

Contents

Chapter 1. Introduction	1
1.1. The one variable case	3
1.2. Universal operator algebras	4
Chapter 2. Dilation Theory	7
2.1. Dilation for the tensor algebra	7
2.2. Boundary representations and the C^* -envelope	9
2.3. C^* -correspondences	13
2.4. Dilation and the semi-crossed product	17
Chapter 3. Recovering the Dynamics	23
3.1. Fourier series and automatic continuity	23
3.2. Characters and nest representations	26
3.3. Piecewise conjugate multisystems	30
3.4. The main theorem	32
3.5. The converse	35
Chapter 4. Semisimplicity	43
4.1. Wandering sets and recursion	43
4.2. Semisimplicity	44
Chapter 5. Open Problems and Future Directions	49
Bibliography	51
