## **PART I: AN OVERVIEW OF POPULATION SCIENCE**

<b>CHAPTER 1</b> The Nature of Populations	5
The Focus on Aggregates	5
Population and Other Aggregates	5
Naturally Occurring Populations: Human and Nonhuman	6
The Principles of Demographic Analysis	9
Aggregates and Individuals	11
Ecological Fallacy	11
Structural Effects: An Introduction	11
Durkheim's Study of Suicide	12
Demographic Determinism and "Laws" of Population	13
The History of Demography: An Overview	15
Contemporary Sources of Demographic Information	19
Census and Registration Data	19
Samples and Complete Enumerations	21
Summary	24
Key Terms	25
Notes	25
<b>CHAPTER 2</b> Demographic Variables: Size, Structure, and Vital Events	27
Population Size	27
Variations in Population Size	29
Population Size and Other Variables	31
Measuring Structural Characteristics	34

Rates of Vital Events	38
Summary	41
Key Terms	41
Notes	42
<b>CHAPTER 3 How Populations Are Structured</b>	<b>43</b>
Biological Structure: Age and Sex	43
Sex Structure: Some Comparisons	43
Age Structure and Population Pyramids	45
Proportional and Average Ages	46
Sociocultural Structure: Subpopulations and Strata	50
The Constituents of Population: Marriage and Family, Ethnicity and Race	50
Ethnicity	53
Ethnic Structure and Change in the United States	56
A Comparative Perspective	58
Ethnic Stratification	63
Class and Income Differentials	64
Occupation	65
Wealth and Income	67
Summary	72
Key Terms	73
Notes	73
<b>CHAPTER 4 Geographic Distribution: Population and Territory</b>	<b>75</b>
How Territory Is Divided: Administrative and Statistical Areas	75
Population Density: Concepts and Consequences	80
Measuring Density	81
Density and Behavior	85
The Urbanization of the Human Population	88
A Historical Overview of Urban Growth	89
Geographic Information Systems	97
Summary	98
Key Terms	99
Notes	99
<b>PART II: POPULATION DYNAMICS: VITAL EVENTS AND GROWTH</b>	
<b>CHAPTER 5 Birth and Fertility: Measures, Theories, and Trends</b>	<b>103</b>
Measuring Fertility	104
Common Period Measures	105

Crude Birth Rate (CBR)	105
Age-Specific Fertility Rates (ASFR)	107
Total Fertility Rate	108
Other Period Measures	111
Cohort Measures	113
Theories of Fertility	114
The Theory of Multiphasic Demographic Response	115
The Theory of Intermediate Variables	116
Economic, Structural, and Cultural Theories	117
Diffusion Theories	119
World Fertility: Levels and Trends	119
Fertility Decline in Asia	120
Delayed Transition in Africa	122
Latin America: Low Fertility, High Variability	122
Toward Negative Growth in the Industrialized Nations	122
Fertility in the United States	123
Postwar Trends and the Baby Boom	124
Contemporary Fertility Differentials	126
Summary	128
Key Terms	129
Notes	129
<b>CHAPTER 6 Mortality: Causes and Consequences</b>	<b>131</b>
Measuring Morbidity and Mortality	132
Morbidity Rates	133
Crude Death Rates	134
Specific Death Rates	136
Age-Specific Rates	138
Analyzing Infant Mortality	142
Cause-Specific Rates	144
Social and Environmental Factors	145
Mortality in the United States	147
The Effects of Inequality	148
Cause-Specific Death in the United States	148
Age Group	149
Suicide	149
Mortality Decline: An Overview	150
Global Mortality Patterns: Past and Present	157
Epidemiological Transition in Europe and America	157
Transition in Less-Industrialized Countries	159

Summary	160
Key Terms	161
Notes	161
<b>CHAPTER 7 Migration: Geographic and Social Psychological Components</b>	<b>163</b>
Measuring Migration	164
Some Operational Definitions	165
In-Migration	165
Out-Migration	165
Net Migration	165
Gross Migration	165
Internal Population Shifts in the United States	167
The Great Migration	168
A Reversal of Trends in the Late Twentieth Century	169
Theories of Internal Migration	171
Ravenstein’s “Laws”	171
The Economic Opportunity Model	172
Lee’s Theory of Push-and-Pull Factors	172
Social Network Theory	173
Todaro’s Migration Model	174
The Value Expectancy Model	174
International Migration	175
A Nation of Immigrants	175
Refugees: The Issue of Forced International Migration	177
Explaining Forced Migration	179
Summary	180
Key Terms	180
Notes	181
<b>CHAPTER 8 Population Dynamics in Historical and Comparative Perspective</b>	<b>183</b>
Measures and Models of Growth	184
Measuring Growth by Difference	184
Growth by Components	187
Demographic Transition and Social Change	188
Early World Population Growth	188
The Four-Stage Process	189
Demographic Transition in Less-Industrialized Countries	192

