2 Problems Incurred with Existing Methods . . . . .	101
8.3 A Customizable Universal Defuzzification Approximator . . . . .	104
8.3.1 Gradient Descent Learning with Alternative Neuron Models . . . . .	105
8.3.2 Implementation as a Transparent Neural Network . . . . .	108
8.4 Validation . . . . .	110
8.4.1 Validation with <i>COG</i> . . . . .	110
8.4.2 Validation with <i>MOM</i> . . . . .	112
8.5 Application . . . . .	113
8.5.1 Approximation of <i>MOA</i> . . . . .	113
8.5.2 Approximation of <i>COM</i> . . . . .	113
8.5.3 Application in Truck and Trailer . . . . .	113
8.6 Integration in a Fuzzy Neural Controller . . . . .	114
8.7 Conclusion . . . . .	116
<b>9 Fuzzy Controlled Neural Networks</b>	<b>119</b>
9.1 Speed Influencing Parameters in Backpropagation . . . . .	119
9.2 Parameter Adaptation in Standard Backpropagation . . . . .	120
9.3 Modified Gradient Descent Algorithms . . . . .	123
9.3.1 Fuzzy Controlled Quickpropagation . . . . .	123
9.3.2 Algorithm of Individual Learning Rates . . . . .	124
9.3.3 Quickpropagation with Individual Learning Rates . . . . .	125
9.4 Simulation Results . . . . .	125
9.4.1 Fuzzy Controlled Backpropagation Methods . . . . .	126
9.4.2 Modified Gradient Descent Algorithms . . . . .	128
9.5 Conclusion . . . . .	131
<b>10 Hardware Implementations</b>	<b>132</b>

10.1	Rapid Prototyping of Fuzzy Systems . . . . .	132
10.1.1	Fuzzification Unit . . . . .	134
10.1.2	Rule Inference . . . . .	135
10.1.3	Defuzzification . . . . .	135
10.1.4	Application Example . . . . .	137
10.1.5	Implementation of Automatically Generated Fuzzy Systems . . . . .	137
10.2	Realtime Fuzzy Interpretable Classifiers . . . . .	138
10.2.1	Computationally Feasible Distance Measures . . . . .	139
10.2.2	Fixed Point Calculation . . . . .	140
10.2.3	FPGA Architecture for Parallel Processing . . . . .	140
10.2.4	SIMD Array with FPGAs . . . . .	144
10.3	Conclusion . . . . .	147
<b>11</b>	<b>Conclusion</b>	<b>148</b>
11.1	Different methods for different problems . . . . .	149
11.2	Methods of Hardware Implementation . . . . .	150
<b>A</b>	<b>FuNeGen Software</b>	<b>152</b>
A.1	Introduction . . . . .	152
A.2	Software Tool FuNeGen 1.0 . . . . .	152
A.3	Extended Version FuNe Deluxe . . . . .	153
