

Contents

Introduction	1
Chapter 1. Background	7
Chapter 2. Direct products	11
Chapter 3. $\mathcal{E}_1 \wedge \mathcal{E}_2$	17
Chapter 4. The product of strongly closed subgroups	23
Chapter 5. Pairs of commuting strongly closed subgroups	25
Chapter 6. Centralizers	33
Chapter 7. Characteristic and subnormal subsystems	39
Chapter 8. $T\mathcal{F}_0$	49
Chapter 9. Components	61
Chapter 10. Balance	67
Chapter 11. The fundamental group of \mathcal{F}^c	71
Chapter 12. Factorizing morphisms	77
Chapter 13. Composition series	83
Chapter 14. Constrained systems	87
Chapter 15. Solvable fusion systems	91
Chapter 16. Fusion systems in simple groups	95
Chapter 17. An example	105
Bibliography	109
