Part One Development and regulatory issues for food colourings 1

1 Food colour additives of natural origin 3

K. Solymosi, N. Latruffe, A. Morant-Manceau, B. Schoefs

1.1 Introduction	3
1.2 Food colourants of natural origin	5
1.3 Future trends and conclusions	22
References	24

2 Food colour additives of synthetic origin 35

J. König

2.1 Introduction	35
2.2 Properties of synthetic food colours (including lakes and pigments)	37
2.3 Other synthetic food dyes (Quinoline Yellow, Erythrosine, Patent Blue V, Brilliant Blue FCF, Green S, beta-apo-8'-carotenal)	49
2.4 Toxicological assessment (allergic reactions, effects on behaviour)	55
2.5 Conclusion	56
References	56

3 Overview of EU regulations and safety assessment for food colours 61

M.J. Scotter

3.1 Introduction	61
3.2 EU food colour specifications	66
3.3 Safety evaluation of food colour additives in the EU	67
3.4 Labelling of food colour additives in the EU	71
3.5 Global trade considerations	72
3.6 Further reading	72
References	73

4 US regulation of color additives in foods 75

B.P. Harp, J.N. Barrows

4.1 Introduction	75
------------------	----

4.2	Color additives exempt from certification	76
4.3	Color additives subject to certification	79
4.4	Color additive lakes	81
4.5	Color additive mixtures	82
4.6	Petition process	82
4.7	Color additive certification	83
4.8	Color additive research	84
4.9	Labeling requirements for foods containing color additives	84
4.10	Adulteration and misbranding provisions for color additives in foods	85
4.11	Enforcement of the color additive requirements	86
4.12	Additional requirements for color additives	86
4.13	Summary	87
	References	87
Part Two Properties and analysis of food colours		89
5	An industry perspective on natural food colour stability	91
	<i>N. Galaffu, K. Bortlik, M. Michel</i>	
5.1	The importance of colours for food products	91
5.2	Red colours	100
5.3	Green and blue colours	113
5.4	Blue colour	116
5.5	Yellow–orange colour	119
5.6	Rapid stability assessment of natural colours	123
5.7	Conclusions	124
	References	124
6	Methods of analysis for food colour additive quality and safety assessment	131
	<i>M.J. Scotter</i>	
6.1	Quality and safety assessment	131
6.2	Methods for synthetic colours	136
6.3	Methods for natural colours	145
6.4	Carotenoids	156
6.5	Future outlook	174
6.6	Further reading	175
	References	176
7	Visual contributions to taste and flavour perception	189
	<i>C. Spence</i>	
7.1	Introduction	189
7.2	On the colour of food and drink	191
7.3	Individual differences	196

7.4	On the colour of food and beverage packaging	196
7.5	On the colour of the glassware/cup	197
7.6	On the colour of the plateware	199
7.7	On the colour of the cutlery	201
7.8	On the colour of the environment	201
7.9	Ecological validity and the response to disconfirmed expectation	202
7.10	Conclusions	203
	References	205
8	Food colours for bakery products, snack foods, dry soup mixes, and seasonings	211
	<i>I.N. Pasiak, A.G. Asimakopoulos, N.S. Thomaidis</i>	
8.1	Introduction	211
8.2	Applications of natural colourants	212
8.3	Applications of synthetic colourants	218
8.4	Applications of natural and synthetic colourants – future trends	220
8.5	Further reading	223
	References	223