The Prospects of Future Population Growth	195
The Redistribution of the World's Population	196
The Third Stage in the Less-Industrialized Regions?	199
Europe's Second Transition	201
The Aging of the World's Population	203
The U.S. Population: Growth and Change	205
Summary	209
Key Terms	210
Notes	210

### **PART III: POPULATION MODELS**

<b>CHAPTER 9</b> The Life Table: An Introduction	213
Measuring Mortality	214
Definitions and Illustrations	214
Observed Data	215
The Life-Table Proper	217
Data Sources and Functions	218
Age: $x$	220
The Observed Cohort Sizes, Deaths, and Probabilities of Dying: ${}_nK_x$ , ${}_nD_x$ , and ${}_nq_x$	221
The Surviving Population: ${}_nl_x$	221
Deaths in the Life Table: ${}_nd_x$	223
The Person Years Lived by the Life Table Population: ${}_nL_x$	224
Total Person Years Remaining: ${}_nT_x$	227
Average Life Expectancy: $\hat{e}_x$	227
Abridged and Unabridged Tables	228
Survival Rates	232
Reverse Survival	234
Applications	234
Cohort Tables and the Lexis Diagram	235
The Cohort or Generation Table	236
The Lexis Diagram	238
Life Table Applications	239
Life Insurance and Related Uses	239
The Class of '61	240
Summary	242
Key Terms	243
Notes	243

<b>CHAPTER 10</b>	<b>Population Estimates, Projections, and Forecasts</b>	<b>245</b>
	Approaches to Anticipating Population Characteristics	246
	Population Estimation	249
	Simple Growth Models	249
	Components Methods	256
	Methods of Projection	260
	Extrapolation from Simple Growth Models	260
	Projecting with the Components Method	264
	Matrix-Based Approaches to Population Projection	267
	Forecasts and Forecasting	268
	Summary	270
	Key Terms	270
	Notes	271

## **PART IV: DEMOGRAPHY IN APPLICATION**

<b>CHAPTER 11</b>	<b>Population Policy: Controlling Demographic Processes</b>	<b>275</b>
	The Nature of Population Policy: Definition and Case Studies	275
	Why Are Population Policies Necessary?	278
	Children, Families, and Communities	279
	The Legal Dimension: Policy Implementation and Fertility Determinants	282
	Immigration Policy	288
	How Population Policies Are Made	290
	Stages of the Policy Process	290
	Creating a Population Policy: The Case of Zambia	291
	International Organizations and Population Policy	294
	Evaluating Population Policies	295
	The Role of Values in Population Policy	298
	Summary	302
	Key Terms	303
	Notes	303
<b>CHAPTER 12</b>	<b>Population and Environment</b>	<b>305</b>
	The Tea-Seller's Dilemma	305
	The Household of Nature: The Plight of Natural Resources	306
	Fresh Water	308
	Depletion of Forests	310
	Energy	312

Theories of Population and Environment	314
Direct Effect Theories	314
Indirect Effect Theories	316
Measuring Environmental Conditions and Impacts	318
The Geophysical Environment	318
Individual-Level Measures	319
Environmental Policies and Politics	320
The Political Context	320
Programs and Strategies: The Rise of Environmentalism	327
Embracing the Lessons of Chipko	329
Sustainable Development	330
Summary	332
Key Terms	332
Notes	332
<b>CHAPTER 13</b> Accessing and Using Information about Population Science	335
Demography-Oriented Software	336
Data Sets, Educational Packages, and Applications	336
GIS Resources	338
Demographic Research, Application, and the Internet	339
The Internet: Roots and Branches	340
Demographic Research-Oriented Sites	340
Guides and Master Sites	340
General Interest Sites	341
Additional Data Sources (Related to Chapters 1–4 of this Text)	342
Migration and Refugee Information (Related to Our Chapter 7)	342
Population Estimation and Forecasting (Chapter 10)	343
Population Policy (Chapters 11 and 14)	343
Population and Environment (Chapter 12)	344
Marketing Demographic Skills	345
Demography for Planners	345
Demography and Business	347
Demography for the Human Service Professional	348
Actuarial Science	349
Summary	350
Key Terms	351
<b>CHAPTER 14</b> Demography as an Applied Science	353
Demography and Population Policy	353
Population Policy in Historical Perspective	353

## XII | CONTENTS

The Origins of Population Policy	354
Demography and Tourism	359
The Dimensions of World Tourism	360
The Impacts of Tourism	362
Summary: Applied Demography, a Postscript	364
Key Terms	365
APPENDIX: WEB RESOURCES DISCUSSED IN CHAPTER 13	367
GLOSSARY	371
REFERENCES	381
INDEX	405
